Weston Memorial Library

LIBRARIAN'S REPORT

The forty-second annual report of the Library is herewith presented.

Each year we find it fitting to say that the Library has been privileged to serve the community in a larger way than heretofore. Increased facilities permit of greater service, and this year the work has been the most strenuous on record.

The summer patronage was very heavy and very appreciative. The circulation for the two months reached 4,952. During the year 190 temporary cards have been issued.

In 1931 an unprecedented circulation of over 20,000 was reached; and this year it has been bettered by 2,600. The exact figure being 23,284, and 17.8% of that were non-fiction works. The increased number of people seeking reference material have found added means at their disposal.

The Inter-Library Loan system made nearly any non-fiction book available. Books have been borrowed from seven different libraries. The Lending Library of the Division of Public Libraries gave liberal use of books, many of them books not practical, or too expensive, for us to purchase. Our Italian readers found books in their own language for their use.

The Reading Room has been well patronized, especially by the younger people.

The Library has continued to open at 2 p. m., on Wednesday for the benefit of the "barge children" and they have responded to the privilege.

The State Certificate Reading work in the grades has become a fixture with continued good influence on reading habits. The Junior and Senior High School teachers and their pupils have used the Library extensively, with splendid cooperation.

Funds permitted of the purchasing of only 176 books during the year. Friends increased this number by gifts of 117 books, making a total of 293 books catalogued; a regrettable drop from the 500 cataloged in 1931. Of the books catalogued, 186 were fiction, 107 non-fiction, and of the whole number 62 were juveniles. Mention should be made of several albums of photos or post cards collected abroad and presented by Miss Isabel Wesson.

Books were presented by the following interested friends: Mr. William Brewster, Mrs. C. G. Barry, Mrs. John Carleton, Mrs. Frank Chipman, Mrs. H. P. Dunbar, Miss Elizabeth Gosling, Rev. Nicholas Horan, Miss Edith Honeyman, Mr. Dodge Macknight, Miss Wanda McCandles, Mrs. T. N. Motley, Miss L. L. Newton, Mr. E. T. Patchen through C. S. Lloyd, Mrs. Helen Pope, Miss Mary Sharkey, Rev. John M. Trout, Mrs. Robert Wesselhoeft, Miss Wulkop, and Col. Jno. Young; The Commonwealth of Massachusetts, and several authors and publishers.

The magazines (23), purchased for the Library have varied little for several years. These are richly supplemented by gifts from the following: Miss M. C. Baker, Mrs. Lincoln Crowell, Mrs. H. A. Dunbar, Mr. Dodge Macknight, Miss Martha Newcomb, Mrs. and Miss Newton, Mrs. M. H. Whitney, Miss Laura Wing, Mrs. Everett Wright, and several publishers. The magazines donated were Asia, American, American Issue, Atlantic, Better Homes and Gardens, Connoisseur, Current History, Dumb Animals, Horticulture, Humane Review, Judge, Life, London News, McCalls, National Graphic, New England Poultryman, Pictorial Review, Reader's Digest, Red Cross Courier, Specialty Salesman, Time and Travel, making

nearly fifty periodicals available to the public. Many take advantage of the circulation privilege. Over 1,400 were circulated during the year. Many fine magazines are waiting to be read even then.

We still have the pleasure of Mr. Macknight's three paintings, and, for a part of the year, a fourth loaned by Mrs. H. W. Durham.

The outstanding gift of the year was an exquisite piece of statuary, standing three feet in height, of white Italian marble representing "The Awakening of Mother Love". It was presented by Mrs. Thornton N. Motley, formerly Miss Kate Kenney of this town. Much appreciation is due Mrs. Motley for this very valuable gift.

The spirit of cooperation that exists in the community, both with adult and young people is most helpful and gratifying to those connected with the Library. To all, who have in any manner assisted Weston Memorial Library during 1932 thanks are extended.

Respectfully submitted,

ELIZABETH L. BURBANK,

Librarian.

TOWN AUDITOR'S REPORT

The undersigned, Auditors of the Town of Sandwich, have examined the accounts of the Treasurer of the Town, Frank L. Howland, and the accounts of the Trustees of the Weston Memorial Fund and find them correct and properly vouched.

JAMES L. GOVONI,

ALANSON W. PARKES,

J. FOXCROFT CARLETON.

REPORT OF TOWN FOREST COMMITTEE

January 25, 1933.

Board of Selectmen,
Sandwich, Mass.

Dear Sirs:—

During the past fall a "release cutting" was made of the first planting on the Town Forest. This operation consists of cutting back the overhanging brush shading the young trees.

The plantations are doing well and during the ensuing year no particular work appears necessary.

Very truly yours,

LINCOLN CROWELL, Chairman,

Town Forest Committee.

Town Clerk's Report

BIRTHS

Recorded during the year ending December 31, 1932

Feb. 28, 1932. Diana Mary Alves, daughter to Joseph and Sabina M. (Gonsels).

May 26, 1932. Anna Lois Armstrong, daughter to Lindsay R. Armstrong and Florence E. (Emery).

May 27, 1932. Arlene Burke, daughter to Howard Boswell Burke and Margaret Estelle (Crowell).

June 26, 1932. Stanley Everett Grey, son to Stanley Everett Grey and Madeline Gladys (Silvia).

June 28, 1932. Brian Thomas Hamblin, son of Arthur Smith Hamblin and Leone Eleanor (Thomas).

July 4, 1932. Merylin Embroult, daughter to John J. Embroult and Ethyl Reliance (Pierce).

July 13, 1932. Marjorie Schuster, daughter to John Benj. Schuster and Emily Bassett (Denison).

July 13, 1932. Mary Schuster, daughter to John Benj. Schuster and Emily Bassett (Denison).

August 31, 1932. John McArdle, son to John Bernard McArdle and Elizabeth Lyons (McLaughlin).

September 23, 1932. Merilyn Pearl Remick, daughter to Frank Remick and Ruth Ernest (Wood).

October 14, 1932. Carston Howland, son to Winthrop Fry Howland and Shirley Marian (Carlson).

October 14, 1932. Ruth Ann VanBuskirk, daughter to Ernest R. VanBuskirk and Dorothy A. (Knight).

October 16, 1932. Rita May Hammond, daughter to Isaac Luther Hammond and Myrtle May (Cahoon).

October 17, 1932. Annie Parks, daughter to James Henry Parks and Lelia May (Ellis).

November 8, 1932. Barbara Ann Luksanen, daughter to John Jalmar Luksanen and Mabel Preston (Fish).

MARRIAGES

Recorded during the year ending December 31, 1932

March 15, 1932. Charles F. Gardner of Bourne and Jane H. Clarke of Sandwich.

May 30, 1932. Freeman Ellis Gage of Sandwich and Charlotte Evelyn Bowman of Sandwich.

July 16, 1932. George H. Mitchell of Sandwich and Yvonne R. Borbeau of Bourne.

July 18, 1932. Frank H. Purdy of Sandwich and Melinda B. Ellis of Sandwich.

August 21, 1932. Ralph W. Hoxie of Sandwich and Chrissie E. Adams of Sandwich.

September 10, 1932. John Gallo of Bourne and Alide Giovo of Bourne.

September 22, 1932. Daniel B. Murphy of Sandwich and Esther C. Appel of Sandwich.

November 1, 1932. Alfred M. Cheney of Barnstable and Josephine Frazier of Sandwich.

November 24, 1932. Nicholas Maki of Sandwich and Olga Halunen of (South) Yarmouth.

December 26, 1932. John T. Liberty of Sandwich and Olga V. Alvezi of Sandwich.

Report of Community Nurse

Each year the work of the Sandwich Health Association is becoming more and more a General Community Service. The nursing or bedside care remains about the same each year, but with the centrally located residence and more cooperating societies such as the Woman's Club, we are able to serve in a much larger way than we were able to do only a few years ago. We have been glad to assist any organizations in carrying out their programs of relief or aid in any form. We have recorded 521 nursing visits and 453 other or social service visits. There have been no new activities at the Health Center but the car has covered more mileage than in previous years. The trips it has made are as follows:—

Brewster	4
Falmouth	1
Bridgewater	1
Barnstable	1
Sagamore	4
Pocasset	5
New Bedford	1
Hyannis	8
Boston	33

As my report will show, there has been no letting down of any of the work; neither has there been any great accomplishments.

SCHOOL HEALTH WORK.

As contagious diseases throughout the year 1932 have consumed more time than any other part of the work, I beg to report on this first. We began the year with mumps which lasted until the close of school in June.

Even with this disease lasting over such a long period of time only about sixty pupils suffered. About ninety pupils had had them previously, leaving approximately one hundred who did not take them. About twenty children had other gland infections which could not be differentiated from mumps until several days had elapsed. Many of the cases of mumps were contracted by home contacts, and some probably from out of town.

This was also true of scarlet fever, and later in the year impetigo and scabies. All whooping cough cases were directly traceable to the original case or cases.

Seven pupils had scarlet fever. Other than these pupils who had the disease, the school attendance was not seriously interfered with as two children were taken to the County Sanitarium and the other five were in families where there were no other school children.

About sixteen pupils had whooping cough. This was the second time this disease has threatened our children since we have been in the new building. In fact, no more children were exposed after we knew we had whooping cough to deal with. If we can control whooping cough, we surely should be able to control mumps and other communicable diseases if proper precautions are taken by parents and children outside of the school building.

The most virulent and persistent type of impetigo became prevalent during the summer months. Only after four months of drastic and persistent treatment were we able to overcome this. Three families have suffered from scabies, and it is too early to know if other children have been infected as the incubation period may be as long as ninety days. Three families have had pediculosis. These children have been under careful treatment and are clean now, we trust. Three children have had chicken pox.

For the first time since 1927 when we first began giving Toxin Antitoxin have we had a case of diphtheria. No doubt either the child or some member of the family con-

tracted the disease before coming to Sandwich a short time previous.

Our children are fast learning that children who are out of school on account of suspicious symptoms of communicable diseases or convalescing from them are not safe playmates. Children who are home for these reasons, know they are not expected to frequent the library, post-office, churches, or other places where they may come in contact with other children or adults. It is only by the full co-operation of every one in the home and the school that epidemics can be prevented. With but two or three exceptions we have had this co-operation.

No May Day—Health Day—was celebrated, for at that time it did not seem best on account of communicable diseases to bring all the children together in one assembly.

The Sandwich Woman's Club offered a banner to the grade who did the best health work during the year. The following things were taken into consideration: nutrition and correction of dental and other remediable physical defects, personal hygiene and attendance. The only legal absences are illness. The banner was presented to the second grade by the Chairman of the Community Service Department, Mrs. Wallace Freeman, at the Annual Musical Assembly. These children deserved a great deal of credit as during the year they did not know there was to be a banner. Seventy-six physically fit tags to children who had had all remediable defects corrected, were given at this same time, and one hundred and six dental tags to children who had had their dental work completed.

For the third time all the children have had an opportunity to receive the Toxin Antitoxin and the Shick Test so they may know they are protected against diphtheria. With but one exception, all children from Grade 1 to 12 availed themselves of this opportunity. Three clinics were held when Dr. Beale gave forty-one school children Toxin Antitoxin and forty-seven the Shick Test.

Other than this we have no great accomplishments of which to boast. We are only glad we have been able to maintain our previous standards. The dental corrections remain the same as last year, viz: One hundred and sixty-three having had their work completed. In Grades 1 to 6 75% of the children were cared for while in the upper six grades; 50% had their work done. While in the whole of Massachusetts those reporting dropped from 56% to 48% for the lower grades. The report reads: "As was expected."

The group of 10% underweight is the same as last year—viz: eleven in Grades 1 to 6. Nine children failed to gain from September to January, but in no case could this have been from lack of food. Fifteen pupils had tonsils removed. Thirty-two still have enlarged tonsils. Seven children had vision defects corrected, while six more are still uncorrected. Each year the children entering school for the first time come to school in better condition physically to do the work required of them. The nurse has made one hundred and fifty-six visits to the school building, and six hundred and thirty-four visits to the homes of school children.

PRE-SCHOOL WORK

Sixteen babies were born to parents living in the town of Sandwich during the year. The average number of births for the past eleven years is twenty-three. The maximum number was thirty-five in 1923. The average in the past five years has dropped to 14.2 from 26.1 the preceding five years.

The nurse has attended three of these deliveries; made thirty-nine prenatal calls; forty-three post natal to mothers, and forty-five post natal to babies. Of the ninety-three children in town under school age, fifteen were given the Shick Test and found protected from diphtheria—ten

were under six months of age. Fifty-eight were given the Toxin Antitoxin, leaving only ten children unprotected. The nurse arranged transportation for those who wished to come to Dr. Beale's clinic at the school. The others, about twenty-one in number, the nurse took care of at home.

For the first time the little folks from three to five years of age have received dental care. Thirteen have had all necessary work done. This has been made possible by having a regular weekly appointment at the Forsythe Dental Infirmary. This clinic is open to children from three to twelve years of age from families of limited means.

While the school children have had communicable diseases, the little ones have had their share—viz: Scarlet fever, one; scabies, two; mumps, ten; whooping cough, eight. These children were known to have been exposed to whooping cough by their brothers and sisters, and were given whooping cough vaccine. In no case was there serious complications, and in some cases no diagnostic symptoms developed, and in others the vaccine lessened the severity of these symptoms.

Our plans for the coming year are as yet quite indefinite. We can hardly wish for another year like the one just past, but should there be one, we can only hope for the past co-operation and a repetition of past joys and successes.

I wish in closing to thank all those who have stood by, and the new enthusiastic workers who have stepped in to fill the places of those faithful friends of the work who during the year have been called Home.

Respectfully submitted,

EVA L. WESTOVER,
Community Nurse.

Articles by the Faculty

FROM THE SUPERINTENDENT

These are, indeed, trying times and governmental economy is necessary. Great care must be exercised to see that the less vital activities are the first to be curtailed. Economy means getting the maximum return for the money expended. If a school is carelessly operated and is full of extravagances and wastes, it can readily make large reductions in its ordinary budget, but a well managed school finds it difficult to make large reductions in its budget that will not undermine its effectiveness.

Children born of poor parents should receive the same educational opportunities as those born of wealthy parents. Educational opportunity ought not to be governed by recurring economic cycles. Children of lean years should receive the same schooling as those born in periods of prosperity. Those economies which cripple the educational program now are not only unfair to the children of today, but will cause our country to suffer in the future.

In Sandwich, there has been no wild development, no tendency to grow too fast, as it has always been the policy to be conservative and adopt only those procedures that would improve the efficiency of the schools. Although our schools have done much to enrich the lives of the children, and to render service to the many activities of the community, the School Committee has insisted upon a rigid teaching.

It behooves us to at least hear what President Hoover says about education in the present situation.

"Our nation faces the acute responsibility of providing a right-of-way for the American child. In spite of our economic, social and governmental difficulties, our future citizens must be built up now. We may delay other

problems but we cannot delay the day to day care and instruction of our children. . . . In the rigid governmental economies, that are requisite everywhere, we must not encroach upon the schools or reduce the opportunity of the child through the school to develop adequate citizenship.

“There is no safety for our Republic without the education of our youth. That is the first charge upon all citizens and local governments. . . . If we are to continue to educate our children, we must keep and sustain our teachers and our schools.”

Educational opportunity denied to the children of the state today is taken away from them forever. New roads, as well as other improvements, may be postponed without irreparable damage to individuals, but the education of a child cannot be postponed without irreparable damage to that child. This would constitute an injustice to the individual child by robbing him of his rightful American heritage, and it would be a menace to the state, for in so doing we of today would be contributing to the ignorance of tomorrow.

Our system of education is not perfect. It has many defects, but it is the only instrument which has been created to serve this most important function of democracy. Let us strengthen, not weaken our schools in this moment of National calamity!

There has been so much said in regard to teachers' salaries that it seems wise that something be said in the town report concerning the matter. No school is better than its teachers, and the salary schedule is the most important factor in determining the type of teacher which can be secured.

In 1911, teachers were notoriously underpaid, and continued to be underpaid from that time through the war period,—the time when common labor wages were three or four times the pre-war rate. Recently, the salary

conditions of teachers have been somewhat rectified, and if the present purchasing power of the dollar continues, teachers will then be getting only a fair compensation for the money and time put into preparation for the job. Few are attracted to teaching for its remuneration, for while financiers and industrialists may make excessive profits during boom periods, such as 1927 to 1929, there is never any boom period for teachers' salaries. Does the following, as a maximum for skilled, experienced teachers, seem excessive?

The maximum salary actually received by the elementary teachers of Sandwich, after years of preparation and successful experience in which only the fittest survive, is but \$23.40 per week, on a fifty-two week basis. The few who find employment during the summer period are severely criticised for taking jobs away from others.

Some may contend that salaries ought to be figured on a per day basis of actual service. Figured on that basis, the actual maximum return is \$31.58, or less than \$1.00 per hour for actual time spent in the school, with no compensation for the hours of work done at home in preparation and correction. This rate is less than that which skilled labor demands, even in our own town. The high school maximum is slightly higher, since the preparation costs more and takes longer, and due also to the law of supply and demand.

Be fair to the teachers and give them at least a living wage for the splendid service they are rendering to your boys and girls. A severe cut in teachers' salaries would tend to break the morale. It financially would save the average resident property taxpayer less than \$2.00 a year. Contented teachers mean happy children, with an enriched activity program which will keep the younger children off the streets and the older ones out of the pool rooms and such places. Surely, this is worth \$2.00 a year to the average resident taxpayer.

Although the school employees of Sandwich are relatively low paid, as compared with those of other Cape towns, they have not been unmindful that many of the citizens are unemployed. Its employees were the only ones to make a contribution last year. They stepped into the breach and gave a \$700.00 contribution to the town. In order to help the situation this year, they are volunteering to give another week's salary. Besides the direct contribution of the teachers to the town, the Shawme Teachers' Club fund last year for welfare work totalled about \$400.00. Since the direct contribution to the town in June, the teachers have given no individual set sum for this type of helpful service. Nevertheless, they have furnished a number of children with shoes, clothing and food, and have now made arrangements whereby glasses are furnished to all those pupils who need them, but who are financially unable to pay for them.

In considering the personnel, it is well for the citizens to know that the average teacher in Sandwich is above the average in training and experience, and in professional spirit.

SCHOOL EXPENDITURES

A study of expenditures for schools during the last five years in most cities and towns of Massachusetts would show a steady, and in some cases, a phenomenal increase. We are glad to report that such has not been the case in Sandwich.

In 1929 the net cost of schools was	\$26,542.17
In 1930, when the elementary school year was increased, the net cost was	28,319.34
In 1931 the net cost of schools was	28,925.36
In 1932 the net cost of schools was	26,402.86

FROM THE PRINCIPAL

Each year it is customary to report upon the progress of the school for the past calendar year. It has been our practice to deal each year with some particular phase of the work. This is the fifth school year in which the pupils of this town have been consolidated within one school building. We have passed through the period of organization. It should be possible to judge now of some of the results of the policy adopted when this town decided to place all the pupils from the first grade through the high school under one roof and under one administration.

In industrial life, success is based upon the quality of a product and upon the success of the organization in marketing their product at a profit. In order to be gauged by this standard, educational institutions face a peculiar situation. The industrial concern may increase or decrease its order for raw materials and even reject any material which does not meet its specifications. It has a direct control upon the material used to produce its product. This control applies equally well to production. Both the quantity and quality or even the style of the product may be changed according to the judgment of those in control. Moreover, the product whether useful or ornamental, is concrete and tangible. It can be measured, weighed and valued in monetary units.

A public school system resembles an industrial organization in that it receives raw material, and in due season sends out a product, but here the direct analogy ceases. The school has little control over the quantity of the raw material which enters its doors, and none whatever in respect to the physical qualifications or the mental endowment of its entering group. In a larger school these pupils can be divided into groups according to their ability. In a small school each entering class must be treated as an entirety in such a manner that the

great majority may make normal progress from year to year. Every year a group leaves the school bearing a certificate of approbation. Such groups graduating each year represent the final product of the school. Except for the few going to higher institutions, there is no measure that can be applied to denote the success of the training that they have received. For the larger number, judgment must be based upon their attitude and behavior as citizens in whatever community they may take their places.

The smaller number, who enter normal schools or various types of colleges, do afford a measure of the success of the scholastic training which they have received. In this respect, the citizens of this town may well take pride in the record of their school. This is a fitting place to explain what is meant by the "certificate privilege" of a school. The State Department of Education issues annual certificates to approved high schools. These signify that the organization of the school is approved, and that the graduates attending normal schools are maintaining a satisfactory standard of work. This school is so certified. This certificate entitles the graduates to enter the State Normal schools without examination if the school certifies that they have maintained an excellent standard of scholarship. An association of New England colleges have a similar system in effect. The certificate of this association is granted only annually until, over a period of years, the record of the students attending colleges demonstrates that the high school is offering adequate preparation. This school now holds a four-year certificate. A few colleges insist that applicants for admission must take a series of examinations. From time to time, graduates of this school pass these rather severe examinations. These facts are direct evidence that this small school is meeting the increasingly difficult requirements of all types of higher institutions of learning.

There is more required today than merely to possess a set standard of scholastic information. More and more the colleges are demanding the fundamentals which we sum up as character in addition to a satisfactory scholastic record in the studies. The school would most frankly acknowledge that most of the credit belongs to the boys and girls who have established, and are establishing, honorable records in various normal school and colleges. Nevertheless, there is a part which the school may claim, and which has given it a full credit rating in competition with larger and more completely equipped schools.

A distinct and valuable contribution is being made to the curriculum of the elementary grades by the addition of physical training. With the assistance of Miss Alma Porter of the State Department of Education, a graded program covering the first six grades has been arranged and is rapidly becoming operative. As a preliminary step, Miss Porter held several conferences with the teachers outlining the work. One afternoon was given to an actual demonstration with a group of pupils. The course, as outlined, will be conducted by the individual classroom teachers. Part of it can be carried on in the classrooms. For other exercises requiring a larger space and more freedom, the auditorium will be used. The exercises are naturally simple and adapted to the age of the pupils. There are formal marches which later develop into dances. A graded series of games requiring physical activities, coordination, and group movements are included to provide both the proper exercise and interest. Physical training has such world-wide recognition as an essential part of the development of youth that we take pride in that we have been able to make a beginning in such work. The teachers have responded enthusiastically to this additional responsibility, recog-

nizing its value. In time we expect to be able to report tangible results.

We can report a satisfactory situation in respect to the general conditions of the school. There have been no epidemics of illness to seriously interfere with the progress of the school. This fortunate condition has been particularly marked in the upper grades of the school. At the time of writing, when in many sections school activities are almost at a standstill because of illness among the student body, the attendance in our school is at the highest level. There is a distinct evidence of pride among the pupils in being at their places at the appointed time, and not infrequently at no little sacrifice. This is but a phase of the general spirit of responsibility and loyalty which the school is attempting to cultivate, and which we believe to be an important function of a public school.

The physical conditions of the building are on the whole satisfactory. The splendid standard of cleanliness which is maintained is always commented upon by visitors. We are indebted to the local organization whose cooperation made possible the beautifying of the grounds. The school building and grounds are in harmony and worthily represent the pride of the town in its public school.

In closing this report, we wish to thank the School Committee and the Superintendent for their interest and constant effort to make the work of the school more efficient. The principal and the teachers recognize the faithful service which is behind them and welcome an opportunity to express their appreciation.

Respectfully submitted,

C. G. PERSONS, Principal.

FROM THE SUPERVISOR OF MUSIC

The objectives for which we are striving in music are accuracy of intonation, correct use of the voices, precision in time, rhythm and accent, good diction, expertness in sight reading, and the creation of a love for music by the teaching of seasonable and beautiful rote songs.

Two recitals have been given during the year. The programs have consisted of numbers by the rhythmic band of grade two, rote songs by the grade classes, solos and trios for the violin and the violoncello, a viola solo, and selections by the string orchestra. These recitals give pupils definite objectives for which to work, they stimulate study in music, they are educational for the pupils who listen, they are a means of teaching stage deportment to those who participate, and they give parents an opportunity to observe the progress of pupils.

The high school chorus consists of approximately one hundred voices divided into four parts. The rehearsals are held on Thursday at nine o'clock. The lessons consist of singing many hymns, home songs, and folk songs in order to give as wide a practice as possible in sight reading. At the close of each lesson a musical number is given by some pupil, or by the supervisor.

The string orchestra holds rehearsals once each week on Thursday at half-past two. All the string instruments, except a double bass, are represented. The members are faithful in attending the after-school rehearsals, and I hope recognition of this work may be given in the form of diploma credit.

The auditorium of the Henry T. Wing School is splendid in its acoustic properties, but the upright piano, which has seen long use, is not quite adequate in volume of tone for all the demands that are made upon it. May I express the hope that a grand piano may be substituted for it sometime? If this should be done, the upright

piano could be moved to a basement room, which would be an excellent place for the rehearsals of the orchestra, thus releasing the assembly hall to some other of the many demands that are made upon it.

It would be well to add that as part of our music activities a group of our high school pupils took part in the New England Choral Festival held in Providence last spring. They were able to participate through the splendid efforts of Mrs. Charles Lloyd who trained them for the event. The group had a fine enriching experience and we shall try to prepare another group this year.

Our Shawme Orchestra won first prize in Class C in the Massachusetts High School Orchestra Contest held in Norwood last May. We are planning to enter the contest again this year.

In closing I wish to thank the School Committee and the teachers for the generous spirit of cooperation which has been shown towards our music.

Respectfully submitted,

ERNST MAKECHNIE,

Supervisor of Music.

FROM THE SUPERVISOR OF DRAWING

Education and the arts concern each one and have to do with all the life of everyone. Understanding and appreciation of the arts are the things which should concern us more than the art ability of the individual. Art education in the past has fought its way alone. Unrelated to general education. Now we realize that art education must fit the scheme and conform to the objective and pattern of general education to have significance. It makes little difference how much talent people have because we all have the same needs for experience in the world.

Each human being is born with the desire to have things of beauty in his life. Without a sense of beauty or an ability to appreciate the fine arts, life is undeveloped and empty. The fine arts should be considered a necessary part of living.

Here in Sandwich the children for eight years are given a course in drawing which develops their appreciation of the fine arts. Through creative expression they are taught to see clearly, to appreciate form and color, and to use their hands in simple crafts. Their academic studies are benefited by their drawing and the drawing supplements their academic studies. There is a very close relationship between art and the every day work because each grade teacher strives for this result. At the eighth year they are beauty conscious; have experienced the thrill of creation and achievement and art has a part in their life.

Many interesting courses could be taught in the high school, and the courses should be elective. Mechanical drawing, history of art, history of architecture, representation in charcoal and water color, are some of the courses that would teach pupils to express their ideas accurately and with some beauty. The appreciation

courses—the appreciation of color, of pictures and of costumes—would create good standards of taste.

Art in the High School encourages pupils to continue through technical schools of art and industry. There is one pupil in the second year of High School who wants to enter Massachusetts School of Art. To make up for the lack of art instruction in our High School, this pupil has to draw and study by herself with what meager help the art supervisor finds time to give.

Massachusetts has always led in education, and for the last sixty years has recognized the need of art instruction. All large cities, and almost all small towns, have art instruction in both elementary and high schools. It is to be hoped that Sandwich will continue the tradition of New England culture, and will install a course of art in the High School.

I wish to thank the Superintendent of Schools, the Principal and the teachers for their help and support of the art department.

Respectfully submitted,

EDITH SAVARY HALL

REPORT OF SCHOOL PHYSICIAN

As School Physician I have the honor herewith to present to you my report.

The sanitary condition of the school building continues excellent. The efficiency of the ventilating system is apparently demonstrated by the fact that contagious diseases have not affected a single room as a whole. Dissemination of contagion has largely been within the limits of a neighborhood or by contacts in the barges.

In May all children were given a physical examination and fifty notices sent to parents of defects found.

In December three clinics were held when forty-seven school children and fifteen pre-school were given the Shick Test and forty-one school children and fifty-eight pre-school were given three immunizing doses of Toxin Antitoxin.

Diphtheria has been prevented since 1927. The only cases have been imported.

During the year approximately one hundred fifty certificates to return to school have been issued to pupils who have recovered from communicable diseases or had been excluded on account of symptoms of such diseases.

Respectfully submitted,

S. M. BEALE, School Physician.

RECORD OF ATTENDANCE FOR THE SCHOOL YEAR
HENRY T. WING SCHOOL
1931 - 1932

State Auditor's Report

April 27, 1933.

To the Board of Selectmen

Mr. James W. Freeman, Chairman

Sandwich, Massachusetts

Gentlemen:

I submit herewith my report of an audit of the books and accounts of the town of Sandwich for the period from January 1, 1932, to March 23, 1933, made in accordance with the provisions of Chapter 44, General Laws. This is in the form of a report made to me by Mr. Edward H. Fenton, Chief Accountant of the Division.

Very truly yours,

THEODORE N. WADDELL,

Director of Accounts

Mr. Theodore N. Waddell

Director of Accounts

Division of Corporations and Taxation

State House, Boston

Sir:

As directed by you, I have made an audit of the books and accounts of the town of Sandwich for the period from January 1, 1932, to March 23, 1933, and submit the following report thereon:

The financial transactions of the town as recorded on the books of the several departments receiving or disbursing money for the town were examined and checked.

The books and accounts of the treasurer were examined and checked in detail. The recorded receipts were compared with the records in the departments collecting money for the town and with the other sources from which money was paid into the town treasury, while the payments were checked with the selectmen's warrants authorizing the treasurer to disburse town funds and with the approved vouchers and pay-rolls on file. The cash book additions were verified and the cash balance on March 23, 1933, was proved by reconciling the bank balance with a statement received from the bank.

The books and accounts of the tax collector were examined and checked. The commitment lists of poll, property, old age assistance, and motor vehicle excise taxes were added and proved with the warrants of the assessors committing the taxes for collection, the collections as recorded on the several cash books were checked with the commitment book postings, the payments to the treasurer were verified by a comparison with the treasurer's cash books, the abatements as recorded on the commitment books were compared with the assessors' records of abatements granted, the cash books were footed, and the cash on hand was verified by an actual count.

The outstanding tax accounts were listed, proved, and verified by mailing notices to a number of persons whose names appeared on the books as owing money to the town, the replies received thereto indicating that the accounts, as listed, are correct.

The town clerk's records of sporting and dog licenses issued were examined and checked, the payments to the State and county being verified.

The selectmen's record of licenses granted was

examined, and payments to the treasurer were compared with the treasurer's cash book.

The records of the sealer of weights and measures were examined and checked, the payments to the treasurer being verified. Attention is called to Section 34, Chapter 98 of the General Laws, which requires monthly payments to the treasurer by the sealer.

The record of library fines collected was examined, and the payments to the treasurer were checked with the treasurer's cash book.

The records of the public welfare and old age assistance departments were examined. The charges and receipts were checked, the payments to the treasurer were verified, and the outstanding accounts were listed and proved.

The savings bank books and securities representing the investments of the trust funds in the custody of the town treasurer and the trustees of the Weston Memorial Fund, were examined and listed. The income was checked and the withdrawals were verified.

The surety bonds furnished by the several officials for the faithful performance of their duties were examined and found to be in proper form. The surety bond of the trustees of the Weston Memorial Fund has expired and a new bond is being secured.

Ledger accounts were compiled and analyzed, and a balance sheet showing the financial condition of the town on December 31, 1932, was prepared and is appended to this report. There are also appended tables showing a reconciliation of the treasurer's cash, summaries of the tax and departmental accounts, as well as tables showing the trust fund transactions.

For the co-operation of the several town officials during the progress of the audit, I wish, on behalf of my assistants and for myself, to express appreciation.

Respectfully submitted,

EDW. H. FENTON,
Chief Accountant.

Town Clerk's Report

Births

Recorded during the year ending December 31, 1933

January 22, 1933. Jane Elizabeth Adams, daughter to Eugene Bowen Adams and Marion Frances (Harlow)

February 3, 1933. Anne Drew Wetherbee, daughter to Andrew W. Wetherbee and Bessie R. (Dickie)

March 12, 1933. Norman Eustis Langdon, son to Francis Eustis Langdon and Eva (Larose)

April 27, 1933. Ernest Donald Fritze, son to Bernard Otto Fritze and Elsie (Frye).

March 3, 1933. Bernard Arthur Brady, son to Bernard Brady and Florence Elizabeth (Wyman).

May 29, 1933. Robert Andrews King, son to Gordon King and Grace L. (Andrews)

June 6, 1933. Frances Marie Silva, daughter to Francis Joseph Silva and Theodora R. (Silva)

June 29, 1933. Robert Anthony Quirk, son to George Edward Quirk and Sarah M. (Parks)

Librarian's Annual Report

This presents the forty-third annual report of the Public Library.

This year, as usual, has proven a very busy one, in the work the library has been privileged to do for the benefit of the community. The town's people, the summer visitors (to whom 147 temporary cards have been issued) alike, have taken advantage of the ever-increasing facilities the library offers them.

The circulation which is indicative of liberal use of library books, does not show the constant demand made upon the reference department, or the extensive use of the reading room, where, especially our younger people, spend so much time.

Our circulation averaged 1820 volumes per month. Three months exceeded 2,000, July being largest with 2187. The total circulation for the year was 21,843, apportioned as follows: Fiction 17,318, non-fiction 4525, or over 20% of the total, and magazines 1502.

The Inter-Library loan system has greatly increased the possibility of supplying the public with what we do not own ourselves. It has been through the assistance of the State Library Commission that much of this has been accomplished. We have had the loan of books from at least twelve different libraries during the year.

The use made of the Library by the pupils of the Public Schools increases each year. The State Certificate Reading by the Grade pupils exerts, at all times, a helpful influence on desirable reading habits. The Library continues to open at 2 p. m. on Wednesdays to accommodate the children who use the School barges, and they make good use of the opportunity offered.

During the year 297 books have been catalogued. Of these 143 were purchased, the other 154, were gifts of friends, at some time. Quite a portion of them were replacements, on the shelf of worn books and not new titles. We added 222 books of fiction, and 75 of non-fiction.

Miss E. Louise Jones of the State Library Commission gave us valued assistance in the renovating of the Library shelves, and, in having their State mender repair for us 100 worn books. This greatly helped in putting needed books back upon the shelves, and into circulation, there being no library funds available for rebinding books this year.

Gifts of books have helped to supplement the unavoidable curtailment in the purchasing of new ones. Friends presenting books were Mr. William Brewster, Miss M. C. Baker, Mrs. C. G. Barry, Miss C. F. Lyman, Miss Wanda McCandless, Mr. D. Mac-knight, Miss Abbie F. Nye, Mrs. W. Reed, Miss Isabel Wesson and Mr. John Yard.

The magazines (23) purchased in 1933, have varied only slightly from recent lists. The splendid supplementary list, presented by friends, and mentioned below, gives a well balanced assortment from which to choose. The magazines donated were Asia, American, American Issue, Atlantic, Better Homes

and Gardens, Dumb Animals, Good Housekeeping, Harper's Bazaar, Horticulture, Humane Review, Harvard News, Life, London News, McCall's, N. E. Poultryman, Pictorial Review, Readers' Digest, Red Cross Courier, Specialty Salesman, Time, and Travel.

The donors of these magazines were, Miss M. C. Baker, Mrs. Lincoln Crowell, Mrs. H. A. Dunbar, Mr. D. Macknight, Miss Martha Newcomb, Mrs. J. L. and Miss L. L. Newton, Mrs. M. H. Whitney, Mrs. E. T. Wright and several publishers.

The Library has lost in the passing of Mr. William Brewster, a valued friend and liberal donor, as his many gifts give evidence. Early in the year he brought to us two unusual dishes of heavy glass, and also gave us four framed pictures of English Hunting scenes, considered quite valuable. Mr. Brewster bequeathed us the sum of \$1,000.

Another bequest this year was from the will of our townsman, Mr. J. Frank Giles, for the sum of \$2,000; the income to be used for books.

Sandwich is unusually favored for a small country town to possess such a beautiful building, and so splendidly adorned that it commands the admiration of the many who visit us. We are pleased that Mr. Macknight's paintings, including a fourth loaned by Mr. H. W. Durham, still help to lend atmosphere to the room.

Much appreciation is due, and is here expressed to those who have in any way assisted in making the past year one of real service to the community.

Respectfully submitted,

ELIZABETH L. BURBANK,

Librarian.

Sandwich, Jan. 8, 1934.

Nurse's Report for 1933

Previous to 1932 it seemed important that the nurse be not identified with relief giving. However, the time came when it became necessary to co-ordinate the public relief with that of private agencies. The nurse having contacts with the several relief giving agencies and also with the home, this new activity was added to our service. It has been a very satisfactory way of handling a vexing problem. To my knowledge no child has had to wear any clothing furnished by Public Welfare.

We have distributed both worn and new clothing provided by individuals and local organizations and the American Red Cross. Just as soon as the parents are able to again provide necessary clothing we should return to our former policy. All requests or offer of clothing has been through the parents—never by the children themselves.

Four hundred and seventy-three Social Service visits have been made.

Tuberculosis

We still have reason to be optimistic in regard to Tuberculosis. No deaths have occurred from this cause in the past three years and only seven in the past fifteen years. No active cases exist to my knowledge.

School Nursing

One hundred and thirty-four visits have been made to the school buildings and three hundred and thirty-six visits to the homes of pupils.

In June the children gave a short program in the Auditorium when the tags earned by having physical defects corrected were distributed. The health banner was presented at this time by Mrs. McCann, chairman of the Community Service Committee of the Woman's Club. The third grade for the second time won this banner having received it the year before when they were in the second grade.

The annual physical examinations were made in June and sixty-six notices were sent to the parents of physical defects found.

Seventy-nine or sixty percent of the pupils in the six lower grades have had their dental work completed. Last year seventy-five percent had their work done. In the six upper grades, fifty-six percent had their work completed while last year only fifty percent had their work finished. With but three exceptions, these pupils had their work done by their private dentists.

The thirty-five pupils in the eight lower grades who were more than ten percent underweight, seventeen, or nearly fifty percent, have overcome this defect.

Through the co-operation of the Woman's Club and other organizations, all vision defects have been corrected with two exceptions. Seven have been corrected with glasses and ten have been refitted.

Thirteen have had tonsils removed during the year.

Thirty-six still have enlarged tonsils. I reported thirty-two last year.

By graduating some of this group and having some tonsils removed each year we would be able to lessen the number if it were not for those whose tonsils become a source of danger during the year. However, I find in the School Physician's report of 1925 there were eighty-one children with enlarged tonsils. This is the first year any report was made on these cases and the second year children were taken to part-pay clinics. My report says "thirty-two children have had tonsils removed during the year; twice as many as the previous year" so in less than ten years we have reduced the number from over one hundred to the thirty-six we are reporting this year.

Contagion

At the beginning of the year there were three cases of chicken pox. Later there were thirty-one more cases in the school group and six cases of pre-school children. Twelve school children had scarlet fever and two smaller children. In the last half of the year there have been no contagious diseases except a small number of skin infections.

Pre-School

Instructive visits to this group were one hundred and sixteen. Ten children three, four and five years of age have had their dental work completed. There are only forty-three children in this age group.

Bedside Nursing

Nursing visits for the year have totalled three hun-

dred fifty-two and thirty-three pre-natal visits have been made also twenty-nine post natal visits to the mother and thirty visits to the new born. The nurse has attended four deliveries. Seventeen babies have been born to Sandwich parents. Three of these have already left town leaving fourteen, the same number as in 1932.

The out of town trips are as follows:

Sagamore	6	Pocasset	6
Bridgewater	1	Brewster	3
New Bedford	2	Wrentham	1
Hyannis	4	Boston	45

In closing this, my eleventh Annual Report, I wish to thank the Woman's Club for their assistance and encouragement and all other organizations for all they have done to help lighten the burden. To my own executive committee, town and school officials, I wish to express my appreciation for your assistance in making the work of 1933 effective.

Respectfully submitted,

EVA L. WESTOVER.

Superintendent's Report

To the Citizens of the Town of Sandwich:

Last year we gave considerable attention to the discussion of teachers' salaries, and we urge that the citizens read again this portion of last year's town report. Since that report was written, the school committee have reduced the maximum salary of the elementary teachers to \$1200 and the maximum salary of the women high school teachers to \$1300.

Of the nineteen towns that border Buzzards Bay and Cape Cod Bay, eighteen paid their elementary teachers more than the maximum salary established in Sandwich. Fifteen towns of the above group have high schools and in fourteen of these the high school maximum is greater than that in Sandwich. In spite of the relatively low salary paid, teaching service has been carried on in an able manner. The town may well be proud of the accomplishments attained by the graduates of its high school. There are very few small high schools that have as many students doing well in the colleges of high standing as is true of the H. T. Wing school. Our graduates who go on to other schools for further education find that they have been well prepared.

The pupils who go from our elementary schools to the cities and towns of greater Boston are placed in the same grade as they were in Sandwich and almost without exception they are enabled to do well the work of a new system. It does seem that every effort ought to be made to at least maintain the present

salary schedule for the teachers responsible for these results.

Last year when the school report was being prepared, we thought that another year would bring us out of our economic distress. Although it does appear that the clouds are breaking, conditions are still serious. The town of Sandwich has, with a number of other towns, been passing through troublous times, and the school department is fully conscious of their responsibility to operate this department as economically as possible. For the past five years the net cost to the town for the support of schools has steadily declined. In 1933 the expenditure was about ten percent less. Teachers' salaries, text books, and supplies, and other instructional expenses are the items wherein savings have been made. If the youth of Sandwich is to have as fair a chance as in neighboring towns, we must not go too far in this regard. There are some who believe that we ought to return to the "old red school house," yet we never hear those same people expressing a desire to exchange their automobiles for ox-carts. No doubt there are a number of able men in Sandwich and elsewhere who had no better educational advantages than what they secured in a one-room school building, but in a large measure, they only had to compete with others of similar circumstances. It would be unfair as well as unwise to have your deserving children denied educational opportunities. We must balance the budget, but as Babson says, "We must not balance the budget with the ignorance of youth."

A few years back, when the economic outlook appeared bright, an additional teacher was assigned to the high school. This was done to enrich the cur-

riculum, particularly in regard to commercial education. Some believe that one of the ways by which we could economize would be to eliminate a teacher in the high school. Undoubtedly, this would bring about some saving, but not as large a saving as one might presume. The salary now paid such a teacher is \$1300. Although the Town must appropriate this sum of money in the school budget, for this teaching service, a large portion of it is returned to the Town. Under General School Fund, Part 1, the Town receives a re-imbursement on this account to the sum of \$200. Under General School Fund, Part 2, there is a further re-imbursement of about \$700.00, making a total of \$900.00. One can see from the figure that the actual cost to the Town of Sandwich for this additional teacher is less than \$400. It then becomes a case of measuring values. Is it better to have this \$1300.00 teaching service at a cost of \$400.00 or to save the \$400.00 and lose all the enrichment of educational opportunities for the youth of the high school?

One economy which might be effected, is a combination of grades in the elementary school. This is a measure that thinking people are reluctant to institute when the groups are relatively large. Few authorities believe that more than forty in one grade is desirable and it is rare, indeed, that anyone would recommend the establishment of combined groups of forty or more. There is but one possible combination of two grades to a teacher in the elementary grades that might be feasible. At present there are 18 pupils in the first grade. Of these, there will probably be about four repeaters, and a new enrollment class of slightly under 20. It may be that if no new families move in that there will be but 38 to 40

pupils in grades one and two in September, 1934. We have no elementary room that would accommodate a larger number. It is, of course, possible that we may have a few more entrants due to construction work being done on the Canal Bridges. If we do, there is no hope in this direction.

Since no one can, with any degree of accuracy, forecast conditions in September, the committee is planning for only one grade per teacher. Such a combination would save the town but \$300.00 per year due to the loss of state re-imbursement. If conditions warrant a combination, you may be sure that they will take the initiative.

The case of the community use of the auditorium has been one to which the school committee has given considerable attention. After careful consideration, they adopted a regulation that allowed the use of the auditorium only for school purposes and for what they considered definite civic organizations. Recently an open meeting was held and, as a result of opinions expressed by the citizens of the town, the school committee has decided to allow a more extended use of the auditorium.

All requests for the use of the auditorium must be presented in writing to the Superintendent of Schools, in time for action by the school committee at their regular monthly meeting, which is held on the 3rd Thursday of each month at 7:30 p. m. at the Henry T. Wing School.

A fee of ten (10) dollars per evening, during that part of the year when the auditorium is heated, and eight (8) dollars per evening, when heat is not required, shall be charged for the use of the auditorium. This fee includes the use of the auditorium for one

(1) dress rehearsal. All other rehearsals shall be at the rate of four (4) dollars per rehearsal.

The organization hiring the auditorium shall pay the janitor three (3) dollars for each entertainment, and one (1) dollar for each rehearsal.

The Sandwich Health Association, Inc., as it is now organized, The American Legion and The American Legion Auxiliary shall be exempt from the payment of all fees for use of the auditorium.

The other "fifty percent" is a term we often see in current educational literature. It refers to the number of students now attending high school, who formerly were in industry. It is due to the influx of these children that there is a phenomenal growth in high school enrollment. The N.R.A. codes are excluding large numbers of young people, who formerly went to work, and these young people, finding no employment, are turning to the schools. It is reasonable to presume that the present educational age of 16 will be extended probably to 18. If such is the case, we shall have a further group of these children to care for in our high schools.

We have already at Sandwich a peculiar problem, which concerns itself with this type of pupil. We have attempted to make adjustments in the type of offering as well as in the method of instruction. We have had to do this as the usual academic offering, which is of particular value to the college going group, is of little value and of little interest to this other type of pupil. In place of compelling these pupils to take first year algebra, we have introduced a course in general mathematics which will be of far more value to them. In the social studies we are substituting a course in American civilization in place of the usual

ancient history. Our high school has done a particularly fine piece of work in preparing for college.

Just as soon as economic conditions permit, something definite must be done to satisfy equally well the needs of this other "fifty percent."

In closing this report, we wish to urge the citizens of Sandwich to give serious consideration to the advice of men of the caliber of Franklin D. Roosevelt, Herbert Hoover and Alfred Smith to be as generous as possible in the support of the public schools.

Respectfully submitted,

JAMES F. PEEBLES,
Superintendent of Schools.

Report of the Principal

The report of the Henry T. Wing School for the year can detail no expansion of activities. On the other hand there has been no curtailment. One of the goals of all schools through these critical years has been to maintain a high morale upon which foundation rests the success of the school in maintaining its standard. The degree of the morale depends primarily upon the loyalty of the teachers to the highest aims of their profession. Each teacher as he or she faces a class is the living barometer which sets the measure of accomplishment. Measured by this standard our school has taken no backward step. A high morale is of first importance if our school is to march forward in step with the new and changing conditions of society.

Statistical data included elsewhere, does not vary greatly from other years. Comparison of the reports of the several previous years does show the gradual growth of the high school department. There are two main reasons for this growth. More and more it becomes necessary a high school diploma to secure a position in many industries. This practical side of education is well recognized by every boy and girl who enters the high school. A second factor is that with a surplus of adult labor it is increasingly difficult for junior labor to obtain employment. Frequently the obvious misfit justifies his presence in school with the argument, "there are

no jobs." The writer proposes to deal briefly with this perplexing phase of the small school.

It appears evident that the New Deal has come to stay in some form. Perhaps not to continue in the present form, but obviously the old order has passed. Public education cannot escape the influence of this change in the social and industrial order. What appears more certain than that a much curtailed working week will continue to assure employment for more adults? If this assumption is correct what then becomes of the juvenile workers who have constituted hitherto such a conspicuous part of our industrial army? Whether or not the child labor amendment becomes an integral part of our constitution it is fair to assume that there is to be a smaller opportunity in industry for the boy and girl under eighteen years of age. While this change more acutely concerns larger industrial centers, it reacts upon every community. Will our youth continue in school until they can qualify for adult occupations or will they become loiterers, a problem to the home and society? If they continue in school will they be able to progress or will they because of a lack of academic ability constitute groups which must receive special consideration, or else lower the standards of the smaller schools which are unable to subdivide their classes? Will constitutional provisions or state laws forbid the employment of minors and thus force provisions for this group upon local authorities? Are there to be educational laws raising the compulsory age of school attendance? Signs of such legislative action are not lacking. Whether or not there be legal compulsion for more extended public education provision for such is a

consideration which will concern those in authority in the near future if it is not already at hand. In the larger centers the continuation in school of pupils of an increased age means an expansion of facilities already in existence. The small school without facilities for non-academic subjects is confronting a situation which may eventually involve a radical reorganization. In many towns this is not a problem of the morrow, but it is already in evidence. Groups are enrolled who are unable to cope with the outlined courses of the school. Many of such groups possess abilities which are of value. Obviously the smaller communities cannot afford to extend their school facilities to include courses in manual arts and vocational subjects. Yet such groups are entitled to equal consideration. In time the solution may be found in the establishment of schools of various types covering convenient geographic areas. In the meantime the revolutionary changes in economic conditions is placing the schools in smaller communities in a position where they are unable to meet the educational needs of the pupils above the elementary grades.

For generations the platform and press have stressed our public schools as the bulwark of our national progress and the safeguard of our political security. There has never been a more acid test of the sincerity of these sentiments. Our neighbors in Europe have insisted that their youth must not be handicapped for the future by any curtailment of education. Their systems are largely centralized rather than localized as in our country. The army of teachers have the direct responsibility for the training of those placed in their charge. They believe that

responsible public sentiment requires that the youth of our land receive the best that education can offer. This cannot be too ample for the problems of the years to come. In the last analysis it is the individual communities which will determine the answer. Our boys and girls are dependent upon us for their preparation for future citizenship. We have found them receptive and serious. As teachers we hope to be able to give them the adequate training which they need and expect.

In closing I wish to express my appreciation of the support of the superintendent in his sympathetic guidance, and for the loyal coöperation of the teachers in carrying on the work of the school.

C. G. PERSONS.

Report of Music Director

Mr. Peebles:

Music, the art of arts, is the natural language of the emotion and school music should palpitate with the emotional life in which the best of it was born. By regarding art as available for all rather than a privilege for the chosen few, we have solved part of the most serious problem facing the leaders of our nation who are concerned with the preparation of the rank and file for wise and constructive use of the increasing hours of leisure.

G. Stanley Hall, famous psychologist and educator, said upon the subject, "The Education of the Heart," "If you will picture a great iceberg and as you look upon it realize that what you see constitutes one-ninth of the entire berg, while underneath the surface of the water lies a submerged eight-ninths, you will have a physical representation of the proportionate parts of this thing that we call the soul of man. For the intellectual side of man's being is the one-ninth and the emotional or spiritual side the eight-ninths and just as this berg moves on its course, undisturbed by any storm that sweeps the surface, controlled and directed on its way by the submerged eight-ninths, so man in all great issues of life is dominated and directed by his emotional nature."

Much progress has been made in the teaching of instrumental music in our public schools. We have been fortunate in being able to secure very adaptable and progressive material in order to provide the

average grade school and high school orchestra with a diversified collection of music of selective classics and original modern compositions, appropriate for use in school assembly and for special occasions. The compositions have been chosen for their educational and musical worth. They are dignified yet melodious examples of the type of music that is valuable in leading young musicians to discover the best traditions of orchestral style.

Credits have been earned as the results of tests given to all the students. These tests purpose to develop solo training, self-confidence and self-reliance, not only in instrumental playing, but in other lines of endeavor. Tests of this character help the teacher to judge whether a pupil is working up to capacity and to stimulate the truth of the idea that nothing can be seriously accomplished without daily practice at home. The greatest problem is still to get pupils to practice. If some method could be arranged to secure supervised practice periods, the work done would soon be of even better quality. There are some pupils who already practice faithfully.

Music and the allied arts give cheer, comfort and richness to life. They bring beauty to our materialistic civilization. Beauty contributes to the morale and stability of a nation.

Our music program report would not be complete without commenting upon the valuable volunteer work of Mrs. Charles S. Lloyd. This public spirited woman generously gave of her time and energy preparing a group of our high school students for the All New England Chorus Festival. Besides training them, she accompanied them to Providence and

chaperoned them during their stay. The group received high praise and brought credit to the Henry T. Wing School.

The recently presented operetta, "Gypsy Rover" was only made possible through her untiring efforts. She is now at work assisting the boys in their Minstrel Show. The school is indeed fortunate. We also wish to express our appreciation to Mrs. Myron H. Whitney and Claire Morse, for their able assistance, and to all others who have co-operated to make the lives of the youth of Sandwich rich and wholesome.

ADOLFO QUERZE,

Instrumental Music Director.

Report of Supervisor of Art

Mr. Peebles:—

Last year I tried to show in my report how great an influence an art course would be in the social and cultural life of the pupils. I said art is part of life's needs and now say, furthermore an art course will help a pupil to earn his living.

By this I do not mean that a child, having dutifully accomplished each drawing lesson in school can step out of high school and secure a good position, just because of this. But I do mean that in the complex age in which we are now living, an understanding and appreciation of art principles will help a person to obtain work in many ordinary occupations. I will list a number of occupations not usually thought of as requiring artistic understanding, yet which are assisted by this understanding.

1. Printing and advertising
2. Salesmanship of
 - a. real estate
 - b. clothing
 - c. domestic utilities
 - d. automobiles
3. Florist
4. Photography
5. Dressmaking and Millinery
6. Beautician
7. Carpentering and Building
8. Masonry

Occupations or trades of industrial art and the professions which require technical art study have been purposely omitted. I refer, rather to the work

which a pupil might enter with little or no additional training as soon as he is graduated from high school. A person who has good standards of taste could fill any of these positions more successfully than one without any understanding of these standards.

The aim of the drawing lessons in the grades is the gradual acquirement of good taste. Can you imagine a salesman of real estate, furniture, clothing, or domestic utilities who would not be benefited by an understanding of proportion, good design and beauty of line and color in the article he is selling? He would be able to talk intelligently of the beauty of his product as well as of its utility. It must be just as easy to build a building of pleasing wall proportions and good roof lines as the reverse. Brick and stone are full of natural elements of design and almost anyone would rather have a beautiful chimney or wall than an ugly one.

Occasionally I have seen a window of a small town store which in color scheme, arrangement of objects and lack of confusion was an example of beautiful decoration and which as such attracted interest. A clerk who is able to arrange a window of groceries in good taste would have an advantage over one who could not.

The necessity of a knowledge of art principles in printing and advertising, dressmaking and the other listed occupations with a little thought will be obvious. For instance the work of a beautician is closely related to art, and I do not mean the art of make-up. The size and shape of the head determine the attractiveness of a coiffure. Fashions change but good art principles remain the same. Hair cutting and hair

dressings have to obey the same laws of design which determine the line and grace of a vase or a Greek statue. Everything made by man should conform to certain laws of design.

The appreciation of good quality, sound workmanship would surely help to sell good things. The aims of a sound art course are as applicable to ordinary usages as they are to esthetic professions. In my own limited experience I know that art training has helped me obtain a position aside from the teaching of art. That was in the selling of antiques, in which the knowledge of art was very vital and I could not have obtained the position except for this knowledge.

The pupils of Sandwich would gain much more benefit from their study of drawing if the high school offered an efficient art course. A collection of fine objects for study just as we have books for reference would greatly help our curriculum. We are too far from museums and art galleries to get the help we need.

EDITH SAVARY HALL.

Report of Supervisor of Music

Mr. Peebles:—

Our aims in music are as follows,—to create interest in this subject, to train the ear to the effect of tones in their relations, to give practice in voice culture and in diction with reference both to singing and to speaking, to develop an understanding of, and correct habits in time, rhythm and accent, to promote skill in sight reading, and to give an acquaintance with a repertoire of beautiful songs.

In grade one, we teach pupils the major scale and some of the easier intervals. The pupils of grade two make a beginning in learning the staff notation by means of easy exercises which are printed on large charts, and they gain practice in double time by means of the rhythmic band, which they greatly enjoy. Grade three uses several different music readers in order to gain fluency in reading easy exercises of the diatonic scale. The divided beat is taken up in grade four, in grade five the pupils enjoy singing two-part music, and the pupils of grade six have the accompaniment of the piano in their singing. Seasonable rote songs are taught in the primary grades.

Our work in the high school has two objectives. During the first part of the year, we sing many hymns and folk songs in order to give pupils a wide practice in sight reading. Our second purpose is to prepare a program of music for graduation. At the close of

each lesson an instrumental number is given either by some talented pupils, or by the supervisor.

High school pupils, under the efficient direction of Mr. and Mrs. Charles S. Lloyd, are rehearsing the *Gypsy Rover*, a tuneful and pleasing operetta, for an early performance.

Two musical recitals are given each season in our splendid assembly hall by the primary and intermediate grades,—one at Thanksgiving, and the other at Easter. These recitals, which include both vocal and instrumental music, stimulate interest in musical study, contribute to the school spirit, give pupils a knowledge of stage deportment, and enable them to appear before an audience with ease and gracefulness.

The school orchestra offers an opportunity for those who are studying instruments to gain experience in sight reading. The orchestra practices waltzes and marches, because such music has a marked rhythm and helps pupils to form the habit of accenting when they play orchestral music, but we do not devote all our time to dance music. We have practiced one of the easier Haydn symphonies and some other music of the better grade.

New students of the violin and the violoncello, who, under normal conditions might be expected to come forward for instruction on these instruments, have not appeared. If replacement pupils are not found, as others graduate, our orchestra will be weakened in the near future. Undoubtedly there are talented pupils who would like to study, if instruments and lessons could be provided. Possibly some public-spirited citizen, or organization, would like to embrace

this opportunity to assist some worthy children to begin a musical education. The cost would be small.

May I make the request, in connection with the high school graduation, that the procedure of former years, of having the pupils stand in massed formation, be continued? Without this aid to our music, I fear I shall be unable to maintain the high standard which you have a right to expect.

Music is one of the fine arts which tends to make life holy, pure and beautiful. May I express the hope that the time will come when a radio will be installed in the Henry T. Wing School, so that the discipline of listening to the best music will become available to all pupils?

Please permit me to thank you, and through you the School Committee and the teachers for the splendid coöperation which has contributed so much to our music.

Yours very respectfully,

ERNST MAKECHNIE,

Supervisor of Music.

December 30, 1933.

Report of School Physician

To the Superintendent of Schools:

All new pupils and those who had previously shown physical defects were examined in June. The following defects were found and 46 notices sent to parents. 39 pupils were found to have enlarged tonsils. 7 pupils were found to have slight remedial conditions. No heart disturbances were found. The three "suspicious T. B." cases have all made marked improvement in their weights and general condition. In September 19 pupils were found to have defective vision and 7 defective hearing. 7 pupils were found to be 20% or more overweight and 35% were 10% underweight. Many of these defects have been corrected as the nurse's report on another page will show.

In the first part of the year 31 pupils suffered from chicken pox and twelve school children had scarlet fever. Since the beginning of the school in September none of the commonly called "contagious" diseases have entered the school.

Town Clerk's Report

BIRTHS

Recorded during the year ending December 31, 1934.

Feb. 8, 1934. James Clayton Burke, son to Harold L. Liberty and Bertha M. (DeLong).

Feb. 25, 1934. John Henry Liberty, son to John Theodore Liberty and Olga Veronica (Alvezi).

March 21, 1934. (Stillborn) Pierce, son to John L. Pierce and Beatrice Florine (Audlee).

April 3, 1934. Bernard Newton Rhuda, daughter to Bernard N. Rhuda and Flora (Galvav).

April 7, 1934. John Peter Stenroos, son to Viljo J. Stenroos and Jennie L. (Elvander).

May 15, 1934. Robert Morton Andrews Jr., son to Robert M. Andrews and Almeda Peterson (Gibbs).

Aug. 3, 1934. Albert George Provost Jr., son to Albert G. Provost and Dorothy Howland (Peters).

Aug. 16, 1934. Nestor George Silva, son to Francis J. Silva and Theodora R. (Silva).

Sept. 21, 1934. Donald Edward Ellis, son to Edward M. Ellis and Mary G. (Morris).

Sept. 23, 1934. Louise Amelia Elvander, daughter of Edward Elvander and Marjorie (Decker).

Oct. 13, 1934. Donald Edward Pipatti, son to Onni A. Pipatti and Adaline Belle (Crowell).

Nov. 3, 1934. Joseph John Milliken 3rd, son to Joseph J. Milliken and Abbie M. (Walsh).

Dec. 6, 1934. Janet Elizabeth Bazzinotti, daughter of Walter A. Bazzinotti and Elizabeth N. (Gosling).

Dec. 25, 1934. Virginia Joy Balboni, daughter to Albert Balboni and Edith W. (Barrus).

DELAYED RETURNS

July 30, 1930. Elaine Crandall Thomas, daughter to Ronald C. Thomas and Delina Crandall (Fish).

Aug. 30, 1930. John Lester Weaver, son to Kenneth H. Weaver and Zella Clifton (Fish).

MARRIAGES

Recorded during the year ending December 31, 1934.

Jan. 11, 1934. Joseph G. Francis of Sandwich and Florence B. Keller of Sandwich.

Jan. 13, 1934. Paul Burns Sylver of Brewster, Mass., and Louisa S. Peters of Sandwich, Mass.

Feb. 3, 1934. William E. Lane of Bourne and Hilda A. Perkins of Bourne.

Feb. 22, 1934. Walter A. Newcomb of Sandwich and Ruth T. Estes of Sandwich.

- June 13, 1934. Henry M. Burke of Sandwich and Pauline E. Edgington of Wheaton, Illinois.
- June 16, 1934. Norman Sidney Spofford of Barnstable and Bertha Madeline Armitage of Bourne.
- June 30, 1934. James M. Wilson of Brooklyn, New York, and Catherine M. Barry of Pawtucket, R. I.
- July 3, 1934. Floyd H. Lewis of Sandwich and Florence V. Brady of Sandwich.
- July 7, 1934. Edward M. Ellis of Sandwich and Mary G. Morris of Bourne.
- July 7, 1934. Albert Balboni of Sandwich and Edyth N. Barrus of Barnstable.
- July 12, 1934. Harold L. Mann of Sandwich and Frances B. Hamblin.
- Aug. 4, 1934. Maynard J. Hanscom of Sandwich and Ada Adams of Sandwich.
- Aug. 16, 1934. Edgar E. Caron of Sandwich and Anna L. Thomas of Barnstable.
- Aug. 20, 1934. Clarence R. VanBuskirk of Sandwich and Octavia Louise Hoxie of Sandwich.
- Sept. 1, 1934. Frank M. Jefferson of South Middleboro and Alzara E. Bacon of Sandwich.
- Sept. 16, 1934. Richard I. Crocker of Sandwich and Margaret E. Billard of Onset, Mass.
- Sept. 20, 1934. Walter M. Krook of Barnstable and Viano V. Perttinen of Sandwich.
- Sept. 22, 1934. Mario A. Linci of Bourne and Cesira Macoratti of Bourne.

Oct. 6, 1934. John Alden Coe of Sandwich and Winnifred Beatrice MacKinnon of Providence, R. I.

Oct. 15, 1934. Albert J. Govoni of Sandwich and Mary T. Cheadle of New Bedford, Mass.

Nov. 18, 1934. Ronald MacDonald of Sandwich and Winifred May Morris of Sandwich.

Nov. 19, 1934. Edson Beattie of Central Falls, R. I., and Estelle L. Tremblay of Woonsocket, R. I.

Nov. 28, 1934. Edward T. Eldridge of Bourne and Cora E. Gibbs of Sandwich.

Sandwich Free Public Library

Librarian's Annual Report

This is the forty-fourth annual report of the Public Library.

Once again we may say, "This has been a busy year." During the winter months the library was well patronized, with splendid circulation of books, young people filling and enjoying the reading room, and much reference work being done by the school pupils. We were a busy earnest group of people. Beginning with April it was our greatest regret that these young people were then able to use the library but one evening a week, but that one evening was well used.

The circulation for the year was 18,070—fiction, 13,744, and non-fiction 4,326. For the past nine months while open half time, the circulation averaged only 94 volumes less a week than in the same period in 1933. If we exclude July and August, it was 70 volumes less. During those two months, usually two of the heaviest of the year, the circulation dropped from 4,200 in 1933, to 2,763 in 1934. Those using the library have complained generally at the restricted opportunity to get books, but our summer residents who have considered the library privileges one of the greatest assets of the town, expressed much dissatisfaction, and this drop in circulation showed in the summer's work.

The purchase of new books has had to be restricted to the income designated for books only. Of the 210 books catalogued, 145 were purchased, and 65 were from books donated by interested friends. A list of the donors of books follows:

Rev. S. M. Beale, Mrs. Frank Courtis, Alton Gibbs, Mrs. Hadsell, Mrs. Philip Harvey, Miss Grace W. Irwin, Mr. Eugene Klapp, Mr. Dodge Macknight, Mrs. Mary Morrow, Miss Abbie F. Nye, Avis Purdy, Mrs. Willard Reed, Sandwich Woman's Club, Rev. J. M. Trout, Mr. Frederic Tudor, Mrs. Myron W. Whitney, Mr. Asa Wing, and several publishers.

Our magazines are increasing in circulation. They reached 1,597 the past year, and about 50 percent of them are taken by the young people. It seems well to mention those purchased for the reading room:

National Geographic, Harper's, Scribner's, Good Housekeeping, Woman's Home Companion, Pan-American Bulletin, Nature, Birdlore, Scientific American, Hygeia, Literary Digest, St. Nicholas, American Boy, Boys' Life, Open Road, Popular Mechanics, Popular Science, Ladies' Home Journal, and Child Life. These are supplemented by gifts of several others, which are donated by the following friends:

Mrs. Lincoln Crowell, Mrs. Henry A. Dunbar, Mr. D. Macknight, Miss Martha Newcomb, the late Mrs. J. L. Newton, Miss L. L. Newton, Mrs. W. H. Whitney, Mrs. E. T. Wright, and various publishers.

The pride that our children and young people take in our library and the acquaintance they have with the shelves, is most gratifying. The use of the State Certificate Reading and the interest in Certificates obtained

creates a desirable atmosphere about the younger readers, and an early acquaintance with good reading.

The adult readers at the same time are getting a great benefit from the possibility (for only the postage involved) of obtaining through the Inter-Library Loan System the privilege of securing nearly any non-fiction work desired, books not to be found on our shelves. This is an admirable arrangement for help of small libraries and a favor in which even we occasionally are able to reciprocate.

All librarians naturally desire the public to have full benefit of what the library has to offer, and in this emergency when the library had to be closed half the time usually open, your librarians have done their utmost to do that as far as possible for those using the library.

The work needing to be done really did not vary from the work of any year. The intensive work during open hours was harder than when open normally. The repairing of books has been a greater problem than ever, because with limited purchases of new books there is a constantly increasing wear upon the older ones. With no rebinding done, it meant much time spent in repair of badly worn books that they might be kept in circulation.

There is reason to be grateful to many through the year, and the librarian wishes to express to the Board of Trustees, and to all friends, appreciation for assistance in any way.

Respectfully submitted,

ELIZABETH L. BURBANK,
Librarian.

Nurse's Report for the Year 1934

It seems almost like repetition to submit this report year after year until I remember there are no two days alike in any one year; surely there can not be any two years alike in the twelve I have been privileged to serve this community.

PRE-SCHOOL

For the first time we have had the children of kindergarten age in the school building. This was made possible by the F. E. R. A. which placed Miss Elizabeth Austin in charge of this group for the morning hours. Without daily health supervision from a school nurse or other, these classes could not be formed. This class gave the nurse much extra work but it really was a joy to have these happy little folks in the building and a real pleasure to be associated with Miss Austin.

Twenty children were enrolled. Of this group, all were vaccinated; sixteen had had Toxin Anti-Toxin; fourteen had their dental work done; four have had tonsils removed. Only five of this group had measles. These all contracted them from older children in the home and none of them passed on this disease to other members of the group. These children all learned to

put on and take off their outer wraps unassisted; play and work successfully with other children and care for themselves generally away from their accustomed environment. In the early part of this school year another class was organized with five members of the first class who were not old enough to enter school and five younger children. Later this class was discontinued but at the time of writing this report it has been reorganized with Miss Mary Morrow as instructor. These little people have a rest period and a morning lunch as part of the day's program. The lunch is paid for by the children and the Woman's Club.

BABY WELFARE

All children under school age were visited during the last three months of the year. Many of these were visited repeatedly during the earlier months. A total of 127 visits were made to this age group. Four of these little folks have been to a dentist and others are looking forward to having their teeth taken care of soon. One child with an orthopedic defect has been under treatment. Other than these, there are no known remediable defects. Of the seventy children in this age group, twenty-one have had measles, five have had whooping cough and one had diphtheria during the year.

SCHOOL NURSING

During the past seven years the birth-rate in Sandwich has decreased about 50 percent from preceding years. However, the school population remains about

the same. This means half of the children entering school are coming from other communities where there is less health supervision. This necessarily increases our work in the school. One hundred and fifty-three visits were made to the school building and three hundred and nine to homes of school children.

With the exception of three pupils who were 10% or more underweight, our eighth grade entered High School with all physical defects corrected.

Thirty-five pupils in the lower six grades entered school 10% or more underweight. In 1926 I reported 86. In 1929 I reported 45. It would seem the depression is not increasing this number but in spite of it we are making some headway to overcome this condition. All children from kindergarten up to and including grade eight are weighed each month and their weight sent home on their report cards. Everyone is interested in these monthly gains especially the children themselves. It seems quite vital to them. As in former years, the Woman's Club provides milk for the children in the lower grades who are unable to maintain a reasonable weight for their height and age.

The children have had their dental work done although most families are living on a much reduced income. Last year there was a decrease in the number of children who had all their work completed but this year we have gained back practically all of that loss. In the lower six grades 89 pupils had their work completed and 70 in the upper six grades making a total of 159. 1932 I reported 163. Besides these, 20 children have commenced their work but as yet it is unfinished.

The Audiometer owned by the Barnstable Public Health Association was used to test the hearing of all pupils from the third grade up through High School. Twenty-four pupils were unable to take this test satisfactorily. This may have been either from loss of hearing or their inability to write down what they did hear. During the year we hope to have some if not all of these cases examined more carefully or by other methods to determine just why they were unable to make a better record. Pupils above the third grade should be able to take this test satisfactorily unless their hearing is impaired.

In October the Chadwick Clinic or the State Tuberculosis Clinic tested the children in Sandwich for tuberculosis infection. The Counties are taking over this work and due to lack of funds and personnel, only the upper grades are to be tested. A two year period will be necessary to complete this group. Eighty-one pupils were tested and no new "suspicious" cases were found. All "contact" pupils will be retested and those not taken care of this year will be next.

From April until the close of school in June measles were prevalent. Again it was demonstrated that the exposures were outside the school building. It has long been known that for two or three days before a child will give measles to another he will have an irregular temperature and if isolation can be kept from then on, other children will not be exposed. This we endeavored to do. Never have we had the interest and co-operation of children, parents and teachers in any undertaking as we did in this in the lower grades with but few exceptions. However, the High School is less easily supervised and soon the Grades were re-infected from the

High School. This would have been true had the two groups been in separate buildings for they were largely home contacts. 112 pupils suffered from this disease.

Since school began in September we have had one case of chicken pox. A few children have had common colds and a few impetigo and three pediculosis but this infection is no longer a problem in our school.

in 1927, 1929 and 1931 free Toxin Anti-Toxin clinics were held when all children were given these preventative doses. Since 1927 we have had only two cases of diphtheria and these were both children who had come to Sandwich from a nearby town unprotected. Although our own children were exposed to these cases, no one contracted the disease. Previous to 1927 each year we had from one to six cases. No one in Sandwich can question the effectiveness of these measures. Now that it has been demonstrated that Toxin Anti-Toxin does immunize it seems best to leave the responsibility of having the children protected to the parents, feeling sure that no thinking parent will neglect to have his child protected as early as his first birthday.

MATERNITY NURSING

As fewer children are born in Sandwich and more mothers go to hospitals, this part of our work is necessarily less. One delivery was attended during the year; 14 visits to the mothers and 18 to the new born. Thirty prenatal visits were made.

A total of 254 nursing visits were made during the year. Of these 35 were Sunday or night calls. My ability to answer emergency calls has increased during the year to a marked degree largely on account of having the telephone and door bell answered when I am away from the house.

The out of town trips are as follows:

Boston	43
Hyannis	6
Pondville (Wrentham)	5
Sagamore	9
Plymouth	1
Bourne	1
Pocasset	3
New Bedford	1

(These were all for patients)

I was Secretary of the Cape Cod Public Health Nurses' Club and to attend these meetings and other conferences I made one trip each to the following towns: Chatham, Wellfleet, Harwichport, Dennis, Yarmouthport and four trips to Hyannis.

SOCIAL SERVICE

Last year in my annual report I mentioned the fact that it seemed necessary for us to co-ordinate the public and private relief. We have continued to aid both organizations and individuals in this work. I cannot report

on this in detail. It is enough to say that both organizations and individuals have entrusted us with the distribution of worn and new garments as well as some money to be used at my discretion for needy families. I question my own judgment as to the dispensing of this relief but as it was entrusted to me, I did my best to dispense according to the needs and the wishes of the donors.

In closing my report I wish to thank those of my own organization who have made these results possible and all others who have given encouragement and aided in any way. Especially do I appreciate the co-operation of the Welfare Board. During my years of service in Sandwich this board, whoever were acting in that capacity, have had sympathetic understanding of the individuals or families I have brought to their attention.

Respectfully submitted,

EVA L. WESTOVER

W. C. BARTLEY, Secretary.

Superintendent's Report

To the Citizens of the Town of Sandwich:

Although approximately one half of the cities and towns of the state have returned to their previous levels of teachers' salaries, the school department of Sandwich has included no item for a similar procedure. This is not because they believe in the present schedule for, as has been shown in the past, this schedule is extremely low. It is, rather, due to the fact that the school department believes that the teachers are willing to forego the restoration until such time as economic conditions are definitely improved.

The school budget necessary for the year 1935 is \$1350 more than the amount expended in 1934. An examination of the several items that make up the budget will show that every item is practically the same as in 1934, with the exception of that for new equipment and for transportation. The increases for these two items are unavoidable.

That for new equipment is for the sole purpose of the purchase of new typewriters. The typewriters in the high school are the same ones that the school owned when the high school was on the hill some eight years ago. The average life of school typewriters is from four to five years, whereas our commercial department has managed to get along with their typewriters for eight years. Repairs on the typewriters for the past year were

very high and it is only good business to replace them now, as the upkeep is far too great.

When considering the transportation item of the budget, a number of things had to be taken into account. First, the school department has received notice that our present busses are in such condition that they will have to be replaced. In fact, we are fortunate that we are permitted to use them for this school year. A phase of the transportation situation in Sandwich that cannot be ignored any further is the matter of furnishing transportation for the children who live near the Sagamore line, on both the old Route 28 and Tupper Road. The people there have been before the school committee a number of times and the committee have, in the past, suggested that the petitioners include an article in the warrant for such transportation. This year, the committee believe that it is their duty to include it in our school budget. Some of these children live more than the legal distance necessary for compulsory transportation and a number of others live more than a mile and a half from the school. Considering the fact that both of these roads have considerable traffic and that there are no sidewalks, it does seem only prudent to take these children off the road.

These two items will necessitate expenditure for transportation of approximately \$3,550, and the figure was determined as follows: One hundred and six days of transportation at our present low rate with the present school busses; an estimate of \$25.00 per day for seventy-four days in the fall term, with new busses; and an estimate of two dollars per day for sixty-eight days, from March 5 to June 14, for an extension of the bus route to include a circuit of the old road to Sagamore, returning via Tupper Road to the school.

PERSONNEL

For a number of years, Sandwich was particularly fortunate in being able to retain the teachers of the elementary grades. The first break came in 1932 when Mr. James Tangney, the principal for a great many years, retired. In June of this year, Miss Martha Newcomb, teacher of the second grade, retired, and in November Mrs. Lillian Tangney, teacher of the fourth grade, also retired. This trio of teachers gave a lifetime of devoted service as instructors to the youth of Sandwich. Every child who came in contact with them was influenced for good and there are in Sandwich fathers, mothers and children, all of whom came under the splendid guidance of these outstanding individuals.

Of course, it has been impossible to replace them with people of such broad experience, but we believe the town has been fortunate in securing teachers who will develop into the same sort of superior teachers. Mr. Charles Sawyer needs no word of comment, as he has proven his worth in the last three years of service. Mrs. Florence Snow succeeds Miss Newcomb in the second grade and she brings to the classroom a rich experience as a teacher, as well as recent study of the newer procedures. For the fourth grade we secured Miss Irene Roberti, a Sandwich girl who graduated from the four year course at Bridgewater State Teachers' College in 1932, and who has had two years' experience as a training teacher in the schools of Bourne and Sandwich. We believe she will prove a worthy successor to Mrs. Tangney.

Besides the changes in the elementary school staff in the past year there have been a number of changes in the high school corps. Miss Anna Lobacz, a graduate

of Boston University, succeeds Miss Lorraine Langley, and Mr. Norman Whitten, a Bates College graduate, takes the place made vacant by the resignation of Herbert Hall. Both of these teachers are doing well. A vacancy also occurred because of the resignation of Clare G. Persons, Principal of Sandwich high school. After careful consideration of a number of candidates, the committee elected Mr. Frank Games, former principal of Wellfleet high school, to the position and we are pleased to report that he is living up to the fine things expected of him. We believe his leadership and the splendid faculty will make the Henry T. Wing School of Sandwich one of the outstanding small high schools of the state.

CAFETERIA

The school cafeteria has been a serious problem for the past five or six years and it has been with great difficulty that it has been maintained. Most small schools find it impossible to run a cafeteria without some financial assistance. From 1929 to April, 1934, the cafeteria ran behind approximately \$300, at the rate of about \$60 per year, a matter of only \$1.50 a week. Since April, the cafeteria has been run separate from the school department, the manager purchasing all supplies, taking all the receipts and paying all bills. The school authorities have only seen to it that the quantity and quality of food served was equal to that served when the cafeteria was under school management. We are pleased to report that the cafeteria is still in operation and that the manager is serving wholesome food in sufficient quantity at a reasonable price.

Another matter concerning the cafeteria that is particularly pleasing is the fact that the debt spoken about

above has, through the energetic efforts of the principal and his assistants, been reduced to a single item of \$150. This, indeed is large, and there are some who believe with some justification that this debt does not concern the present school enrolment. However, since the cafeteria was run as a school activity, it seems to us only right that we should assume, as a school, the bills incurred. A continuance of the fine cooperation of the townspeople in this matter will enable the school to face all creditors with a clear conscience.

AUDITORIUM

Ever since the Henry T. Wing School was built in 1928 there has been considerable discussion and confusion in regard to the use of the auditorium by various organizations in town. The committee have considered this matter and last summer modified their regulations to make the auditorium more readily available for community use. It would seem wise to again print the copy of these regulations. They are as follows:

“All requests for the use of the auditorium must be presented in writing to the superintendent of schools in time for action at their regular monthly meeting.

“A fee of ten dollars per evening, during that part of the year when the auditorium is heated, and eight dollars per evening when heat is not required, shall be charged for the use of the auditorium.

“This fee includes the use of the auditorium for one dress rehearsal. All other rehearsals shall be at the rate of \$4.00 per rehearsal.

“The organization hiring the auditorium shall pay the janitor \$3.00 for each entertainment and \$1.00 for each rehearsal.

"The Sandwich Health Association, Inc., as it is now organized, The American Legion and The American Legion Auxiliary shall be exempt from payment of fees for the use of the auditorium."

This increased use has necessitated a slight increase in the budget for fuel and electric power. However, the town will receive the fees for the use of the hall and this amount will offset the expenditures.

CURRICULUM REVISION

For a number of years we have spoken about revising the curriculum with a view in mind of offering a program for the non-academic pupil. We are pleased to report that we have made considerable progress toward this objective. One of the main devices by which we are enabled to do this is that of making our school organization in accordance with the six-six plan, i. e., an elementary school of six grades and a senior high school of six years. The present principal made some adjustments this year and next year would take full advantage of this type of organization.

Our six year high school consists of 120 pupils with a personnel of six teachers and a principal, thus giving ample instructors for an enriched curriculum. Changes that we propose will be substantially in accordance with the recommendations of the Mass. Department of Education sub-committee on curriculum revision of the small Massachusetts high school. We do not intend to go quite so far as that committee in the elimination of so-called college preparatory subjects, for although the Sandwich high school is very small, we do have a relatively large number who go from our high school to other schools for higher education. This may readily be seen

from the fact that there are now in Sandwich high school 70 pupils and 25 Sandwich graduates in higher institutions of learning. We shall continue to have a college preparatory course, but we plan to improve our curriculum by making a better provision for those pupils who do not plan to go to college. This will be accomplished for the present through a better coordinated business course and a new so-called social civics course. This latter course will recognize that the pupils who select this course will have no bent for college training but rather an intense interest to become more efficient and intelligent citizens. This course will stress general skills and subjects concerned with citizenship, such as: history, civics, sociology, economics, general science, general mathematics and the like.

Although the program outlined above does something, I again call the attention of the citizens to the advisability of having a domestic science course for the girls and some sort of general shop work for the boys. We have urged this for a number of years, but the depression seems to prevent our accomplishing much in this line.

In closing, we want to assure the citizens that, although there have been a number of changes, our schools are still on a high level. We realize that this has only been made possible through the self-sacrificing cooperation of the large majority of the citizens of Sandwich.

Respectfully submitted,

JAMES F. PEEBLES,

Superintendent.

Articles by the Faculty

FROM THE PRINCIPAL

Superintendent, School Committee and Citizens of Sandwich:

May I submit for your pleasure my first report as Principal of the Henry T. Wing School.

This year we find our school entering an era which places increased responsibility on us as teachers. We must inculcate into our students the ability to cope with a changed society. To adhere to the objectives of pedagogy which existed a quarter of a century ago would be like asking the citizens of Sandwich to return to candle light. Today we have over 90 percent of boys and girls of high school age in school. Contrast this with the fact that only 8 percent of our youth was in school attendance in 1890. From this, you can easily see the momentous problem facing educators today. We must cope with the individual abilities and capacities of students if we are to keep abreast of the times. Many feel the answer to the whole problem lies in occupational training; but as we consider the vast number of trades which have been supplanted by machines, we see that the study of a single trade is not a dependable goal. We need to engender the attitudes which will enable our youth to meet unusual or novel situations. Man must

gradually learn to harness machinery or his social order is in jeopardy of being enslaved. Our students need guidance, understanding, companionship, together with a courage and conviction in the future.

We do not know what commodities will be considered valuable assets tomorrow; but, we do know the outcomes of education will lead to the individual's adjustment in society thus overcoming economic barriers. It is also our high purpose to nurture and cultivate the ideals which gave birth to this land of ours. This sense of appreciation for the finer things of life will do much to acclimate the citizen of tomorrow in the leisure which will grow out of the chaotic industrial conditions of today. Now, let us consider briefly what our school has done to further these aims which have been set forth.

First, we are conducting weekly assemblies to offer an approach for our students in preparation for future life. This is first accomplished through the cooperation of prominent people in acquainting the pupils with problems which they may meet when they leave school. Then through the student programs, self expression is manifest.

In recent years, surveys by both the state and nation have shown that curriculum revision is necessary. Mr. Frank W. Wright, Deputy Commissioner of Education, stated in a recent address to the Principals' Association of Massachusetts that if changes are not made by the respective towns and cities, laws will be passed altering the courses in many of our schools. We are planning on offering broader curricula for the boys and girls of our school. One curriculum will be maintained to meet college requirements; another will prepare the student for office or clerical demands; also, a social civic course

which will aid intrinsically in preparing the students for intelligent citizenship. The reorganized course of study will be sent home to the parents some time the latter part of the year. In addition to academic subjects, a 4-H Club for the promotion of manual arts could be established for the nominal sum of \$150. As a part of our curriculum, another organization might be started for girls, to acquaint them with sewing. It is planned to make a survey this spring to ascertain the expediency of such a move.

We are enlarging the field of extra-curricular activities to offer a new freedom of expression as well as to develop a better school spirit. Our first enterprise was a magazine selling contest. The fruits of labor were evidenced in breaking the previous record of the school. Following this, a Hallowe'en dance was held and prizes were awarded for some of the costumes. Next, a Musical Minstrel Review was presented; moreover, the proceeds enabled the school to meet the liabilities of the cafeteria incurred in former years. Mr. Adolfo Querze is planning a concert later in the year to aid in the purchase of a string bass. The pupils are to be commended on their efforts in the various phases of school activity as well as the citizens for their loyal support.

In athletics, a fall program was carried on by Mr. Whitten and Miss Lobacz. Cross country was offered for the boys while volley ball gave the girls an outlet for their energy. Mr. Whitten has organized a rifle club which shoots weekly in the basement of the school. The basketball teams look very promising at this time, especially the girls'. After the games, closely supervised dances are being held to increase the social opportunities for the students. One need is noted and that is for play ground equipment for the elementary grades.

Our school bank is run on the same principle as a savings bank in a city. Interest is paid on all deposits over one dollar. Any parents desirous of a copy of the rules may obtain one through the request of the student.

During one of the spring months, it is planned to conduct a guidance program through the distribution of self analysis blanks. These blanks will serve as an instrument in determining the social, academic, and mechanical interest of the child. Already intelligence tests have been given and the students better classified. Then through the use of capacity charts, individual progress has been noted. The aim of this work is remedial as well as instructive.

Weekly meetings for the grade and high school teachers have been held this year in an attempt to ascertain how to meet present day conditions more fully. This problem study seems a decided step towards professional improvement. Many pertinent topics have been discussed relevant to improving instructional procedure.

In closing this report, I wish to express my appreciation to the Superintendent for his guiding influence, to the teachers for their cooperation and loyalty, to the School Committee for its support, as well as the help of public spirited citizens of Sandwich.

Respectfully submitted,

FRANK GAMES,

Principal.

FROM THE SUPERVISOR OF MUSIC

Mr. James Fernald Peebles
Superintendent of Schools
Sandwich, Mass.

Dear Mr. Peebles:

I have the honor to submit my annual report.

Our work in singing has the following objectives:—
Accuracy of intonation, correct use of the child voice with deep breathing, skill in sight reading, attention to time, rhythm and accent, the teaching of theory, care in diction, the giving of a repertoire of beautiful rote songs, and arousing the interest of pupils in their music.

Each lesson in the lower grades is begun with the following physical exercise. The pupils are asked to stand; raise their arms; take deep, full breaths; rise on their toes; reach and stretch their arms; and they are required to repeat the exercise three times. They are reminded, while singing, to take deep breaths, and to have care about the position of their lips in order to obtain a beautiful quality of tone. A good posture, both in sitting and in standing, is required.

A new thing that I can report is the use of the time-names of Galen. Tests in sight reading show that pupils are not always sure of themselves in this detail of their work. Difficulties of the divided beat are not always met with the assurance and precision that you have a right to expect. These problems are in effect simple examples in fractions, yet pupils who have followed the prescribed course in arithmetic do not seem able always

to carry their knowledge of this subject over into music. The beating of the finger on the cover of the book, and mental counting, have not been enough. The French time-names give pupils something to intone in perfect synchronization with the numerous variations met in difficulties of time, and they permit a separation of these problems from those of pitch. The time-names are euphonious, and will be of value both in diction and in voice culture.

Two recitals are given each year in the Assembly Hall for the pupils of the lower grades, who take turns in contributing solo and ensemble numbers to the programs. The last recital, which occurred just before the Christmas vacation, was opened by the school orchestra, followed with action songs by grade one and the rhythmic band of grade two. Principal Games gave a vocal number, and Mr. Sawyer accompanied a violin solo. These recitals are a means of acquainting pupils with a knowledge of stage deportment.

The tuneful operetta, the Gypsy Rover, was given successfully early in the year under the efficient direction of Mrs. Charles S. Lloyd, and there have been two minstrel shows by the high school, the last one having been coached by Principal Games.

The use of the double bass has been donated to our school, and two boys have come forward for instruction. When they have become proficient they will be important additions to our school orchestras. There are no violin pupils to take the place of those who have graduated, or who will graduate in the near future, but several pupils are learning the violoncello.

Our upright piano does not have quite enough volume of tone for a large hall, nor for the high school

chorus of approximately one hundred voices. If a larger piano could be purchased, the present instrument could be used down stairs for the kindergarten and in the same room for the rehearsals of the school orchestra, or it could be placed upstairs for use in accompanying singing in connection with the devotional exercises at the opening sessions of the high school. Daily singing, in addition to the weekly rehearsals, would be of great help in improving the high school music.

May I make one recommendation? Namely, that the length of time given to the daily practice of singing in the lower grades be increased five minutes. My reasons for making this recommendation are as follows: (1) Young children dearly love to sing. (2) Vocal music is, in part, a physical exercise. (3) Music is an exacting intellectual study which requires strict attention, concentration and alertness. (4) It includes practice in language-reading. (5) Its voice culture improves the voice of speech. (6) It gives practice in coordination and in cooperation. (7) The time is needed in order to accomplish the results for which we are aiming in sight reading. (8) The beautiful art of music, aside from the sacred words which are frequently sung with it, is, perhaps, our most potent means of spiritual discipline.

In closing, I wish to thank you, and through you the teachers and the School Committee for the splendid cooperation which has been given in the work of this department.

Yours very respectfully,

ERNST MAKECHNIE

December 31, 1934.

REPORT OF INSTRUMENTAL MUSIC DIRECTOR

Mr. Peebles:

A few years ago a group of ambitious young school boys and girls of Sandwich, through the interest of their parents, decided to study music. It was a great privilege for me to have been chosen their instructor and in 1928 we started practicing together once a week at the Parish Hall in Sandwich.

The first concert given at the Henry T. Wing School in the fall of the same year, for the Barnstable County Teachers' Association convention, marked the starting point of remarkable success. In 1929 a similar group from the Bourne high and Bourne grammar school was combined with the Sandwich group. As an honor to the Shawme Teachers' Club the members of the orchestra chose the name Shawme for the school orchestra.

Since then there has been demonstrated the supreme importance of music in the lives of the young boys and girls in school, and the answer has been found to the eternal question about the musical talent of the American child.

The success obtained by the Shawme School Orchestra has been shown by all the concerts, contests and broadcasts over Station WEEL. At the State Orchestra Contest held in Norwood on May 21, 1932, the Shawme Orchestra won first prize in Class C. At the State and New England Music Festivals in 1933 and 1934 the orchestra was also rated "superior". Here is the comment made of the Shawme Orchestra at Hampton Beach, New Hampshire, on June 1 and 2, 1934: "Fine spirit,—pleasing

devotion to work,—a most pleasing performance,—musicianly effects abound,—good balance of tone, with few exceptions; splendid general impression!" Honor rating was Number One, Highly Superior.

All this has been accomplished through the splendid cooperation of the parents, the dignified discipline and interest of the students, and the incomparable energetic incentive, help and suggestions of the Superintendent of Schools, Mr. Peebles.

To secure the continuation of this kind of work, the instrumental music in the public schools like all the other subjects, needs to be supported, especially from a financial standpoint. Because a fee is required to join the classes, there are talented pupils who are being deprived of instruction under the present system, as they are unable to pay for it. Credit is now given for participation in instrumental music study and all other towns of the Cape support a salaried instrumental music instructor.

The hope of music today lies in the successful teaching of it to the children in elementary and secondary schools throughout the country. Today there are in high schools of the United States more than six thousand full symphony orchestras with all the instruments represented. There are thousands more with only a few instruments represented. A public is growing up who will not only go to hear, but who will also like to play. In the future a large proportion of the American people will be as skilled in music appreciation and playing as they are now in reading and writing.

Respectfully submitted,

Adolfo Querze, Music Director.

REPORT OF SUPERVISOR OF ART

Mr. Peebles:

For the year 1934-35 the work of the first eight grades has conformed to the general pattern of other years. Color, color harmony and nature study come in the early fall; then design and figure drawing. Holiday work breaks the program and gives the pupil a chance to put art principles to practical use.

Project work related to geography or history takes place in the winter term. Throughout the year all pupils study famous paintings and the lives of the painters. Interesting crafts taught in 1934 were the making of masks from a clay mould and drawing with crayons on cotton cloth or silk. Some very creditable wall hangings were made by the eighth grade. They were exhibited in May at the school.

During the present school year the grades have worked on a larger scale than before. Wrapping paper and water colors are the mediums used. Usually these large pictures are class creations with each pupil working on a small part, but some ambitious pupils have painted large pictures alone.

In September, 1934, twenty high school pupils enrolled for the elective course of one forty-five minute period a week. The class has diminished somewhat, due to conflicting subjects. This course is designed to give each pupil work of especial interest. Drawing from objects with charcoal and pastels, advanced design, costume design and poster work are subjects chosen. Individual work is practical with this class as the ages vary

and the group is small. Two talented pupils of the seventh and eighth grades take this high school course. The formation of this group is a definite advanced step in art education.

Respectfully submitted,

Edith Savary Hall.

Commencement Exercises

CLASS OF 1934

Overture,	School Orchestra
Processional	
Pilgrims' Chorus (Wagner)	Chorus
Invocation	Rev. Sumner J. Brown
Class History	Stephen Aloysius Days, Jr.
Sylvia (Speaks)	Chorus
Essay, "The Epic of Rome"	Elizabeth A. Crowell

Town Auditors' Report

The undersigned, Auditors of the Town of Sandwich, have examined the accounts of the Treasurer of the Town, Frank L. Howland, and the accounts of the Trustees of the Weston Memorial Fund, and find them correct and properly vouched.

J. FOXCROFT CARLETON,
JAMES L. GOVONI,
ALANSON W. PARKES.

Librarian's Annual Report

Herewith is submitted the forty-fifth annual report of the Public Library.

May I report first of all that much appreciation has been expressed by the patrons of the library that they have had the convenience of full time privileges during the past year.

The Sandwich Library has long been recognized as one of the town's principal assets. Its many-sided importance to our community is realized more each year, as a means of giving both pleasure and benefit to all, through its facilities for reading; the many advantages of our young people, who frequent it so freely in ways pleasurable, beneficial and educative; and, also, to the increasing number of appreciative summer people who are patronizing it each season.

That the public have been reading is shown in the record of circulation. About 800 borrowers' cards are in use. This includes the new or temporary cards issued during the year. The total circulation of books and magazines was 21,035. Of this amount 15,767 were of fiction, and 3768 or 17.9% of whole, were of non-fiction material. The number of magazines circulated amounted to 2432, of which 1500 were non-fiction. This increase of 835 magazines over the number circulated in 1934, shows decidedly an added interest in use of the magazines available.

The excellency of the assortment is shown by the list given below.

Those purchased include Harper's, Scribner's, National Geographic, Pan-American Bulletin, Literary Digest, Hygeia, Good Housekeeping, Nature, Scientific American, Time, Birdlore, St. Nicholas, Woman's Home Companion, Ladies' Home Journal, American Boy, Open Road, Boys' Life, Popular Science, Popular Mechanics and Child Life.

This list is supplemented by the liberal gift of interested friends, by the following: American, Atlantic, McCall's, Reader's Digest, Travel, Horticulture, Kiwanis, London Illustrated News, Asia, National Republic, New England Poultrymen, Specialty Salesman, American Issue, and Dumb Animals. These were presented by Mrs. H. A. Dunbar, Mrs. Lincoln Crowell, Mr. C. O. Dexter, Mr. Dodge Macknight, Mrs. W. H. Whitney and Mrs. E. T. Wright, an unknown friend and several publishers.

The books catalogued, during 1935, totaled 323. The library purchased 139, and 184 were gifts. They were divided as follows—fiction 159, non-fiction 164. This large number of non-fiction was due to an unusual gift of valuable books by Mr. Charles O. Dexter, and to whom special appreciation is due. Others making gifts of books, and to whom thanks are extended, include Mrs. H. S. Andrew, Mrs. C. G. Barry, Mrs. Effie Burgess, Mrs. F. L. Hunt, Mrs. W. F. Pope, Mrs. A. Scudder, B. H. Beckhart, W. E. Boyden, Charles A. Beard, Wm. D. Clark, W. L. Dearborn, Dodge Macknight, Walter Kaipainen, Woman's Club, and several publishers

The fact that only a small fund is available for purchase of new books makes our up to date reading quite limited. Special effort is made to secure the best selection of books for the amount expended. Gifts of books from friends fortunately have supplemented these.

There was no money for rebinding last year and it was possible to rebind only 30 this year. The State Library

Commission generously mended a goodly number for us. The limited amount of new material, of necessity, brings extra wear upon the older books, with the result that there is a constantly increasing amount of mending required and added need of rebinding. It will be quite necessary to provide for the rebinding of a considerable number the coming year, if essential books are to be kept in circulation.

The Inter-Library Loan privilege is becoming a well exercised function of the library work. Many valuable and desirable non-fiction books, beyond our means to possess, have been enjoyed by readers. We owe the State Library Commission much appreciation for their untiring efforts to secure from other libraries books they could not supply. It is only a matter of making a request and the payment of postage, for this privilege to be enjoyed.

The present spirit that exists between the Public Schools and the Library is admirable. The cooperation shown by the teachers makes it possible for the Library to accomplish much for the Schools, and the excellent attitude of the pupils, both of the Grades and the High School, deserves approbation, and makes it possible for them to secure what the Library has to offer them, through their interest in books, opportunities for reference work, and the pleasure and benefit gained from Reading Room privileges, all of which they patronize freely.

The children who use the State Certificate Reading are getting a splendid foundation for interest in good reading later. Their "book reports" are of assistance in their English, since some excellent reports are made by these children, who take much pride in securing their Reading Certificates.

The success of the Library in the past year has been, in part, due to the cooperation of the community, and appreciation is extended to the many who have assisted in any way.

Respectfully submitted,

ELIZABETH L. BURBANK,
Librarian.

Nurse's Report for 1935

In giving you my report each year I endeavor to give you a picture of the health of the community as well as the social conditions and changes from time to time in the community problems together with the accomplishments of this organization.

With the relief taken care of by the Government, we have been able to go back to our old policy of a non-relief giving organization. Even the worn clothing is much less in demand. However, the parents are less able to take care of the expense of correcting defects as the report will show.

The deaths for the year remain about as in other years while the births have increased to pre-depression days. The records show a total of twenty-six: twenty-two registered here while four are registered at the place of their birth. Thirty-five babies were born here in 1923, the largest number by far in any recent year, while in 1929 only nine were registered. Surely the depression is a thing of the past. Our school population did not suffer so much from this low birth rate as six children born elsewhere in 1929, entered school here this year.

PRE-SCHOOL

The group of little folks under school age is less than in some former years. One hundred and twenty-five was an average number in the past, while we have 100 at present.

The F. E. R. A. Kindergarten or Nursery School maintained the past two years was not re-organized this winter. The class the first part of 1935 had 15 children enrolled. These children were provided with a mid-morning lunch provided in part by the children themselves, and the balance paid by the Sandwich Woman's Club. This group was very free from communicable diseases other than "common colds". The physical defects and corrections are recorded with other pre-school children.

The care our mothers are giving their little people is most excellent. Only a few years ago few babies were put out for their naps or taken out for fresh air, and every conceivable excuse was offered for failing to give Cod Liver Oil and orange juice early—if at all. Now all babies have regular periods out of doors if the weather is not prohibitive and nearly all babies are having Cod Liver Oil and orange juice at my early age. Besides this, regular habits of eating, sleeping and the like are established at an early age. Some stubborn feeding cases developed during the year, but our record still remains clear as all have made a good recovery eventually. The following corrections have been made for this group.

Tonsilectomies—2.

Dental Corrections—9.

Sixteen were given Toxoid for the prevention of diphtheria at three clinics held by Dr. Goff when seven school children availed themselves of this opportunity to have these preventative treatments.

The occurrence of Communicable Disease is as follows:

Whooping Cough	7
Chicken Pox	1
Diphtheria	1
Scabies	3
Pediculosis	1

One hundred and sixty-five visits were made to these children under school age.

SCHOOL NURSING

The routine school nursing has been done during the year almost without incident. The physical examinations revealed 57 cases of enlarged tonsils, 14 pupils 10% or more underweight, 6 were 20% or more overweight, nine cases of defective vision uncorrected, two of heart disturbance, one abnormal lung condition—non-tuberculosis.

The frequency of enlarged tonsils is increasing as in 1932 I reported 32 cases. This is in a measure due to the new pupils coming into the school without having the defect corrected and again Tonsilectomy has lost the popularity it once enjoyed. The chief reason, no doubt, is the lowered family income and there is no way it would seem to overcome this lack.

Perhaps in no other year have the pupils been so free from communicable diseases. Pediculosis has ceased to be a problem in our school. Two pupils had chicken-pox, two diphtheria, one scabies, and one pediculosis.

With five exceptions all pupils have had Toxoid or Toxin-Antitoxin to prevent Diphtheria. One pupil has

not complied with the State Law requiring vaccination or revaccination against smallpox.

Dr. Kelly, Superintendent of the County Sanitarium, came to the school to give the Von Pierquet test to Grades 7-9-11. Two new cases reacted and were X-rayed. One proved to be negative and one suspicious. This gives us a total of three positive and one suspicious case in the school. With eight exceptions, all above the six grades have had the Von Pierquet Test.

Two Mental Clinics were held—one in August for the children under six years of age who wished to enter school early. Two of these little folks passed the test but only one entered school. The other moved out of town before school commenced. In September the retarded children from Bourne and Mashpee were brought here for an examination to ascertain the cause and degree of their retardation. The nurse had to be at the school all the week while these tests were being given. Six Sandwich children were examined. The corrections are as follows:

Tonsilectomies	7
Dental	155

Viz.: High School 42; 7th and 8th Grades 19; Grades 1 to 6, 94.

This record has been achieved largely through the efforts of the School Dentist who examined all pupils in Grades 1 to 6 and gave certificates to those needing no work. Then he held four part-pay clinics in his office for pupils in Grades 1-2-3. Each child paid 25 cents for this care. All of the third Grade, who had not already had their work done availed themselves of this opportunity. A total of 18 attended these clinics.

One hundred and forty-five visits were made to the school building and one hundred and ninety-eight to the homes of pupils.

GENERAL COMMUNITY WORK

No new adult Tuberculosis cases have been found. All old cases are apparently arrested with three exceptions. Two of these are in the County Sanitarium and one is at home. There have been no children contacting these cases.

Of the 22 babies born to Sandwich parents, only 8 have been born at home. Three of these were attended at delivery, and had after care. There were 28 visits to the mothers and 32 to the babies. This includes visits to one mother and baby after they returned from the hospital. Including care to this class of patients, 398 Nursing Visits were made. Forty-seven were visits made on Sundays, holidays and after hours. Twenty-nine Prenatal visits were made and 398 Social Service or other visits.

In closing this, my thirteenth annual report, I wish to express appreciation for the continued assistance of co-operating organizations. The Sandwich Woman's Club have been most helpful and given much assistance to our work. To the Executive committee of our own organization I wish to express my sincere admiration for the way you have faced your many difficulties and overcome them. I am proud to have served this community especially during these trying years.

Respectfully submitted,

EVA L. WESTOVER.

Report of Inspector of Wires

Sandwich, Mass.,
December 31, 1935.

To the Honorable Board of Selectmen,
Sandwich, Mass.

Gentlemen:

Herewith is submitted the report of the Inspector of Wires for the period from March 12 to December 31, 1935.

Number of jobs inspected	21
Number of visits to same	28
Number of miles traveled	115

In addition to the above there were several calls to the Cape & Vineyard Electric Company with reference to interrupted service, wires down, and sparking conditions, as well as conferences with electrical contractors in regard to rules and service locations.

Respectfully submitted,

WILLIAM A. WINSOR,
Inspector of Wires.

**Increase is due to a substitute teacher being appointed as a regular teacher and nominal increase to beginning teachers.

WILSON C. BARTLEY, Secretary.

Superintendent's Report

To the School Committee and Citizens of the Town of Sandwich:

Spectacular change and rapid progress have been absent during the past year. The regular routine of school work has been in vogue. However, at no time has there been as much evidence of keen teaching service as we have had during the past year. This in a large measure is due to the principal of the high school. His enthusiasm for educationed progress has enabled him through professional meetings and study to bring about a deeper realization on the part of the teachers of the significance of the various subjects in the curriculum as well as an evaluation of both the content and methods that appear to be the most desirable. This has not only been true of the regular curriculum, but it is also true of the extra curricular activities.

The Henry T. Wing School is indeed a school wherein there is both preparation for life and life itself through participation in real social situations. The old school presented quite a formalized education. Today, our school prepares the youngsters in fundamentals, far better than was true formerly, but it also gives a greater opportunity for enriched living, it being the opinion of the leaders of educational thought that unless skills acquired are motivated for the public good, they will bring disaster to the social order. If our boys and girls through participation in the life of the Henry T. Wing School acquire desirable habits, attitudes, appreciations and ideals that make them live well together there, they will a few years later make the town of Sandwich a truly fine community.

For a number of years, the superintendent has made reference and recommendation in regard to vocational education. There is no question but that something ought to be done in the very near future to take care of large numbers who profit little from the academic curriculum as set up in our high school. The curriculum has been enriched by including a number of social studies, but as yet we have done nothing for the so-called "hand-minded". An article is included in the 1936 warrant for the inauguration of a state-aided, agricultural department. Although the establishment of this course would require a yearly appropriation of approximately \$2400, two-thirds of the salary of the instructor, about \$1400, would be reimbursed to the town, making a net cost of but \$1000. The town would be enabled to employ an instructor for a full year, and pay all maintenance charges.

The town meeting in March, 1936, approved an item in the budget to care for the transportation of the children living in the northwest end of the town, many of whom lived at a considerable distance from school on a main road without sidewalks. When the route was inaugurated, some thirty-odd children were transported to and from school. During the summer, bids were asked for the transportation of children on all three routes and the low bidder was accepted in each case.

It is well to pay tribute to the long, efficient service of Mr. Mark Ellis, the bus driver of the South and East Sandwich routes. The new busses are proving very desirable, since they are modern in every way and particularly because of the seating arrangement. The town is indeed fortunate that responsible citizens are furnishing excellent transportation at such a low cost.

In June, Mr. Charles P. Sawyer, principal of the elementary school, resigned to accept the principalship of a

larger school in Whitinsville. Mr. Norman Whitten also resigned to accept a position in South Orange, New Jersey. In order to get a properly qualified person to take charge of boys' athletics and to teach the required subjects, it was necessary to get a man as principal of the elementary school who was also qualified to take charge of boys' athletics. The man secured was Mr. Owén Kiernan, a graduate with a degree from the Bridgewater State Teachers' College, at which institution he had served as student coach in two sports, basketball and baseball. This young man is doing well, both in the classroom and on the playing field. Mr. John Higgins, a Harvard graduate with post graduate training, was secured as teacher of mathematics and history. This young man is doing well not only in his class work, but he is giving many hours of his time to the supervision of intelligent extra curricular activities. These two young men we believe will prove to be very desirable leaders of our young people.

For a number of years a small sum has been expended for a dental clinic under the direction of the board of health. This service has been accomplished by Doctor Talbot, with the assistance of the school nurse, Miss Eva Westover. Through this service, supplemented by trips to the Forsythe Dental Clinic in Boston, the teeth of the Sandwich children have been kept in fair condition. The sum appropriated in most towns on the Cape is several times larger than the fifty dollars which Sandwich appropriates for this purpose. Most authorities believe it desirable to lessen the number of trips necessary to the Forsythe Clinic in Boston. This can be accomplished by a slight additional expenditure to enable the dentist in town to take care of the teeth of all children in the first three grades. Considerable work has been done in these grades, but a number of children have not

had the work completed, due to lack of funds. In order that the work may be adequate, we recommend that the town add \$100.00 to the appropriation of the board of health. The state law places a dental clinic under that board.

The report of the district nurse is very inclusive and has all the statistical data in regard to the work of the school physician. For this reason we are including no separate report from the school physician.

Several major items of repair and equipment have been taken care of during the year. The science laboratory has been furnished with two substantial and spacious cabinets for the storage of supplies and equipment. The windows in the auditorium have been equipped with curtains that not only make it possible to take care of the exclusion of light, but also to make the gymnasium more attractive as an auditorium. The classroom ventilating motor has been replaced by a variable speed type, which permits a saving in fuel as well as taking away the excessive noise that has disturbed classrooms in the past few years. The time clock equipment which has proven costly in maintenance has been replaced by a rectifier, which almost eliminates repair costs.

The citizens in town meeting assembled have given ample evidence of their support of schools and we close this report in the hope that the department may continue to merit this support.

Respectfully submitted,

JAMES F. PEEBLES,
Superintendent.

Principal's Report

Superintendent, School Committee, and Citizens of Sandwich:

I herewith submit for your approval my second report as Principal of the Henry T. Wing School.

Social Science and Education

Present times are indeed trying. Nations throughout the world are considering great fundamental principles. Whither is the right road? The curriculum of the secondary school has been altogether too academic, and has given too little attention to the social studies, so that young people have had little that would enable them to be intelligent citizens.

In an attempt to provide a background for intelligent study of the needs of society we have in our program of studies "Problems of American Culture", "Building Citizenship", "Economics", and "American History and Current Events". It is necessary for the teachers and parents to work hand in hand if we are to overcome ignorance in matters pertaining to citizenship and character training. Too many times "License" is confused with "Freedom". Education is considered a necessity instead of a privilege. In short, we must teach the ideals found in our Bill of Rights in the language of the age or lose much that our country holds dear.

Activities

The Senior play of the Class of 1935 was given in May. The play selected by the advisors was "The Poor Fish",

and it was directed by Miss Anna Lobacz. The Senior Play presented by the class of 1936 was "Oh Professor" and those who had charge were Miss Anna Lobacz and Mr. John Higgins. Both these plays were successful from every point of view. The Seniors sponsored the Halloween Dance which was a financial success. The Junior Prom featured nautical decorations and was the social event of the spring.

The magazine contest last fall enabled the school to purchase an excellent combination radio and phonograph. The value in teaching music appreciation, use of leisure, and for dancing makes this gift unusually practical. Any townspeople who have classical records that would be useful in music appreciation and would be willing to donate them to the school, kindly notify the principal.

The school purchased a moving picture projector from the proceeds of the Holway School Fund, Class of 1934, and the general fund. This new addition to the equipment makes class work more interesting as well as instructive. It is available for use in all fields of study but the supply of free films in some subjects is limited. As time goes on visual education will no doubt supplement reference material.

The Shawme Orchestra has distinguished itself by receiving the highest rating giving in New England to a Class C orchestra. The fine results are due to the efforts of Mr. Adolfo Querze, the cooperation of the students, and the generosity of the parents in solving the transportation problem. The combined towns of the upper Cape joined in presenting several splendid concerts during the month of May.

Mrs. Mary Wing has been assembly chairman this school year and bi-monthly programs have been planned. We have been fortunate in having speakers as Dr. Samuel Grafflin, Congressman C. H. Gifford, Mr. Pecker,

as well as Mr. John Hines. We feel the assembly programs are being made a definite part of the school life.

Athletics and Playground Activities

Through the efforts of the Sandwich Woman's Club, the East Sandwich Grange, and other interested citizens, the elementary grades have playground facilities. An outside basketball court, a junior stride, a giant stride, and sea-saws comprise the additions to the playground equipment. This gives the boys and girls a chance for physical development at recess periods.

Mr. John Higgins coached cross country during the fall. The team defeated Weymouth and made a trip to Troy, New York, to enter the eastern meet. He is now busy with the boys' and girls' rifle clubs. Basketball proved profitable in many ways. All outstanding bills were paid while equipment was purchased for all sports. The girls were runner-up to Barnstable for the Cape title. The boys showed a steady improvement during the season; moreover, with a veteran team this year Coach Kiernan has high hopes for a Cape title. Miss Lobacz feels her girls this year may repeat their fine record of last year. A football game was played with Yarmouth last fall to give the boys a wider experience in sports. The baseball team made a creditable showing last spring but with the same team returning this year we are looking forward to a successful season.

Supervision and Testing

Achievement tests were given in the first eight grades last spring. In this way educational guidance may be intelligently administered, and our school may be compared to others in the country. These tests may be valuable for placement as well as promotion.

This year reading difficulties are being analyzed by tests in the various grades. It has been found a large number of failures in the high school are due to faulty reading habits. It is with the hope of eliminating future failures that we are carrying on this remedial work in reading.

In closing I wish to express my appreciation to the Superintendent and School Committee for their active interest; furthermore, may I thank the teachers and the citizens of Sandwich for their earnest efforts to improve the educational opportunities of the town.

Respectfully submitted,

FRANK GAMES.

Report of Supervisor of Music

Mr. James Fernald Peebles
Superintendent of Schools
Monument Beach, Massachusetts

Dear Mr. Peebles:

The annual reports which I have submitted in the past have contained detailed statements in reference to our methods of teaching vocal music, and, with your kind permission, such matter will be omitted from this paper. May I say, however, that we have received the valuable services of Margaret Russell, as a training teacher this season, and that instrumental instruction, under the efficient direction of Adolfo Querze, has been put on the same basis as the singing. This important work is now being done on school time, instead of being considered an extra-curricula activity. May I note also that vocal music has been made an elective in the senior high school? The beautiful operetta, "Hansel and Gretel", by Humperdinck, is being undertaken as a musical project for the younger pupils. We deeply appreciate the friendly co-operation of Director Querze in contributing beautiful numbers by the Shawme Orchestra at the graduation, and in lending us the services of this splendid organization to accompany the chorus.

In closing, I wish to thank you, and through you the School Committee and the teachers for the fine spirit of cooperation which prevails in our music.

Respectfully yours,

ERNST MAKECHNIE,
Supervisor of Music.

Instrumental Music Report

Dear Mr. Peebes :

The instrumental music lessons which were started last year were continued this fall. Any child desiring to learn an instrument is given the opportunity to receive free instruction in groups.

These groups are as follows :

Violins	8	Bass Horns	1
Violas	2	Alto Horns	2
Cellos	3	Clarinets	10
String Bass	1	Trombones	2
Trumpets	4	Drums	4
Flutes	3		

Besides the group work, there is a junior orchestra, a junior band and a senior orchestra. The children receiving group instruction do make progress, as one may see through their participation first in the junior band and orchestra and gradually progressing to the senior orchestra. Private lessons by outside teachers are advantageous and the supervisor would gladly recognize progress made through such instruction, by giving advanced standing to these pupils, whenever possible.

The effective resonance of any instrumental music organization depends upon the balance of the various instruments. Since there are many children who have shown a desire to study some musical instrument but who cannot afford to pay for it, I recommend that the school department set aside each year a certain sum of money, however small, for the purchase of such instruments needed to maintain a proper balance and diversification

in the band and orchestras and in this way give the children an opportunity to play.

To deny any child the opportunity to develop his musical ability and appreciation of music, or to withhold from him the means which will enable him to participate in it, is to deprive him of one of the greatest satisfactions of life.

Concerts, broadcasts and contests given by the various schools are in my opinion the most potential means of developing interest in both the children and parents. Therefore, I hope that we will be able to continue our interesting, educational and enjoyable work in this line.

For the fifth year, the Shawme Orchestra entered the New England high school orchestra contest and for the third time was able to secure the highest rating of any Class C orchestra. This year the contest will be held in Portland, Maine. If the cooperation of the parents can be secured, the Shawme orchestra will be entered. This trip is desirable from a musical point of view, and we believe that it presents other worthwhile educational objectives.

I wish to express my thanks again for the splendid cooperation already given by those interested in musical education.

Respectfully submitted,

ADOLFO QUERZE,
Instrumental Music Director.

Report of Art Department

The art work for the past year was planned to fit the needs of each class. Color recognition, color theory and color appreciation were studied through September and October. The drawing of forms of nature naturally entered into the study of color. Design followed the study of color, enabling the pupils to apply their color theory to their designs, which were usually used for holiday work.

The winter months were devoted to drawing from objects and figures, thus teaching the classes something about proportion and perspective. Work in various mediums to represent the winter landscape was given in grades five, six, seven and eight. The primary grades expressed their thoughts with cut paper and crayons.

Grade five last year completed, creditably, a very large poster. The subject was transportation. Each pupil painted part of the poster and made a booklet of the "History of Transportation." Grade six this November made three decorative panels in color, the subject being the Pilgrims.

The seventh and eighth grades and a few members of the High School class gave a marionette show for the school and for guests of the seventh grade. The marionettes were made, dressed and manipulated by pupils. The play was adapted from a fairy tale. The scenery was designed and painted by pupils. I hope the parents will have an opportunity to see this excellent work with marionettes this coming year.

The High School class is small. Three pupils elected mechanical drawing and the six other pupils elected free hand drawing. The work of this advanced class is extremely varied, each pupil doing individual work especially planned. We have one pupil, Eleanor French, in the Massachusetts School of Art.

In closing this report, I wish to extend an invitation to the parents to visit the art classes on Tuesdays, the supervisor's day. I thank the teachers for their willing co-operation.

Respectfully submitted,

EDITH SAVARY HALL.

Fall Term—September 9 to December 23, 1936

SCHOOL COMMITTEE MEETINGS

Third Friday of each month, 8:30 P. M., at the
Henry T. Wing School.

Sandwich School Activity Account

For the Year Ending December 31, 1935

The handling of school funds is a serious matter that requires careful planning. The set up used is a result of careful study and conference with the commercial teacher.

Each organization has its own treasurer who keeps an account. The receipts are turned over to the head of the commercial department. She gives the original deposit receipt to the treasurer and keeps the duplicate as a permanent record. The money is then turned over to the principal to be placed under lock and key. A monthly statement is placed on the bulletin board for the students' inspection, and from time to time copies are made for the members of the school committee as well as the superintendent. All checks are drawn at the instigation of the treasurer of the respective organization. Bank reconciliation statements are checked promptly to insure no mistakes are made. A record of the account for the past year follows. We express our thanks to Miss Anne Lobacz, commercial teacher, for the splendid bookkeeping records she has kept as that has helped to make our plan a success.

Respectfully,

FRANK GAMES.

Town Clerk's Report

BIRTHS RECORDED DURING THE YEAR ENDING
DECEMBER 31, 1936.

January:

- 6 Barbara Jean Gage, daughter of Llewellyn M. Gage and Josephine A. (Hoxie).

February:

- 20 Klaus Markwart Schumacher, son to Carl H. Schumacher and Johanna (Jeschke).

March:

- 22 Charlotte Joan Morrow, daughter to Wallace Seymour Morrow Jr. and Mary Frances (Haines).

April:

- 20 Robert Stanley Van Buskirk, son to Clarence R. Van Buskirk and Louise (Hoxie).

June:

- 27 William Ernest Wimmer, son to William L. Wimmer and Minnie M. (Bunker).

August:

- 13 John Early Games, son to Frank S. Games and Gertrude L. (Powdrell).

September:

- 17 Elizabeth Ann Field, daughter to John Howard Field, Jr., and Clara N. (Smith).

October:

- 20 Charles Rupert Lake, son to Robert Charles Lake and Nettie (Smith).

November:

- 8 Edward Clayton Burke, son to Howard B. Burke and Margaret E. (Crowell).
- 21 Marie Louise Gustin, daughter to Lucien Gustin and Marie Louise (Perrote).

December:

- 5 Vail Merton Hamblin, son to Arthur S. Hamblin and Leone (Thomas).
- 25 Carol McArdle, daughter to John B. McArdle and Elizabeth M. (McLaughlin).

Delayed Return

March 1, 1918—Frank Kaipainen, son to John Victor Kaipainen and Maria (Strandman).

MARRIAGES RECORDED DURING THE YEAR
ENDING DECEMBER 31, 1936

January:

- 6 Gunther L. Robbins of Cedarville, Plymouth, and Alice L. Paradise of Buzzards Bay.
- 24 John A. Tyback of Sandwich and Ruth M. Ellis of Brockton.

February:

- 7 James Joseph George of Sandwich and Margaret Sarah McNeil of Boston.

May:

- 1 Nathaniel W. Marchant Jr., and Clara Eliza Cahoon of Sandwich.

June:

- 6 George F. Swansey of Sandwich and Isabella Tait of Hyannis.
- 14 Lucien Gustin of Sandwich and Marie L. Perrote of Sandwich.
- 20 Howard R. Pierce of Sandwich and Bertha A. Norton of Needham.

July:

- 7 Carasio Sintoni of Sandwich and Martha Ann A. Hathaway of Buzzards Bay.
- 23 Herbert Purdy of Sandwich and Emma Gertrude Tulip of (Hyde Park) Boston.

Town Auditor's Report

The undersigned, Auditors of the Town of Sandwich, for the year 1936, have examined the accounts of the Treasurer of the Town, Frank L. Howland, and the accounts of the Trustees of the Weston Memorial Fund, and find them correct and properly vouched.

J. FOXCROFT CARLETON,
FRANK C. BURBANK,
ALANSON W. PARKES,

Librarian's Annual Report

The Sandwich Library was organized in 1890, making this the 46th annual report submitted.

The following report showing the rating of our Library among the Libraries of the State will be gratifying to all. Early in the year, the Massachusetts Division of Public Libraries compiled comparative Library statistics of the Libraries in the State, based on four essential points. The towns and cities were divided, according to population, into ten groups. Of the 349 libraries studied, only 55 of them measured up to the standards set. Sandwich was one of 36 Libraries in Group IV, only six of which reached the standard. Sandwich headed that list.

The work of the Library broadens in scope each year, and its value to the town increases. More patrons, more readers, more familiarity with the book shelves, more browsing among them. Increased reference work, and use of the magazines. Many are learning that the 12,000 and more books at their disposal contain much they had not realized was available. And valuable gifts, as well as purchases, are constantly supplementing these.

Our summer residents and visitors use the library more each season, and express much satisfaction at the service we are able to render them. Also, it has become quite a custom for people passing through towns to stop and visit the libraries. We had many such callers the past summer, who were enthusiastic over our exceptional country library and the unusual adornments it has.

The young people and children are our most constant patrons, spending much time among the books, and in use of the reading room. The well-worn condition of our magazines speaks for this. The youth all show excellent consideration of the place and the materials they use. Rarely is there an exception to this. Reading books from the State Certificate lists has become a regular matter, and is beneficial, giving the children a taste for good books, and good reading habits.

The number of new books that have been added has been limited, there being only the income of funds designated for that purpose alone. Careful attention is given to the selection of new books that we may get the best possible for our expenditure. Some books have been attractively rebound which keeps old favorites in circulation.

The Inter-Library Loan System, through which libraries borrow from one another, principally the larger one lending to the smaller, means that anyone may secure nearly any non-fiction work desired. One simply requests the Librarian to secure the book, and pays the postage. This privilege is used much more each year, and makes available many books we cannot afford to buy, or, because of such limited appeal it would not be best for us to purchase.

The number of books catalogued during the year was 291. Of these 118 were gifts, and 173 were purchased. There were 177 of fiction and 114 of non-fiction works.

The circulation of books and magazines for the year was 19,529, and 20% of the books charged were non-fiction material. 2,180 magazines were circulated. Frequent comment is made on the superior assortment of

the magazines. Those purchased are supplemented by valuable ones, gifts of friends. This should also be said in regard to our books added this year.

Our list of magazines consists of Saturday Evening Post, Reader's Digest, Harper's, Scribner's, National Geographic, Pan-American Bulletin, Literary Digest, Hygeia, Good Housekeeping, Nature, Scientific, American, Time, Birdlore, St. Nicholas, Ladies' Home Journal, Woman's Home Companion, Open Road, American Boy, Boys' Life, Popular Mechanics, Popular Science, Child Life, and Playmate Magazine.

The following which were given, American, Atlantic, McCall's, Reader's Digest, Travel, Horticultural, Kiwanis, London Illustrated News, Punch, New England Poultrymen, Specialty Salesman, American Issue, and Dumb Animals, were donated by Mrs. Lincoln Crowell, Mrs. H. A. Dunbar, Mr. Dodge Macknight, Mrs. Harry Whitney, and Mrs. E. T. Wright; also several publishers.

The books presented were given by, Estate of Miss Abbie F. Nye, Estate of Julia A. Yard, Mrs. H. S. Andrew, Miss Elizabeth Beale, Miss Mary C. Baker, Mr. William Clark, Mr. Charles Dalton, Mrs. H. P. Dunbar, Mrs. B. C. French, Mrs. I. T. Jones, Mrs. Blake Norris, Mr. Hubert Wood and several publishers.

Appreciation is extended for the cooperation of the community which has done much to make the past year helpful to all.

Respectfully submitted,

ELIZABETH L. BURBANK,
Librarian.

Approved,
LINCOLN CROWELL, Chairman.

Nurse's Report for 1936

While we rejoiced last year over the increase in births, this year we have a sad report to make.

The births have decreased from 26 last year to 15 living births this year. Already two of these have died and one born late last year died this year.

Other towns have reported a high death rate in the total number of deaths which is true in Sandwich as well.

As in the past few years, many births occurred in hospitals. Of the 7 births at home, the nurse attended 3 deliveries and gave post partum care to these mothers and babies. 16 prenatal visits were made and 195 visits to children under school age.

No clinics have been held during the year for this group. There were only two children to take the test to enter school early and these were taken to a clinic in Bourne. One passed but moved away soon after school opened.

Our lower grades are small owing to the few births during the depression years. Only for the children who have come to us, we would hardly be able to carry on.

No Toxoid or Toxin Anti-toxin clinics were held but the parents have been urged to take their children to their own physicians for these treatments.

Communicable diseases have affected a small group. 15 school children had measles the last half of the school year. Only 8 pre-school children contracted them. 27 pre-school children have never had measles and only 8 have had whooping cough. 56 of this group of 90 have never had any communicable disease. 2 have had chicken pox, 2 scarlet fever, 2 German measles and 1 diphtheria.

At a two day conference in October where the care and control of communicable diseases was discussed, we were told school children **would** have measles and whooping cough.

Our time and efforts should be spent in protecting the pre-school children. It would seem that we have done this while we were perhaps in a measure protecting the school children as 27 pupils now in school have never had measles in spite of the fact we felt we had a general epidemic in 1934 and 13 more cases in 1936. Whooping cough shows even better results as after having two fair sized epidemics underway during the time the present group of older children have been in school, only about 50% of these pupils have ever had whooping cough. Many of these have contracted this previous to coming to Sandwich.

The annual physical examinations have been done and 159 notices sent to parents. These include the dental defects as well as those noted by the School Physician.

54 pupils already have their Dental Certificates given them by the School Dentist at the time of their dental examinations. 81 pupils in the lower grades had certificates last year. 39 pupils in the High School had their work done and 34 in grades 7 and 8.

The Sandwich Woman's Club has given assistance to needy children requiring glasses. 16 in the High School have had new glasses or old ones refitted and 9 in the lower grades.

Apparently the children have not suffered during the past years from lack of food as only 16 in the 6 lower grades are more than 10% underweight. This number has been about the same for the past few years. The Sandwich Woman's Club has been most helpful with this group, paying for milk for children who otherwise would not have any for their noon meal.

There has been no increase in the number of children with enlarged tonsils this year over last but there was a marked increase last year over the preceding year. Only 4 children have had tonsilectomies. No doubt the lowered family income is responsible for this defect not receiving more attention, and then many children have come here from other towns without having this correction.

The Chadwick Clinic now conducted by the personnel of the County Sanatorium was held early in the present school year. All pupils in Grades 7, 9 and 11 were given the Von Pierquet Test for Tuberculosis infection. No new suspicious cases were found and the X-ray showed marked improvement in two old cases.

Visits to the school building were 135 and to pupils' homes, 225.

With the high mortality this past year, the morbidity was equally high for the adult group.

No deaths occurred this year again from tuberculosis. We have 4 known active cases—2 in the County

Sanatorium and 2 at home. One new advanced case was reported this year for the first time which was diagnosed 10 years ago as an active case. This, however, was through no negligence on the part of the local physicians.

501 nursing visits have been made including those to the mothers and babies. 95 visits have been made after hours, on Sunday and holidays, and 387 Social Service visits.

All in the community should feel they have had a part in that which has been accomplished as only through the combined interest of every citizen has it been possible to carry on this service.

Respectfully submitted,

EVA L. WESTOVER

Superintendent's Report

To the School Committee and Citizens of the Town of Sandwich:

When visiting the Henry T. Wing School one is impressed with the spirit of industry which seems to permeate the building. Things appear to be well-planned and well-carried out and pupils and teachers are attacking their problems with purpose. Never was this more conspicuous than it is today. To a large extent, it is due to the fact that the school is administered by a principal who is keenly interested in his work. The results are secured through planned procedures, such as teachers' meetings, assemblies, clubs, and a guidance program.

During the past year all teachers above the fourth grade have made a study of reading, particularly as to the development of work-type skills. The elementary teachers have also made a considerable study as to method and content in the social studies with the view in mind of overcoming the shortages now found in our social order by developing citizens with democratic ideals, attitudes, appreciations and habits.

The attempt to lead the pupils into discovering their talents and abilities is through a testing program which includes the Games interest test (an inventory of pupil response to vocational and academic interest situations), conferences, and follow-up. At present the program has been confined to the high school. This spring it is

planned to supplement it by extending it through the junior high school classes and also by including in the testing program some mechanical aptitude tests. The assembly programs have been well-planned since they have included participation of all the teachers and all the students. In addition, speakers of note have addressed the assemblies on a variety of interesting subjects.

Another sign of interest is the fact that teachers remain after school for a considerable length of time in order to give pupils assistance and to prepare the work for the next day in an efficient and interesting manner.

No remarks about the school are complete without taking note of the excellent manner in which the physical plant is cared for by our custodian. Not only is the building clean in every particular but all parts of the plant are kept in repair through his efforts.

There has always been considerable interest in Sandwich in vocational training and a number of our boys have gone to New Bedford Vocational School and many of them have made good. Others are anxious to go but are unable to as the New Bedford Vocational School cannot accommodate them because of local demands. The girls have never gone to New Bedford but there are many of them who would profit from household arts courses. Efforts have been made to establish a household arts department in the Henry T. Wing School under the auspices of the state department of education, but with little success as the state department is reluctant to establish state-aided courses in a school where the enrollment is as small as that in Sandwich. Such a department might be offered entirely un-

der local control but this would mean its entire support by local taxation. Conditions in Sandwich have not warranted this attempt.

Last year some definite efforts were made to bring about the establishment of a state-aided agricultural course for the boys in our high school. It is almost certain that little can be done in this particular unless such a course could be offered in conjunction with the one in Falmouth by having one instructor who would divide his time between the two towns. For a time it appeared that such a procedure might come about, but the enrollment in the course in Falmouth is such that it is doubtful if this plan is feasible.

A solution of our vocational problems may lie in the establishment of a vocational school on Cape Cod and since there has been considerable agitation recently it may be that such a school is not too far in the future.

If a trade school should be established on the Cape, it is probable that it will be located at a point approximately half the distance from Bourne to Provincetown, probably in Yarmouth, or possibly, in Hyannis.

We believe that training should be offered for both boys and girls for the trades as well as for agricultural pursuits. It would seem wise to include carpentry, plumbing, electricity, sheet-metal working, welding, and machine shop practice. With the possible exception of the latter, there seems to be opportunity for boys to secure jobs upon graduation right on Cape Cod, and, since we are so mobile, training in machine shop practice would be advisable. Agriculture on the Cape does furnish an opportunity for employment and training for it would be practical in any plan for a trade school.

In the principal's report there is a careful study of the college preparation phase of our high school curriculum. It shows that a strikingly large number of Sandwich high school graduates do pursue their studies further and, almost without exception, they go directly from our high school to college. For that reason an emphasis on preparation for college is somewhat justified.

In spite of the school's success in this particular we are glad to report there have been adjustments made which tend to a better preparation for the non-college goer. The changes have been made by offering more general courses and more social study courses, and, in addition, the content of the courses is being presented with the interest of these students in mind.

In connection with the high school we wish to comment about costs. There are eleven high schools in Barnstable County and for a number of reasons costs are relatively high. The range in per capita costs is \$127.70 to \$196.88 and the lower figure is the one that applies to the Henry T. Wing School.

It may be a source of pride to the townspeople to know that a representative of the state library visited the Henry T. Wing School and was much impressed by the number and quality of books in the school library. She stated that we are fortunate in having gifts of worth while books from interested people and she hopes we will be enabled to inaugurate an organized library system. There is approved W. P. A. project to cover this work and we hope to be able to find someone on the certified list who is qualified to complete it.

A word or two about physical education may be of interest. Under the guidance of the elementary principal the children of grades 1 to 6 have an excellent opportunity to play organized games. Grades 7 and 8 and the high school participate in a variety of activities. Some pupils are on the varsity teams of baseball, track, rifle or basketball, while others engage in an intramural program. Ping-pong and tennis are also popular. The tennis courts have proved a fine addition not only for the high school, but also for others, particularly during the summer. It may be that the offering of the use of these courts helps to induce desirable summer residents to come to Sandwich.

The girls have been using the boys' shower room and such use is not too desirable. Investigation has been made, and, as a result, plans are going forward for the installation of a girls' shower room in the present girls' toilet in the basement floor. Since hot and cold water, as well as drainage, are readily accessible, this very desirable change will be brought about for a very small expenditure.

It is pleasing to report that the plan of running the school cafeteria is proving entirely satisfactory. Our children are able to purchase well-prepared, wholesome food at a reasonable price in attractive surroundings. During the year, under a federal arts project, our cafeteria has been made most attractive. The artist, Carlene Samoiloff, has painted in the cafeteria a series of murals having for a motif festive scenes from a number of countries. The coloring is such that it offers a desirable change from the regular school room.

Comments from report of supervisor of art: "Several new projects were introduced in the art classes during the year 1935-1936. The fourth grade used water color, working from flat washes to more finished landscape and figure painting. This early use of water color enables the pupils to paint really advanced pictures during the fifth and sixth years.

The fifth and sixth grades paint large decorative posters, each pupil working on some part of the whole. The motif used by the fifth grade for 1935 was transportation. The background represents the Cape Cod Canal at the Bourne bridge. The sixth grade are now painting three large panels. The first represents a ship of the middle ages, the second the Mayflower leaving Holland and the third, a modern ocean liner leaving New York harbor.

The seventh and eighth grades made crayon etchings, a worthwhile project. Spattering with colored ink was used by these classes for Christmas work. During the spring term these grades presented their second marionette and puppet show. The pupils did all the work for the play themselves. This performance was given for the school and for the public. It was well attended.

The art education of the first three grades is chiefly representation—well-known objects drawn by daily practice. Paper construction was used last year as usual for its valuable development of hand skills. Seasonal activities are an important part of their course. Project work, often the representation of living conditions of a foreign country is developed artistically with cardboard, paper, cloth, twigs, or whatever these little folks fancy to express their ideas. The art work of these grades has im-

proved. It is more natural, more vitally their own art expression, without suffering any loss of educational value.

The high school class has two divisions—freehand and mechanical. The freehand class is again divided into two groups. One group studies the art of costume design; the other, interior decoration.

I wish to repeat my invitation on behalf of the school to parents to visit the art classes on any Tuesday, the supervisor's day."

Comments from report of supervisor of instrumental music: "1935-36 has marked another successful school year for the instrumental music department. In Haverhill the Shawme orchestra was superior and in Portland, Maine, was rated the highest in New England, with 97 points out of 100 obtainable.

We have pupils from grade 4 through the twelfth taking lessons on modern instruments of the symphony orchestra, such as cornet, clarinet, trombone, alto horn, bass horn, oboe, flute, violin, viola, 'cello, bass, drums. In all a total of sixty children are taking these classroom lessons. In addition to the lessons, each week we have a meeting of the senior group who form about one-half of the Shawme orchestra. We have a junior orchestra that meets each week. The process, in brief, consists of starting a youngster on some instrument with individual attention. He then advances to a small group playing the same instruments. Later, he participates in a larger group of the same class of instruments. He then advances to the junior orchestra and finally to the Shawme orchestra. That is, by starting with the homogeneous instruments we soon are able to build a heterogeneous group. Later from that group we occasionally take a homogeneous group for special training."

During the past year Dr. Beale presented his resignation as school physician. The committee accepted his resignation with deep regret and expressed to him the appreciation of the whole town for his many years of efficient and generous service. For a number of years Dr. Beale has found it increasingly difficult to carry on this work and it was only through his intense interest in the schools of Sandwich that we were fortunate enough to secure his services.

Dr. Robert F. Grandfield has been elected to the position of school physician and he is doing his work in a splendid manner. Our physical examinations are carefully made and parents should give his recommendations serious consideration.

Comment from report of school physician: "Physical examinations were made of all school children on Monday mornings starting in October and continuing into December. Written notice was sent to parents in regard to existing defects with suggestions as to correction.

"Under the direction of Dr. Julius Kelley of Pocasset tuberculin tests were made and, in the case of 'reactor', X-rays of the chest were made."

The public schools are close to the citizens and it is indeed gratifying to realize that the majority of the citizens are behind the educational program. We wish to record our appreciation of their earnest support and assure them that the entire personnel will do their utmost to merit their continued confidence.

Respectfully submitted,

JAMES F. PEEBLES,
Superintendent of Schools.

Principal's Report

Dear Mr. Peebles:

I submit for your approval my third report as Principal of the Henry T. Wing School.

Contemporary Problems: Educators appear to be in rather general agreement that secondary school pupils should obtain some understanding of the major contemporary issues in American social, political, and economic life. In spite of this unanimity of opinion, there is a lack of such material in the ordinary text book as well as the average course of study.

What is our school doing to teach contemporary problems. From some of the shortages in our democracy, units have been planned in certain subjects. In Citizenship the election was studied as a personal responsibility; in Economics the issues were considered in their relation to the future welfare of our democracy; in U. S. History the election was presented as a step in the present history of our country. Social security, Constitutional developments, strikes, the Pan-American Conference, and other subjects have been brought into class assignments. The materials are found in the daily newspapers, Harper's, Literary Digest, Reader's Digest, and other current publications. All the teachers have shared in helping to promote an interest, understanding, appreciation and respect for current problems.

What's Ahead: One of our biggest problems is unemployment. How are we going to provide work for the pupils who graduate or leave school today? This seems

to be at the bottom of the dilemma in which youth finds itself. The social unrest and the Robin Hood attitude towards crime are accentuated by the pupil's economic insecurity. Some people feel that many boys and girls today have little respect for property and do not sense moral obligations to society. This may be true, but what are the critics doing to provide future opportunities for these pupils?

Our guidance program frequently results in students seeking opportunities in other localities. Yet in time such a process will be fatal to the best interests of this community. Some local enterprise should be brought in to promote the future welfare of this town.

School Failures: Because it has vital psychological implications, failure is one of the most important aspects of school teaching. Parents often ask, "how can we help our boys and girls to do better work?" In answer to this the following suggestions might be offered. First, insist that your children be regular in school attendance. Work lost through class discussion cannot be regained. Second, take a genuine interest in the progress of the child. Encourage the pupil to overcome daily hardships. Third, see that the social life of the child does not interfere with his mental or physical health. These factors contribute much to the common reasons listed in explanations of failure.

Activities: In brief it might be said that our program has not been enlarged. A retrospect shows Miss Lobacz directed a very successful senior play; Mr. John Higgins coached the rifle teams which won several matches; Mr. Adolfo Querze and the Shawme Orchestra won the highest honors in the New England Music Contest; the assembly programs included many worthwhile features; the operetta was educational and entertaining; and the social functions were well attended.

Athletics: The success of the basketball and baseball teams was due in a large measure to the coaching of Mr. Owen Kiernan and the keen interest of the players. Sandwich annexed the Cape title in baseball and lost in the final to Hyannis in basketball. The girls under Miss Anne Lobacz made keen competition for the best sextets on the Cape. The track team did not make a very impressive record but the boys made several enjoyable trips.

Appreciation: Dr. Edward S. Talbot gave the school a complete set of the National Geographics dating from 1916 to the present. The money to bind these magazines was earned by the pupils in their annual magazine campaign. In behalf of the school, I wish to express my appreciation to Dr. Talbot for this splendid gift.

School Standards: We hear a lot about school standards today. What is meant by "school standards?" Generally, it has reference to the success of the students in academic courses; but school standards are a combined product of the pupil and the teacher. Gifted students will make a high standard in spite of the teacher and poor pupils will lower the class average in spite of the teacher. How does our school stand in relation to other high schools? We have a Class A rating which is the highest given by the State Department of Education. Our school is a member of the New England College Certificate Board which enables us to certify pupils to any college belonging to that association. How well do our graduates succeed in schools of higher learning?

The following table sets forth the available information of graduates now attending schools of higher learning:

Types of Schools and Colleges Represented:

Schools of Music	1
Colleges of Liberal Arts	7
Schools of Nursing	3
Schools of Art	1
Colleges of Science	3
Junior Colleges	1
Schools of Medicine	1
Teachers' Colleges	7
<hr/>	
Total	24

Academic Standing:

Graduates receiving high honors	
(more than half A's)	4
Graduates receiving honors	
(an average of B)	6
Graduates doing good work	
(more than half B's)	7
Graduates doing fair work	5
Graduates doing passing work	2
Graduates who have failed	0
<hr/>	
Total	24

Number of graduates in last four years 61

Percentage furthering education 39%

Our school has apparently fulfilled its obligations as a high school and now the question is how well has it functioned as a broad school. We have enlarged the program of studies so that a pupil can graduate without matriculating in courses of higher mathematics, advanced science, or foreign languages. This enables most

of the students with average ability to graduate from the high school. Our school does accept the challenge of providing courses for pupils who do not expect to go to college; however, we are limited to some extent by the cost of introducing a practical arts curriculum. It is possible that Barnstable County may establish a school for pupils who have mechanical ability. If this comes to pass, our problem of adjusting our education to the needs of the individual will be more fully realized.

In conclusion, I wish to thank you for your untiring efforts in maintaining high standards in education, the teachers for their active interest and cooperation in accepting the challenge education places on the schools today, and the school committee for their interest in providing for the educational facilities of the town.

Respectfully submitted,

FRANK S. GAMES,
Principal.

Commencement Exercises

CLASS OF 1936

Overture	Shawme Orchestra
Processional	
Selections—	
Sextet from Lucia Di Lammermoor	Chorus
To Thee, O Country	Chorus
Winter Lullaby	Girls' Chorus
Invocation	Reverend John Trout
Address of Welcome	Irene Ahonen

Town Clerk's Report

BIRTHS RECORDED DURING THE YEAR ENDING DECEMBER 31, 1937

- Jan. 2 Gerald Edgar Caron, son to Edgar E. Caron
and Anna L. (Thomas).
- 19 James Edward Brady, son to John F. Brady
and H. Helena W. (Wiinikainen).
- 23 Paul Louis Masaschi, son to Louis A. Masaschi
and Pauline (Alvezi).
- 23 Pauline Louise Masaschi, daughter to Louis A.
Masaschi and Pauline (Alvezi).
- Feb. 14 Frederick Rand Brown, son to Frederick H.
Browne and Elizabeth (Rand).
- Mar. 10 Mildred Dawn Hoxie, daughter to Ralph Willis
Hoxie and Chrissie Elizabeth (Adams).
- 16 Charles Henry Coolbrith, son to Charles Cool-
brith and Miriam (Hyttinen).
- 26 Priscilla Freeman, daughter to Ralph I. Free-
man and Ella B. (Cornish).
- April 4 Thelma Irene Embroult, daughter to Louis
Embroult and Ethel R. (Pierce).
- 10 Richard Milton Gage, son to Llewellyn M.
Gage and Josephine A. (Hoxie).
24. Ruth Dorothy Purdy, daughter to Herbert
Purdy and Emma G. (Tulip).

- May 14 Millicent Jean Sanford, daughter to Hubert Hall Sanford and Christina Freeman (Chase).
- June 9 Esther Collins French, daughter to Winthrop Weare French and Helen Wells (Kinney).
- 16 Dana Alden Coe, son to John Alden Coe and Winifred (MacKinnon).
- 24 Donald Forrest Mann, son to Harold Gaze Mann and Frances (Hamblin).
- 29 Richard Allen Harlow, son to Maitland Thomas Harlow and Lucy Rita (Sintoni).
- July 3 Linda Marie Thomas, daughter to Ronald Cecil Thomas and Delina Crandall (Fish).
- 10 Nancy Louise Young, daughter to Burton Stanwood Young and Josephine (Hutchinson).
- Aug. 22 Carol Emily Melix, daughter to Leon F. Melix and Helen (Stets).
- 23 Katherine Roncarati, daughter to George Francis Roncarati and Katherine Ann (Riley).
- 27 Gail Elisabeth Tyback, daughter to John A. Tyback and Ruth M. Ellis).
- Sept. 7 Alberta Joan Ann George, daughter to Alfred Christopher George and Annie Jennie (Smith).
- 15 Raymond Curtis Tompkins, son to William Joseph Tompkins and Eugenia Grace (Powell).
- 15 Alvin Harold Tompkins, son to William Joseph Tompkins and Eugenia Grace (Powell).

We the undersigned, Auditors of the Town of Sandwich, have examined the accounts of the Treasurer of the Town, Frank L. Howland, and the accounts of the Trustees of the Weston Memorial Fund, and find them correct and properly vouched.

J. FOXCROFT CARLETON,
ALANSON W. PARKES.

Librarian's Annual Report

The 47th Annual Report of the Library is herewith submitted:

A perusal of the record of the circulation for the year will show that the primary purpose of the Library has been fulfilled.

The circulation record shows a well diversified interest in the reading of our public. There are about 800 cards in active use by borrowers, including some 100 cards used principally temporarily during the summer months. The heaviest period of circulation is divided equally between midwinter and during July and August. Our total circulation for the year has been 20,623, and 4377, or 21% of this have been non-fiction works. Over 50% of the 2364 magazines circulated were classed as non-fiction. That makes a record of 29% of all reading for the year of a non-fiction nature.

The Inter-Library Loan System fully explained in the report of last year, has been used extensively by readers, students and organizations. Every one may take advantage of the privilege if desirous of books to use that the Library does not own.

A limited number, but desirable books have been added this past year, through careful expenditure of funds, or by gifts.

The collection of plays has particularly been enlarged through a gift of 15 books from Miss Lucy Barton. There have been 274 books cataloged. Of these 172 were purchased and 102 given. There were 146 books of fiction and 128 of non-fiction.

Much appreciation is due those who have made generous donations of books during the year. We wish to thank Mrs. Ruth Allen, Auxiliary of American Legion, Mrs. R. F. Armstrong (books from Cedarville Library), Miss Clare Benedict of Switzerland, Mrs. C. G. Barry, Miss Lucy Barton, Mr. George H. Bodfish, Mrs. John F. Carleton, Mrs. Josephine Cheney, Mr. Wm. Clark, Mrs. H. A. Dunbar, Mrs. H. P. Dunbar, Alton Gibbs, Mrs. F. L. Howland, Mr. Jesse Hoxie, Mr. Dodge Macknight, Estate of Miss Isabel Wesson, and several publishers.

The magazines *Life*, *The Nation*, and *Hobbies* have been added to our list of a year ago which included *Harpers*, *Scribners*, *Hygeia*, *National Geographic*, *The Digest*, *Bird Love*, *Readers' Digest*, *Time*, *Nature*, *Ladies Home Journal*, *Woman's Home Companion*, *Saturday Evening Post*, *Pan American Bulletin*, *Scientific American*, *Open Road*, *St. Nicholas*, *Boys' Life*, *American Boy*, *Popular Mechanics*, *Popular Science*, *Child Life* and *Playmates*.

There are still other magazines donated by friends interested in providing added privileges to magazine readers. These include *The American*, *Atlantic*, *Better Homes and Gardens*, *Dumb Animals*, *Horticulture*, *McCalls*, *Kiwanis*, *London Illustrated News*, *New England Poultrymen*, *Specialty Salesman*, and *Sunday Visitor*. They were given by Mrs. Lincoln Crowell, Mrs. H. A. Dunbar, Mrs. S. O. Ellis, Mr. Dodge Macknight, Mrs. M. H. Whitney, and Mrs. E. T. Wright. Also a friend and several publishers.

The work of the Library the past year has been constantly an active one. Our Townspeople make more use of it during the winter months, while the summer residents and visitors make that season a busy one. During the school year our young people and children are our largest patrons. The High and Junior High pupils make intensive use, then, through the reading requirements

of their English courses, their reference work, and use of Reading Room in general. The younger children use the State Certificate Reading Lists as a guide to much of their reading, and are ardent readers of all the juvenile magazines. The Library is opened on each Wednesday at 1:45 that the children who come to school in the busses may have the privilege of getting books. This opportunity is freely used. Children soon realize what is proper behavior in the Library and eagerly help newcomers to learn. A helpful influence for all. We have a group of fine young people frequenting the Library, and take great pride in them. We are pleased of an opportunity to express our commendation of their splendid spirit of consideration and co-operation in their connections with the Library.

The Library Lecture Room has served the community frequently as a meeting place for local organizations and Committees. The Community Christmas Tree, lighted by the Woman's Club, gave enjoyment to all.

Appreciation is extended to the Library Trustees for their hearty co-operation, and to all who have, during 1937, helped to make the Library of real service to the community.

Respectfully submitted,

ELIZABETH L. BURBANK,
Librarian.

LINCOLN CROWELL, Chairman
Board of Trustees.

Nurse's Report for the Year 1937

The youngest generation, as in the past, have merited our first interest. The number of births have far exceeded pre-depression years: a total of thirty. One born out of town was not recorded here. Only for the two pairs of twins, the number would have stayed in the twenties, nearer our usual number. Twenty-four of these born in hospitals. Of the six home deliveries, three were given care by the nurse, and thirty-six prenatal visits were made.

Our young mothers are giving unstintingly of their time and strength to the intelligent care of their babies. They are taking advantage of literature, magazine articles, radio talks and all worthwhile information available to them. With few exceptions, the babies are put out for daily airing in their own yards, have their own beds and sleep in them. They are given orange juice and cod liver oil regularly regardless of the mothers personal likes and dislikes. The babies are sensibly clothed. These facts are quite general even with families on welfare.

Many babies are taken to their physicians regularly for advice in habit training as well as a general physical examination for lurking disorders and feeding problems. Mothers coming here from other communities where they have had the opportunity of taking their children to a Well Baby Conference miss this service. It would seem an opportune time to organize such a conference here for those mothers who are unable to consult a private physician. The social side of these conferences would be most valuable to the young mothers who are denied

the opportunity of the Woman's Club, Grange activities or the social life of church groups. In homes where there are school children, and pre-school children, it is quite out of the question for mothers to avail themselves of the social life the community offers.

Dr. Grandfield gave his services that every child might be protected against diphtheria. In the school group five were not thus protected. They attended the pre-school clinic. Forty-one children under school age were treated, twenty-three others did not come and twenty-two were under six months of age, thirty-one had previously been treated making a total 115, our known pre-school population. Many of those children yet untreated can and probably will be taken to their private physicians if they set a definite time to do this. The first birthday has been suggested as a definite time.

For the first time children under school age have had their own dental clinics. The Board of Health were far-sighted enough to give their consent for clinics for the group entering school for the first time in September. Fourteen of these children attended these clinics in July. Three refused to have their work done, four received certificates and the other seven returned in October to the school clinic. As this is one of the smallest towns in the State, and perhaps has the least money appropriated for dental clinics, it seemed doubly important to begin early to conserve our children's teeth. The children from three to five were not eligible to this clinic so the Woman's Club contributed \$24.00 for clinics for this group. These are still being held and fourteen children have been treated. We plan to have one more clinic anticipating finishing these children and taking care of any others who wish to come. 201 visits were made to the pre-school group.

72 school children availed themselves of the opportunity of having their teeth cared for at the clinic. 63 pupils had their work done by their own dentists, making a total of 135 with work completed. 80 pupils in the first six grades, 25 in grades 7 and 8, and 30 in High School. 13 pupils did not have their work completed at the clinic. 6 of these required more extensive work than could be done in a school clinic. 7 failed to return for a sufficient number of times to complete their work.

All pupils above the two lower grades were given an audiometer test—200 in all—to determine their hearing loss. Fifteen showed some such defect. Seven of these have had advice or treatment from their own physicians.

The seventh, ninth and eleventh grades were given the Von Pierquet test for tuberculosis infection. Fourteen re-acted and were x-rayed. Only two cases were at all suspicious. These examinations were made by the personnel of the Barnstable County Sanitarium.

The vision tests have been completed in the lower grades. 18 pupils were found with defective vision. 13 of these have been fitted to glasses.

Fifty children still have enlarged tonsils. These figures are of a previous examination as the physical examinations for this school year have just been completed. Other than the six who have had them removed during the year, the number will remain about the same as they are old cases carried over from year to year.

No contagious diseases other than a few cases of impetigo, scabies and pediculosis have occurred.

Visits to school building 124. Visits to pupils in their homes 164.

All calls for the sick in their homes have been answered. 421 nursing visits have been made. 41 of these

were night and Sunday calls. 483 social service visits have been made.

The nurse attended four Tonsilectomy Clinics at Pocasset, made two trips to New Bedford with patients, five to Pocasset, seven to Hyannis. She attended four meetings of the Cape Cod Public Health Nurses Club at Dennis, one conference of social workers at Hyannis, made two trips to Dr. Goff's office, and attended the annual meeting of the Simmons College School of Public Health Alumni.

I cannot close this report without mentioning and thanking this organization for the interest in establishing more adequate quarters as well as a very comfortable home for myself. Someone has suggested calling the house "The Open Door." I assure you the door will be open to any who may wish to come.

I appreciate more and more each year the ready response you have always given to any request I have made for changes or any new activities I have been able to suggest.

Respectfully submitted,

EVA L. WESTOVER.

Report of Inspector of Wires

Sandwich, Mass.,

January 25, 1938.

The Honorable Board of Selectmen,
Sandwich, Mass.

Gentlemen:

I respectfully submit the following report of the Inspector of Wires for the year ending December 31, 1938.

Number of inspections	31
Number of buildings inspected	41
Number of calls	47
Miles traveled	207

I wish to call the attention of householders to the incandescent lamps that are being offered at bargain prices. The candle foot output of light per watt of power consumed is very much lower than that of standard makes of lamps, and the life of these lamps is very short. The few pennies saved in their purchase are quickly eaten up in current costs.

Reliable manufacturers do not hesitate to put their names on their products. In the purchase of lamps as well as other electrical devices you will save on your current bills by buying articles which bear the names of American manufacturing concerns whose products conform to the standards set up by the Underwriters Laboratories.

Respectfully submitted,

WILLIAM A. WINSOR,
Inspector of Wires.

REPORT OF AN
Audit of Accounts

September 16, 1937

To the Board of Selectmen,
Mr. John S. Tinkham, Chairman,
Sandwich, Massachusetts

Gentlemen:

I submit herewith my report of an audit of the accounts of the town of Sandwich for the period from March 24, 1933, to June 12, 1937, made in accordance with the provisions of Chapter 44, General Laws. This is in the form of a report made to me by Mr. Herman B. Dine, Assistant Director of Accounts.

Very truly yours,

THEODORE N. WADDELL,
Director of Accounts.

TNW-MEF

Mr. Theodore N. Waddell,
Director of Accounts,
Department of Corporations and Taxation,
State House, Boston

Sir:

In accordance with your instructions, I have made an audit of the books and accounts of the town of Sandwich for the period from March 24, 1933, the date of the previous audit, to June 12, 1937, the following report being submitted thereon.

The financial transactions, as recorded on the books of the several departments receiving or disbursing money for the town or committing bills for collections, were examined and checked in detail.

The appropriations voted by the town were listed, the charges against appropriations were checked, general ledger accounts were compiled, and a balance sheet, showing the financial condition of the town on June 12, 1937, was prepared and is appended to this report.

The books and accounts of the town treasurer were examined and checked in detail. The recorded receipts were analyzed and compared with the collections as recorded in the several departments collecting money for the town and with the other sources from which money was paid into the town treasury, while the disbursements were checked with the selectmen's warrants authorizing the treasurer to disburse town funds.

The cash balance on June 12, 1937, was proved by a verification of the cash in the office and by a reconciliation of the bank balance with a statement furnished by the bank of deposit.

The recorded payments on account of maturing debt and interest were checked with the amounts falling due and with the canceled securities on file.

The savings bank books and securities representing the trust fund investments in the custody of the town treasurer and the trustees of the Weston Memorial Fund were listed, the income, withdrawals, and balances being found to be as reported.

The records of tax titles held by the town were examined and checked. The amounts added to the tax title account were compared with the collector's records. The reported redemptions were checked with the receipts as recorded on the treasurer's cash book, and the tax titles

on hand were listed, proved, and checked with the records in the Registry of Deeds.

Considerable difficulty was experienced in reconciling the tax title records kept by the town treasurer, due to the fact that the clerical work was incomplete. It is recommended that more care be taken in recording the various transactions effecting the tax titles and that a proper and complete record of all tax titles be kept as required by Section 50, Chapter 60, General Laws.

The books and accounts of the tax collector were examined and checked. The taxes and assessments outstanding at the time of the previous examination were audited and all subsequent commitments were added and reconciled with the assessor's warrants for their collection. The payments to the treasurer by the collector were checked to the treasurer's books, the abatements as recorded were compared with the records of abatements granted by the assessor's, and the outstanding accounts were listed and proved.

Verification of the outstanding tax and assessment accounts was made by sending notices to a large number of persons whose names appeared on the books as owing money to the town. Three replies were received from persons who claimed that their taxes had been paid but not credited on the books of the collector. These claims were acknowledged by the collector and the necessary entries on the cash and commitment books were made by him. From the other replies received it appears that the accounts, as listed, are correct.

Interest on deferred payments of taxes should be enforced by the collector in accordance with the provisions of Section 57, Chapter 59, and Section 2, Chapter 60A, General Laws.

It is recommended that determined action be taken at once to secure settlement of the outstanding tax levies of 1935 and prior years.

Due to errors in the clerical work of the collector, it was necessary to check postings in detail. It is recommended that stubs of receipted tax bills showing sufficient information be prepared for each tax item collected, that all collections be entered in the cash books from the tax stubs, and that the commitment books be posted from the cash books, periodically the commitment book postings should be checked with the tax stubs.

The financial transactions of the town clerk were examined and checked. The recorded receipts for dog and sporting licenses were checked with the record of licenses issued, and the payments to the State and the town were verified.

Attention is called to the provision of Section 40, Chapter 44, General Laws, requiring the town clerk to cause the audit report, or a summary of its essential features, to be published.

It is recommended that a complete record of all licenses and permits granted by the selectmen be kept in order that receipts from this source may be properly audited.

The records of the sealer of weights and measures and of the library were examined and checked, and the payments to the treasurer were verified. A reported loss through theft of \$14.26 from the library cash is shown on the library records as of June 2, 1934, and in this connection attention is called to the fact that during the previous audit it was recommended that the receipts of the sealer of weights and measures and of the library be paid to the town treasurer monthly.

The surety bonds of the officials required by law to furnish them were examined and found to be in proper form.

In addition to the departments mentioned, the available records of all other departments receiving money for the town were checked, and the payments to the treasurer were verified.

Appended to this report, in addition to the balance sheet, are tables showing a reconciliation of the treasurer's and the collector's cash, summaries of the tax, assessment, and tax title accounts, as well as tables showing the transactions and condition of the trust funds.

While engaged in making the audit, co-operation was received from all town officials, for which, on behalf of my assistants and for myself, I wish to express appreciation.

Respectfully submitted,

HERMAN B. DINE,

Assistant Director of Accounts.

Superintendent's Report

To the School Committee and Citizens of the Town of Sandwich:

The school year has been characterized by steady effort along lines previously established, with special effort in the elementary school to bring about greater accuracy in the four fundamental processes in arithmetic and to improve reading in the middle grades.

The teaching of reading has long been a main objective of the primary grades. Perhaps more scientific research has been conducted in this field than in any other phase of the work of the elementary school. It has resulted in marked improvements in reading systems. These modern systems are based on what is called an experience program in which reading readiness is developed and the child learns the words through meaningful situations. Then, common experiences are assembled in book form and they become the basis of reading instruction. In Sandwich we use the so-called Elson Gray reading system, and the results attained attest to the efficient teaching of reading through the intelligent use of this system by our teachers. The teaching of reading in the middle grades offers considerable contrast to that of the primary grades. In the first three grades, emphasis is primarily on oral reading and the development of techniques in the acquisition of new words, either through context clues or phonetics. In the teaching of reading in the middle grades emphasis is on the skills used in silent reading and many remedial procedures are used to overcome self-acquired deficiencies that have persisted in spite of the

training in the first grades. In addition to the acquisition of these new skills used in the silent reading work in the content subjects and the establishment of good study habits, there must be created a knowledge of, and a desire for, good reading. Results of standard tests show that the year's work in this field has brought about much improvement.

Another point of emphasis in our elementary school has been the acquisition of accuracy in the four fundamental processes in arithmetic. For a number of years the trend in arithmetic has been toward the teaching of more practical number and the elimination of many useless items, such as cube root, partial payments, apothecaries' weights and intricate fractions. In spite of this we have found that the pupils in our union in common with those in the schools throughout the country have not acquired 100% accuracy in the use of whole numbers. If one makes a mistake in spelling it causes little difficulty since the meaning may be learned through the other context, but the only answer in arithmetic which is correct is the accurate one. Through emphasis in making number meaningful through purposeful experience, much improvement has been brought about.

The professional improvement of teachers is of vital importance in any school system. In order to make the work more effective, teachers' meetings are held and, in addition, a meeting of principals is scheduled monthly. The teachers' meetings are primarily under the direction of the two principals. Further training in service for teachers is brought about by visits of the superintendent with comment and often conferences, as well as by written letters of criticism. About 50% of the teachers in the school took extension courses either during the summer or during the school year in various subjects that would result in the improvement of classroom in-

struction. The principal in his report makes a suggestion that has considerable value and one that prevails in a number of communities; namely, that the town give some financial incentive to those teachers who are willing to devote time and effort to professional improvement by taking extension courses. Primary teachers are taking a course in remedial procedures in reading at the Hyannis State Teachers College. The teachers of the middle grades are conducting under the guidance of the department of public health an experiment in the teaching of health. The high morale of the school is worthy of a word of comment. The teachers are deeply concerned with their work and are using many of the better of the newer procedures. Modern duplicating devices have proved quite helpful, as teachers take them home and prepare excellent material at home. This saves much of the time formerly spent in mere copying in the classroom. The best progressive schools are based on an activity program and I am glad to report that the Sandwich school is very much a "child-centered" school.

Health: Report of School Physician: "Physical examinations were done on all new pupils and check-up examinations on all those pupils showing previous defects. With the able assistance of Miss Westover a vaccination clinic was held and during the school year diphtheria toxoid inoculations were given to the children of school and pre-school age who had not previously been protected." The health program of the school is of primary importance and we wonder if all realize how extensive the program is. It starts with a spring round-up of those children who are to enter school in the fall. Here the children are examined by a physician, dentist, and, in addition, instruction is given to parents by the school nurse and county nutritionist. Each year there is the annual physical examination and this is not a per-

functory service, for our school physician gives a very thorough examination. Parents should heed his report. He also examines those who participate in athletics as we want to be certain that only those take part who would not be harmed by too strenuous exercise. The immunization against diphtheria continues and Sandwich is a leader in furnishing this protection for school children. The Chadwick tuberculosis clinic is now conducted by the efficient staff of the Barnstable County Sanatorium. The hearing of the children has been carefully tested by the use of the audiometer. The increased appropriation of the town for the dental clinic has resulted in many more children receiving care. Reference can be made to Dr. Ames' report. The health service is of little use unless there is proper follow-up. This calls for the earnest co-operation of the parents with the physician, dentist and nurse.

Arts: The course in fine arts for the high school has proved popular. This year we have extended it and are now offering a course in mechanical drawing conducted by the principal. This has proved a wise extension in the curriculum for it offers much practical knowledge. One member of the class designed a school seal which is now impressed upon all official papers. Instrumental music is still very popular. Many have enrolled in the beginners' classes, others belong to the local orchestra, and the more skilled are members of the Shawme Orchestra. Mr. Querze finds himself in considerable difficulty in the other towns in which he teaches because of his seeming particular interest in the Shawme Orchestra. People in Sandwich and Bourne of course know that this orchestra has been very active in contests and has often returned with first honors, whereas musicians in the other towns where Mr. Querze teaches have not partici-

pated in these contests at all. This year he believes that the only thing he can do is to choose the best of the players in all of his various towns, making a united orchestra which will enter the contests. This arrangement is a fair one. Of course, the Shawme Orchestra will continue to be his primary interest in Sandwich and Bourne.

Manual Training: For a number of years considerable thought has been given to the addition of some sort of shop-work for boys, particularly those boys who find the academic subjects unsuited to their abilities or interests. The matter of an agricultural course such as is given in Falmouth and Hyannis was discussed with the state department of education, division of vocational education, and they recommended postponement of the matter at this time since they are making a very careful survey of vocational education on Cape Cod. This year the school committee have made plans for the inauguration in September of a course in manual training, or possibly one in general shop. Although most of the work will be hand-work, there will be available one or two wood-working machines. It is not expected that as a result of the course the boys will acquire definite vocational training, but they will acquire knowledge that will help them to make more effective use of their leisure time and make them more useful citizens.

Household Arts: In a number of schools household arts is a compulsory course for girls for at least one of the four years of high school. Our girls receive no instruction either in the grades or in high school in home economics. Since it is reasonable to presume that practically every girl will later become a home-maker, some provision ought to be made for instruction in this field. It now appears probable that either manual training or household arts can be added to the curriculum without an

addition to the faculty, but if both are added the budget will have to include an item to cover instructional expense. This is an extension that really ought to be made.

Athletics: Although many towns have found it possible to employ a director of physical education, other arrangements have had to be made in Sandwich to satisfy the law in regard to the teaching of "indoor and outdoor games and athletic exercise" (Chap. 71, Section 1). Under the direction of the elementary principal, the children of the lower grades receive such instruction. In the high school we have no physical education, as such, but we do have teacher-coaches for a number of sports, rifle club, tennis, cross-country, basketball and baseball being the more important. In inter-school competition the boys and girls of Sandwich find their natural competitors in the nearby high schools, almost all of which have enrollments many times that of Sandwich. It is remarkable that our boys and girls do so well, and a great many citizens expect them to have championship teams. This happens more often than could reasonably be expected. The thoughtful citizen supports the high school teams at all times for he realizes the tremendous handicaps they have to over come.

Sandwich School Activities Account: For several years a detailed account of the receipts and expenditures under the various school activities of the Henry T. Wing School has been incorporated as part of the school report. This year we are omitting the detail and giving lump sum receipts and expenditures with balances as of Jan. 1, 1938. An itemized account kept in an efficient manner by the head of the commercial department is available for any who care to see it. The various organizations keep their own individual accounts but all receipts and expenditures pass through the commercial department where a master

ledger is kept. Each month a detailed report is submitted to the school committee.

Attendance: Arrangements have been made for the blowing of storm signals by the fire department, as noted elsewhere in this report. In addition, arrangements have been made with WEEI and WNAC to broadcast no-school notices when occasion arises. However, it is the policy of the school department to have school whenever possible, leaving to the judgement of the parents the advisability of sending their children, the condition of the child, distance from school or bus, and protective clothing being matters for individual decision. In connection with attendance, it is pleasing to note the fine co-operation of most parents of high school pupils, for it has resulted in exceptionally high attendance this year. However, some parents keep their children at home for minor reasons. School men know the value of regularity of attendance, particularly in high school, for they know it is rare that a student can do successfully high school work if attendance is irregular. Very often, an absence of but one day a week means failure and oftentimes dropping from high school. The attendance honor roll is omitted again this year, for we have found very general approval of its discontinuance.

Report Cards: The matter of grading and the type of report to be sent to the parent is one that shows little agreement throughout the country, the range varying from minute percentage marks to no report at all. In Sandwich we use the high school report card recommended by the state, with a report going to the parent every two months and additional warnings to parents of those who are failing. Conferences are held with individual pupils who are failing and these failures are discussed in teachers' meetings to see if improvement can

be brought about. The grades are given in terms of letters, it being considered by most educators that this is as close a grading as is possible or desirable. A mark "P" is used to indicate that the person is not doing the type of work in that particular subject that would warrant further study in that field another year, unless it is a required subject as English. In short, it indicates that the student taking that subject is doing all that he can in it, but, for some reason, such as that the subject is unsuited to him, he is unable to do creditable work in it. In late years no effort has been made in the high school to give conduct or effort grades, and the high school principal and faculty believe that this has worked out well. With few exceptions, our high school students are well-mannered, well-behaved, and attend high school with considerable purpose.

In the grades, we use two types of report card: one for grades 1 and 2, the other for grades 3 through 8. Both of these report cards incorporate recommended procedures. The primary report card makes provision for the recording of a written message to the parent in two main fields of endeavor: first, in achievement; second, in social responses. This is considered far better than an exact percentage or letter grading in specific studies. The card for grades 3 through 8 provides for a letter grading in the various subjects plus a report on some phases of character training. In addition, there is attached an envelope for a teacher's note to the parent when that seems advisable. It is hoped that the parent will also use it to return any comment he may desire to make. All of these reports, at best, are but attempts to let the home know what is going on in school in order that both may co-operate to the betterment of the child. They have greatest value when supplemented by a personal visit with the teacher.

Scholarships: The Henry T. Wing School of Sandwich is indeed fortunate in having available for members of its senior class a number of scholarships. The Alumni Scholarship customarily amounts to \$100 and is usually awarded to the valedictorian of the class. The source of income is derived largely from the Alumni dues.

The Hannah B. Belcher Memorial Scholarship:

"I give the Sandwich High School, of Sandwich, Massachusetts, or to the Town of Sandwich, if the latter is more convenient for the care and administration of the same, the sum of two thousand dollars (\$2,000) to be invested, and the income therefrom to be given as a scholarship towards the college expenses of any graduate of the Henry T. Wing School of Sandwich, Massachusetts, such scholarship to be known as the Hannah B. Belcher Memorial Scholarship." Fourth Codicil, Nov. 24, 1920.

This scholarship usually amounts to between \$75 and \$100, the recipient being chosen by secret ballot of the high school teachers. Most frequently it has gone to the salutatorian.

The John F. Clayton Scholarship consists of:

"One hundred dollars (\$100) of income from deposit (or such part of one hundred dollars as may be earned in any year) shall be paid in the manner above provided to the Principal of the Sandwich High School, of Sandwich, Mass., and shall be awarded as hereinafter specified by the committee composed of the following members: Messrs. Fletcher Clark, George T. McLaughlin and Mrs. Harriet Morse, are citizens of said Sandwich, (so long as they or any shall live, or until resignation), and the Chairman of the School Board of said Sandwich, and the said Principal of the Sandwich High School."

“The committee of five members shall be perpetuated as follows: Upon the death or resignation of any of the members mentioned by name, the others so mentioned (and their successors) and the Chairman of the School Board shall elect a successor who shall be a citizen of said Sandwich, further provision that one of the three elected shall always be a free and Accepted Mason.”

“The award known as the “John F. Clayton Scholarship, the gift of William Eaton” shall be made at the end of the spring term in each year to a member of the graduating class, who shall have signified his or her intention to obtain a collegiate, normal or technical education, and whose scholarship and character records give promise for the future. If in any year there be no graduate considered worthy to receive said award, then an additional scholarship shall be awarded in a subsequent year.”

“If the amount of income earned in one year exceeds one hundred dollars (\$100) such excess shall be added to said Principal sum.”

This scholarship is awarded largely on the basis of scholarship and the principal's recommendation to the committee is based on previous discussion and vote of the faculty.

The Chamberlain Scholarship has just been announced. The will provides the granting of a scholarship to a worthy graduate of the Henry T. Wing School to be selected by the chairman of the school committee, high school principal and superintendent of schools. The scholarship will consist of the income from a \$2500 fund.

In addition, through a decision of the trustees of the Faunce Fund, scholarships are sometimes awarded to Sandwich students, the amount of the scholarship and the selection of the recipient being matters determined by the Faunce trustees.

In selecting the content for a school report, there is much to be considered. It may well be that some things have been reported that could have been omitted and some omitted that should have been included. However, the policy of the school department is that all information at hand should be readily accessible to interested citizens. Any information we have will be gladly furnished.

Respectfully submitted,

JAMES F. PEEBLES,
Superintendent of Schools.

Principal's Report

Dear Mr. Peebles:

I herewith submit my fourth annual report as principal of the Henry T. Wing School.

How Democratic is Our Program of Studies?

If we examine how the subjects are taught in the first eight grades, it is obvious that a definite attempt has been made to adjust the subjects to differences found within the group. It is realized that all the pupils cannot reach the same level at the end of the year, however, if the deficiency is not serious enough to cause an unwarranted hardship the next year, the pupils are passed to the next highest grade. The teachers in the grades have introduced many devices to motivate pupils to higher accomplishment. Our standardized tests show that they have maintained a high standard of scholarship and we feel at the same time the living has been made richer for the pupils. Activities have been conducted which modify behavior and develop proper habits of living. In such a program each pupil can participate to the best of his ability and benefit according to his needs. To the extent that our program has fulfilled this aim, it has met the needs of a democratic society.

It was shown in last year's report that 39% of the graduates in the last four years had gone away to other schools. This is extremely high and we cannot forget our obligation to these pupils who are using the high school as a stepping-stone to an institution of higher learning. However, this burden of the high school has been

lightened by the trend in all colleges to modify the entrance requirements. The state teachers colleges, schools of nursing, and scientific colleges have all made Latin an elective subject for admission, while three years of a modern foreign language fulfills the language requirement in many liberal arts colleges. If we are considering the greatest good for the greatest number, the elimination of Latin should be contemplated. The typical college requirements are as follows:

English	3 units (four years)
Foreign Language	2, 3, 4, 5 units
Mathematics	2 or 3 units
Science and History	3 to 5 units
Elective	3 to 5 units
Total requirement	15 units

In view of the fact that more girls are doing satisfactory work in the college course, I recommend that at the next opportunity a teacher be secured who can teach science, manual training, and agriculture. Until we have an adjustment of this kind, our high school will continue to have a mortality of about six pupils a year. Formerly some of our pupils attended New Bedford Vocational School but recently, due to the crowded conditions, it has been impossible for some of our pupils to gain admittance. It is the general belief that the Cape Cod Vocational School will not materialize; consequently, if Sand-desires vocational training for the pupils, it will be necessary to include such subjects in its curriculum.

The following table shows the distribution of pupils by subjects and the year in which the course is taught:

FRESHMAN		SOPHOMORES	
English I	23	English II	16
Latin I	10	Biology	14
Algebra I	10	Geometry	8

General Science	22	Latin II	8
Social Science	13	French I	9
Gen'l Mathematics	13	Citizenship	8
JUNIORS		World History I	11
English III	19	Introductory Business	9
Mechanical Drawing	14	SENIORS	
Economics	14	English IV	14
Typing	9	United States History	13
Chemistry	23	French III	4
French II	9	Bookkeeping I	4
		Shorthand I	7

Other subjects that are offered in alternate years are: Physics, World History II, Physical Geography, Typing II, and Algebra II.

It indicates that a pupil can select courses each year which are not college preparatory subjects. This has been made possible by the introduction of social science, general mathematics, citizenship, world history, introductory business, mechanical drawing, economics and physical geography. These courses have retained many pupils who would otherwise have been forced to drop out of school. However, they are not sufficient to adequately meet the needs of the pupils in our high school.

Sound Motion Picture Projector

At a recent Cape principals' meeting, a survey was made of the number of schools that will have a sound machine within the next year. Seven schools were noted, including Orleans, Harwich and Chatham, schools of our size. We have a silent machine but few if any new silent educational films are now being produced for schools. A sound projector would cost about \$450 but it would serve a purpose that our silent machine only approaches. The

educational value of moving pictures has been proved by many research studies. I hope the school department will consider this item in next year's budget.

Athletics

It is interesting to note that a school with our enrollment has won the baseball championship of the Cape for two years. This is due in no small measure to the intelligent coaching of Mr. Owen Kiernan. The girls were conceded the basketball championship of the Cape on their unbeaten records. This is the first girls' championship team the town has had in many years and Miss Anne Lobacz deserves credit for her guiding influence.

Evaluating the Past

The following are some of the changes that have been made during the last few years:

1. The development of an assembly program.
2. A business-like system for handling school finances.
3. Daily plan books for each teacher.
4. A change in many of the textbooks which were not adapted to the needs of the pupils.
5. The improvement of athletics as well as the equipment.
6. A more varied extra-curriculum program with increasing opportunity for all to participate under guidance.
7. The introduction of testing for purposes of educational guidance and as a check on teaching outcomes.

8. Teachers' meetings for the improvement of instruction and to study pupil needs.
9. The erection of playground equipment for the grades.
10. The pupils earned a 16 m.m. silent moving picture machine and a combined radio and phonograph.
11. The student council has been active in handling many responsibilities associated with school activities.
12. A varied graduation program featuring student participation.
13. The checking of reading procedures by a testing program as a basis of remedial reading.
14. The introduction of the Elson-Gray reading system.
15. The organization and placement of arithmetic according to the latest procedures.
16. The use of individual capacity charts in the high school in order to measure pupil efficiency.

Looking Forward

Each year a plan is developed from certain problems that appear significant in the life of the school. This year the following objectives were selected:

1. A more thorough understanding of our pupils through an extension of our guidance program.
2. The improvement of school spirit and morale in all school activities.

3. The classification of grades 4-12 through intelligence tests as a step in a research that is being made.
4. The comparison of teachers' marks with those of standardized tests.
5. The integration of English in the high school.
6. The improvement of penmanship in all grades.
7. The broadening of activities in our 4H Clubs.

Character Education

Character training in the school is measured not only by the way youngsters behave in school but also by the amount of carry over there is in the behaviour of the children in and about the town. Definite effort is made to teach boys and girls the proper conduct in the library, at the post office, on the street and other public places. It is our belief that most of the boys and girls are well-mannered, but a condition has arisen recently that troubles us and one that needs the active cooperation of the home. Some boys and a few girls are discourteous to people they meet on the street and a group of younger boys are permitted to be about in the evening and a sort of gang spirit rules them. This reflects on the school, the home and the community. May we all co-operate to bring about an improvement in this matter.

Pupil Reaction to Certain Subjects

What courses in our curriculum can pupils participate in according to their ability? To answer this question, let us quote some typical written, unsigned, pupil reactions:

“General Science is made interesting to me by the experiments which are given and the way in which it is so clearly explained by the teacher.”

“General Science, to me, seems a very interesting subject for I have learned little things that will help me in everyday life.”

“I believe that Biology is a very interesting and useful subject not only because it is of great use in later life but because we have so many interesting discussions in class.”

“I like Biology because it tells us about nature, and other living things about us. It also tells us about how we came to exist.”

“Although English is a required subject, I like it very well. Everyone will need English sooner or later in life. It is the most essential subject in the curriculum.”

“English is constantly bettering my ways of expressing myself which is necessary to everyone.”

“I find the literature part of English very interesting and read many novels which otherwise I would consider too dry for pleasure.”

“I think that a course in economics is good and is needed by everyone. You find yourself thinking more of problems of vital importance to us today. We realize that we will have to face problems of equal importance in the future.”

“Economics appeals to me because it makes you think and gives you a chance to express your own point of view. It also shows what is going on in the country, and enables a person to be able to talk intelligently on current affairs.”

“The course in Citizenship is good. I am getting fun out of it, and I understand government better than before.”

“Citizenship helps to make me understand the type of government we have in the United States.”

“The course in Mechanical Drawing helps in the use of your hands. It will come in handy if you are going to become a carpenter or any kind of laborer where hands come into use.”

“Mechanical Drawing will help me in the future, I think, because I intend to take up mechanical engineering. I will learn how to use the different instruments. It teaches accuracy, precision in work, not only in this field but in relation to others as well.”

Recommendations

1. Since professional courses contribute towards teacher growth, a plan might be worked out to give some financial incentive to teachers who will matriculate in advanced courses.
2. Many reference books are now available that have been written for students. Some of these might well be purchased for pupils' reference books and they could be placed in the classrooms where they would be readily available.
3. A reasonable amount of money could well be set aside for educational films.
4. The purchase of a 16 m.m. sound on film projector.

Conclusion

I wish to thank you for your leadership and the many valuable conferences we have had concerning our school, the teachers for their earnest and loyal effort, and the school committee for their foresight in bettering and broadening the educational facilities of our school.

Respectfully submitted,

FRANK S. GAMES,
Principal.

Commencement Exercises

CLASS OF 1937

Cornelius Festival March	Shawme Orchestra
Processional	Miss Rita Gannon
Invocation	Father Thomas McNulty
Land of Our Hearts	Chorus
Address of Welcome	John Joseph McLaney, Jr.
The Shadow March	Chorus
Bridal Chorus	Chorus

REQUIREMENTS -- Recommended by The Massachusetts Department of Public Health*

DISEASE	MINIMUM PERIOD OF ISOLATION OF PATIENT	CONTROL OF CONTACTS			PLACARD
		ADULTS	IMMUNE CHILDREN	CHILDREN NOT IMMUNE	
Chicken Pox	One week from appearance of eruption and thereafter until all crusts have disappeared.	No restrictions.	No restrictions.	Discretion of School Physician.	No.
Diphtheria	One week from date of onset and thereafter until 2 successive negative cultures, taken at least 24 hours apart, from both nose and throat, have been obtained.	No restrictions save Notes 1 and 2.	If immune as shown by a Schick test or on the basis of a previous attack of the disease, may return to school provided they live away from home, or case is hospitalized, and if two consecutive negative nose and throat cultures taken at an interval of not less than 24 hours have been obtained.	Until one week has elapsed from date of last exposure and until 2 negative nose and throat cultures taken at an interval of not less than 24 hours have been obtained.	Yes.
German Measles . .	One week from appearance of rash.	No restrictions.	No restrictions.	Discretion of School Physician.	No.
Measles	One week from appearance of rash.	No restrictions save non-immune school teachers. These handled as non-immune children.	No restrictions. (Note 3)	Exclusion from school for 16 days from date of last exposure.	No.
Mumps	One week from onset of disease, and thereafter until all swelling of salivary glands has disappeared.	No restrictions.	No restrictions.	Discretion of School Physician.	No.
Scarlet Fever . . .	Four weeks from appearance of rash, and thereafter until all complications have subsided and all abnormal discharges from ears, nose, throat or other body surfaces have ceased.	No restrictions save in certain occupations. (Notes 1 and 2.)	No restrictions if away from home. (Note 3.)	Unless child lives away from home one week and continues to live away from home, cannot re-enter school.	Yes.
Whooping Cough .	Three weeks from beginning of spasmodic cough.	No restrictions.	No restrictions. (Note 3.)	Exclusion from school two weeks from last exposure.	No.

NOTES

1. School teachers shall be subject to the same restrictions as school children. Food handlers and others whose occupation brings them in contact with children have no restriction if they live away from home.
2. Food handlers living in a family in which a case of diphtheria or scarlet fever exists shall be subject to the same restrictions as children.
3. A child shall be considered as having had the disease if so shown by the records of the Board of Health or by a sworn statement from the parent or guardian that the child has had the disease elsewhere.
4. Contacts shall be quarantined until three weeks have elapsed from the date of last exposure unless immunized by a previous attack, by a recent successful vaccination, or showing the immunity reaction.

*These same requirements are recommended by the Massachusetts Association of Boards of Health.

Report of Assessors

The Assessors of the Town of Sandwich, through the courtesy of the selectmen, have been granted an extra page in your 1938 Town Report in which they are taking avail of at this time.

It is necessary that any government have some form or forms of taxation. The forms applying to our town are taxation on various forms of personal property, taxation on real estate and a poll or head tax on male persons 20 years or over. These, together with a special tax (so-called Moth Tax) and an excise tax on automobiles, constitute those with which the Assessors of the Town of Sandwich have to do.

Inasmuch as the increased cost of County and State government as well as local increases are reflected in the taxes assessed in our town, it is with concern that the assessors look forward to the tax problem of 1939.

Henry F. Long, Commissioner of Taxation, has repeatedly emphasized the fact that the one and only way to reduce taxes is to reduce expenditures, be the same State, County or local.

This the State, Counties, Cities and Towns through their various forms of government do not seem inclined to do, the consequence being a never increasing tax rate and the taking over to a commission form of government of some cities and towns.

During the past decade the State has expended large sums of money, some by large bond issues, some by diversion of available funds, and some by direct taxation, etc.

These large expenditures and especially funds diverted (which were originally intended to relieve the tax burden on real estate) have increased until in 1938 the State Tax was the largest in the history of the State.

This, together with an increased County Tax and an increase in local expenditures, threatened to raise the 1938 tax rate.

The Assessors, with permission of the Commissioner and action of Town Meeting, appropriated \$4,000.00 to be used to reduce the levy of 1938, thus keeping the rate at the 1937 level.

The estimated amount certified by the Commissioner for the State tax for 1938 was \$3,280.00. The amount actually paid was \$6,970.00 which leaves an underestimated amount of \$3,690.00 to be raised in the 1939 tax levy plus a decidedly large State Tax for 1939 estimated at from \$25,000,000.00 to \$40,000,000.00. As the 1938 tax was based on an expenditure of \$17,000,000.00 it is plain to see that with the County tax and local expenditures the same as in 1938, the 1939 tax rate must advance.

It is possible some action may be taken to put in operation a sales tax or some form of tax to materially reduce the excessive State Tax of 1939 but if our State government is run on the pay as you go basis

and no additional tax put in operation, funds diverted or further bonds issued, the cities and towns will undoubtedly have the largest advance tax rates in the history of Massachusetts.

It would seem that as this had to come, it may as well be now as later.

In our particular case there is an underestimated 1938 State Tax which is larger than the estimated amount for 1938, which must be met in 1939 together with an increase in the 1939 State Tax, a possible increase in the County Tax and any increase in local expenditures will be the Assessors doubtful if any available fund can be used to reduce the 1939 levy. The outlook for the taxpayers of Sandwich and other cities and towns of Massachusetts for the year 1939 is anything but bright.

THOMAS F. KELLEHER, Chairman

GEORGE R. MEIGS,

JOHN S. TINKHAM,

Assessors of Sandwich.

Report of Inspector of Wires

Sandwich, Mass., December 30, 1938

The Honorable Board of Selectmen,
Sandwich, Mass.

Gentlemen:

I beg to submit the following report of inspection of wiring during the year 1938.

Number of buildings inspected, 38; number of calls, 32; mile traveled, 90.

The quality of the work looked over has been excellent.

All electric wiring should be checked at least once in ten years by a competent electrician, as a certain amount of deterioration takes place in splices, compound and insulating material.

There are many installations in Sandwich that have been in use upward of twenty years, and I would suggest to owners of such property that they have their wiring brought up to date in the interest of safety, economy and convenience.

Very respectfully,

WILLIAM A. WINSOR,

Inspector of Wiring

Report of Librarian

Herewith is submitted the 48th annual report of the Public Library.

The routine and opportunities for service are much the same, in a library, each year, hence a report lacks any great variety from year to year. But it would be of value, if, in the report we could manage to impress the town's people, as a whole, with a fuller realization of what the Library really does for the community, and how much greater place it could fill, if there was larger use made of its facilities.

The young people of school age use the Library much for study, reference and reading, as do many older people. The younger children begin to come, after a few months at school, and are soon at home among the books.

Each year we have many transient or new permanent borrowers. We added 84 such to our files. This is rather less than in most years but they made it up in their intensive use of the Library. Many, as usual, were enthusiastic and appreciative of the excellent service they could get from the material we could offer them.

The Building and grounds have been much improved through renovation and repairs.

The decoration of the fine evergreen tree on the lawn, through the Holiday Season, by the Women's Club, was an outstanding illumination in the village. The Lecture Room has been used frequently as a meeting place for committees, and gatherings of local interest. The Library has opened at 1:45 P. M. each Wednesday, as in past years, to give the School-bus pupils an opportunity to use the Library. Many children take advantage of this for themselves, and some for their parents, also.

The Inter-Library Loan System has accommodated many with books we do not own. The State Library Commission makes every effort to secure any book requested of them. They also provided Italian books for Italian readers, and last winter supplied us with a set of thirty non-fiction for circulation. Much appreciation is due them for their helpful service to the Library.

A larger number of books have been added than for several years. Of the 350 catalogued, 210 of them were fiction and 140 were non-fiction. The Library purchased 257, and the other 93 were gifts from friends. Following are the names of the donors: Auxiliary of American Legion, Cape Cod Dist.; Finnish Delaware-Valley Tercentenary Committee, Mrs. John Carleton, Mr. Isadore Caron, Mrs. Gertrude Chipman, Caroline Crowell, Mrs. Wm. L. Dearborn, Miriam Erickson, Mr. Jesse Hoxie, Mrs. F. L. Hunt, Jr., Mr. C. B. Hunt, Mr. Thomas Kelleher, Mr. Dodge MacKnight, Mrs. H. H. Pierce, Nicholas Rinaldi, Sandwich Historical Society, Dr. Karl Whitney, Mrs. E. T. Wright and Thorton W. Burgess, who has given seven of his books this year, and will soon replace a large

portion of his children's books. He has always provided the Library with all books he publishes.

The circulation of books and magazines, for 1938, varied only slightly from that of last year, the total being 20,467. Books of fiction 13,927, and non-fiction 4,024, or over 19% of the total. Magazines had the largest circulation ever, 2,516 and three out of each five were non-fiction magazines. A very creditable reading record for a community of our size.

A list of the magazines to be found at the Library is included here. All of these can be taken out to be read, if desired. Those subscribed for by the Library are Hygeia, Scribners, Readers's Digest, Time, Harpers, National Geographic, Life, Bird-lore, Nature, Pan-American Bulletin, Nation, Hobbies, Ladies Home Journal, Woman's Home Companion, Open Road, St. Nicholas, Scientific American, American Boy, Boy's Life, Saturday Evening Post, Popular Mechanics, Popular Science, Child Life, and Playmate. And in addition are The American, Atlantic, Better Homes and Gardens, Dumb Animals, Horticulture, Kiwanis, London Illustrated News, Specialty Salesman, Life Travel and New Hampshire Troubadour, which have been given by Mrs. H. A. Dunbar, Mr. Dodge MacKnight, Mrs. H. W. Whitney, and Mrs. E. T. Wright, and several publishers.

Mr. Channing Howard presented the Library with two gifts of special local historical interest. A framed reproduction of an 1810 advertising poster of the Boston, Plymouth and Sandwich Mail Stage. The other, a book of data, maps and photos compiled by him, after intensive research, of roads and bridges, in part of the town from earliest times. This invites interesting study.

Mrs. Harriet Marot Taylor also presented the Library with four of her bound Essays. Especially interesting is the fact that they were also printed by the Old County Road Press, at her home at East Sandwich.

A fact worthy of note. The Sandwich Library, in a State Statistical Survey, in 1938, was again rated as above the standard in libraries of its class.

The death of Mr. Lincoln Crowell, for long the valued Chairman of the Board of Library Trustees has been of great loss to the Library.

We wish to express appreciation to the Board of Trustees for their support and co-operation, and to the public for their helpfulness in many ways.

Respectfully submitted,

ELIZABETH L. BURBANK,

Librarian

Nurse's Report for the Year 1938

Births in Sandwich seem to interpret the condition of the nation. Last year our births totaled 30 with two pair of twins while this recession year the number has dropped back to depression years of 17 births. Twelve of these were born in hospitals and 5 at home. The nurse attended 3 deliveries, all night calls, made 16 post natal calls to mothers and babies and 25 prenatal visits.

Last year 115 children under school age were reported and this year there are 98. Fifteen of these children between 3 and 5 years of age have been to the dentist and had advised dentistry done. Three have had tonsils removed. 219 visits have been made to this pre-school group.

The annual Chadwick Clinic received the same response as in former years. We like to think parents are really interested in these tuberculosis tests and do not sign these consent slips as a matter of routine simply because the pupil wishes them signed. I wish it were possible to send every parent a statement reading, "Your child is free from any tuberculosis infection", or, "Your child shows resistance for any tuberculosis infection he may have". Anyway, when no notice is received this is what it means. A case of "no news is good news". The parents should appreciate, and I know they do, that their child is free from this disease and to know he is not in daily contact with children who might be a source of danger to him as was the case in other days in many schools. There were no new cases found this year: just the 3 old cases who have been in contacts and under supervision for some time. One wonders where the next generation of tuberculosis patients are coming from if we are to have any.

Five children were given mental tests to determine their mental age so they might enter school in September. Three of these were found to have a mental age equal to the older group entering school for the first time. They are doing the work prescribed for this older group.

Three retarded children were examined in September by the personnel from a State Hospital for mental cases and recommendations made.

The Dental Service is perhaps the most worthwhile of anything the community offers to the school group. Last year 20 clinics were held and 59 children had their work completed. This year 16 clinics were held and the same number of children completed their work. This shows less work had to be done for each child attending the clinic. The number of permanent extractions is always a good index of the results of a well organized dental clinic. Last year 24 permanent teeth were extracted and this year only 5. I am sure the \$100 in the budget of the Board of Health has brought maximum results.

Fourteen children have had tonsils removed but the school physical examinations show still 70 children with enlarged tonsils. Some of the

re not surgical at present perhaps but many of these children are in need of immediate attention. We assume the parents would have the work done if they could pay the required amount. They know the children have been examined each year by the school physician as the notices required by the State have been sent home to the parents. The nurse has called and made every reasonable effort to have the parents appreciate the need and every available assistance offered so the child could have needed attention but every year, for several years past, the number has increased. No way has been devised as yet so families of low incomes can have this work done. Governor Aiken in his book, "Speaking From Vermont", expresses his belief that corrections of physical defects such as defective teeth, and tonsils will save many a child in later life from becoming charges in State Institutions, not only penal institutions but hospitals for the mentally and physically sick. He did not mention families who will be taken care of in their own homes with public funds who should be able to maintain themselves. One family taken care of over a period of two years cost the reimbursing town \$2,000. The trouble was directly traceable to neglected teeth. This amount would finance our dental clinic 10 years or a whole generation.

The cases of defective vision have been very well taken care of with very little outside assistance. Only seven children have uncorrected defective vision.

Three orthopedic cases have been to the cripple children's clinic at Hyannis for treatment.

Two cases of scarlet fever occurred this year. Five cases of chicken pox (two were school and three pre-school). Cases of pediculosis still occur but there has been no cases of scabies or impetigo. The nurse has made 168 visits to the school building and 189 visits to the homes of school children. She has made 382 nursing visits to those sick in their own homes and 474 social service visits.

The nurse made 10 trips to the Cape Cod Hospital with patients, 5 to Provincetown, 2 to Bourne to mental and x-ray clinics. She attended 4 meetings of the Cape Cod Public Health Nurses' Club at Dennis and attended the Massachusetts Graduate Nurses' Association meeting in Boston.

Only with the fullest co-operation of all people connected with the schools, the Board of Public Welfare, Board of Health and the interest of private organizations could results such as these be obtained.

Respectfully submitted,

Superintendent's Report

To the School Committee and Citizens of the Town of Sandwich:

I am happy to report to the School Committee and citizens the conditions of their schools and the progress that has been made during the past year.

Transportation: About three years ago the school committee received a petition for furnishing transportation to the children living in the northwest section of the town towards Sagamore. Upon investigation it was found that this transportation could be furnished at slight additional cost. The finance committee approved the extension, the town meeting voted the money necessary, and since that time the children in that portion of the town have been transported. This has proved to be a wise procedure. The committee now have a request for transportation for children living in the village section of the town but at a considerable distance from the school. Going to and from school from this portion of the town presents many hazards to children, not only the hazards of the road but also the hazard of railroad crossings. It has been found that these children can be cared for at a cost of \$1.00 per day, a total cost for the year of approximately \$180. The committee and superintendent are unanimous in believing that this extension would be wise and that by the expenditure of \$180 per year forty small children can be taken to and from school safely.

Maintenance of School Plant: The Henry T. Wing School has now been in use for ten years, and many who visit it think it is a new building. This is due to the excellent way in which the custodian maintains the building. Almost every minor repair is cared for by him and by his thorough knowledge and skill major repairs are avoided. Improvements have been made as, for instance, the installation of girls' shower room, the setting up of a shop room, the insulation of the auditorium ceiling, water-proofing the brick walls, and the placing of a glass partition between the study hall and the commercial room thus making it possible for the teacher at work in that room to have control of the study room. This year the outside trim of the building was given a two-coat paint job and the building looks most attractive.

Vocational Education: In order to supplement the report of the day committee appointed to study vocational education on Cape Cod, the State Department of Education has been conducting a vocational survey with the view in mind of getting together all those facts that will lead to an intelligent decision in regard to the establishment of a vocational school, or schools, on Cape Cod, this report to be given to the County Commissioners. The survey has concerned what has happened to those who have left school, including graduates, during the five years previous

to April, 1938, what are the possibilities for employment and what type of vocational education, if any, is desirable. At a recent meeting of interested citizens, it was voted to delay requesting enabling legislation until the 1941 session of the legislature, in order that the results of the survey as well as any other pertinent information may be discussed at length in local meetings. A number of Sandwich people, both men and women, have expressed their interest in this project and it is hoped that all will make an effort to attend the local meetings that they may decide as to their approval or disapproval of the project. There has been considerable interest expressed in the establishment at Sandwich High School of some sort of vocational education, particularly agricultural education. But in view of the fact that the state is reluctant to make any decision in regard to it until the results of the survey are completed, and as vocational education of any type is quite expensive and it would be impractical for Sandwich to attempt to do it without state aid, we have decided to forego the matter at this time.

Manual Training: For a number of years the school committee have been considering the establishment of a manual training course and this fall it was accomplished. About one-third of the boys in the high school are enrolled in the course. Although the work is new and the boys have had no previous training, they now are at work on elementary projects, and before the year is over they will have acquired skill sufficient to enable them to do many worthwhile projects.

The Arts: The work in the arts—music and drawing—is of particular merit. Last June a questionnaire was given to all students in the six upper grades and another one to their parents relative to the desirability of having a supervisor of vocal music. Both the students and the parents voted in an overwhelming majority for the employment of such a supervisor. Miss Pauline Newington, a graduate of the New England Conservatory of Music, was chosen. All are required to take vocal music because we believe that our boys and girls, besides having the enjoyment of participating in school choruses, will find that the study of music will result in a happier use of leisure time and in greater participation in community programs. In the grammar school foundations for music reading and good singing are stressed and youngsters have an opportunity to participate in school programs featuring vocal music, such as operettas and special day observances. A large group of high school students hope to be members of the New England Festival Chorus that is to sing in Boston on March 14-18. Our instrumental music is still a strong feature of our program. In the elementary school beginners are given instruction on a variety of instruments. When they have made sufficient progress they join the school junior orchestra. After more training they advance to the Shawme Orchestra, an exceptionally able group. Besides the joy of participating with one's fellows in such a fine enterprise, the orchestra gives training in the skills and techniques involved and an abundance of pleasure during the years that the children

belong to it. It is the source of considerable enjoyment throughout the remainder of their lives, as they may go on with their musical education or at least may have the enjoyment that comes from being able to appreciate good music.

"Dr. Lowell Mason, the founder of school music in America, one hundred years ago, was the first to convince the school board in Boston that music was not a "frill," but instead that it was of vital importance in the school curriculum. Such an educator was he in music that Horace Mann said, "I would walk fifty miles to hear him teach if I could not otherwise have that privilege." The larger centers, naturally, always have more facilities, even in music study, but nowadays the rural schools have the opportunity by combining to do the advanced work of any large school, so far as instrumental music is concerned. The combining of instrumental music students in Bourne and Sandwich results in sufficient balance and membership for the performance of advanced classical music which otherwise would not be possible. Wherever the Shawme Orchestra has performed, it has been praised. At the present time what we need is the continuation of the splendid co-operation already received from students, parents, teachers, and the school committee."—*Adolfo Querze*.

In our art work the children handle a wide range of mediums and some of them acquire particular skill that enables them to make a livelihood in that field. All of them learn to appreciate the beautiful and to acquire good taste that will be reflected in the way they dress and decorate their homes. The supervisor is wise enough to give large numbers an opportunity to create. Many pupils find an expression of their talents in decorating the auditorium for various school activities. Others compete in art contests. Some study mechanical drawing. Others do posters for school and community affairs. Still others contribute to the school bulletin boards. In addition the pupils make things for their own pleasure to take home with them.

Arithmetic and Spelling: Last year we discussed briefly in our report the aims and objectives of primary and middle grade reading, and this year we thought it might be well to say a word about arithmetic and spelling in the elementary school. For the past ten years school men have been increasingly concerned about making number meaningful so that boys and girls might handle the problems of number as they occur in life with speed and accuracy. Careful studies have been made of arithmetic as it appears in the business transactions that all engage in as they participate in our modern society. These studies showed that much material taught in school was only number that was found in arithmetic books and not the number of real life situations. For that reason there has been much revision in the content of the arithmetic course and in textbook material. Much of the arithmetic taught the parents of the present school children has been eliminated. Denominate numbers, particularly troy and apothecary weights, cubic measure, and compound interest occur so infrequently that teaching them in school to all children

is not justified. Partial payments, cube root, ratio and proportion are no longer a part of the number content of the elementary school. The set-up that prevails in most places is similar to what we have in Sandwich.

In grades 1 and 2 children learn numbers that occur in their natural environment. Every number situation that occurs in the classroom is made the most of so that children realize its real significance and number becomes meaningful. In grade 3 efforts are concentrated on addition and subtraction with great emphasis upon accuracy. Because additive subtraction is really the continuation of the same skill (i. e., 7 and 8 are 15; 7 and ? are 15; 6 and 5 are 11, 6 and ? are 11) children are more accurate and for that reason subtraction is taught by the additive method. Results attained justify this method of teaching subtraction. Toward the latter part of the year, multiplication is taught with tables up to 9×9 . For years in grade 4 the teaching of long division was the work throughout the year. Today there is hardly a text that includes long division in the fourth grade. In this grade addition, subtraction and multiplication are reviewed and short division (taught as long division) and the easy cases of long division make up the content of the course. In grade 5 long division is the major part of the work and great stress is placed upon the ability to determine readily trial quotients. In this grade work in fractions is also stressed. (Simple fractions have been a part of the work of all grades, even of the work of grade 1 where children have learned about halves and quarters). In grade 6 the work in fractions is continued and the remainder of the time is devoted to the use of decimals. In grade 7 percentage and its applications are studied, and in grade 8 we have general mathematics as it applies in life.

Contrary to general belief, children of today spell far better than the children of previous generations. This is primarily due to better teaching. Careful studies have been made that have determined the words that people use when they write, whether it is in the form of a note, business letter, friendly correspondence, or any other written content, because, after all, spelling is a written and not an oral skill. Other studies were made to see what words of this written content caused difficulty, and the various lists of words arrived at above have become available for specific teaching. For instance, the Ayer Spelling Scale has the 1000 words most commonly used in writing, arranged according to spelling difficulty. Since that list was first published, Buckingham, another investigator, has increased the list to 1500 words. These words make up approximately 95% of the spelling errors made in written composition. We have another list called the Jones' Spelling Demons. This list contains the 100 words most commonly misspelled. To supplement these base lists, the modern spelling text has approximately 2000 additional words, a total of between 3000 and 4000. If boys and girls have learned how to spell this relatively short list of words during the eight years of their schooling (300 to 400 words per year, 2 words per day) they will have about 99% spelling accuracy. In Sandwich we use a workbook spelling text. By the use of the book, children not only learn various

ways of learning how to spell, but they also get very valuable training in dictionary use, both in using the dictionary to find out how to spell a word and in the other uses of the dictionary that concern pronunciation and meaning. The mark in spelling should include not only what the student does in the spelling lesson and in his spelling workbook but also his ability to apply his spelling knowledge in his written work.

Tercentenary: In 1937, high school programs commemorated the 300th anniversary of the settlement of the town. This year the town is observing the tercentenary of its incorporation. For a number of years, as part of the social science program, the children in grade 3 have studied their own local environment. They learn to know the various parts of the town of Sandwich and the interesting and significant places within its borders. In addition, they learn some of the local history, that which is within the comprehension of eight and nine-year old children. This year because of the celebration, children of all grades will study the history of Sandwich and its contributions to the life of America throughout the past three hundred years. A series of assembly programs is planned that will bring speakers from the town of Sandwich itself and others from out of town who know of Sandwich's history to address the students on the many phases of Sandwich's rich heritage. We hope that this year our complete program will be so interesting and worthwhile that a real love for Sandwich will be inculcated in the hearts and minds of all our young people.

Sandwich High School: The spirit of our high school is at a high level for the boys and girls in attendance there for the most part have a serious purpose. They are attempting to make the most of the opportunities furnished them by the town. For the past few years efforts have been made to socialize our high school curriculum and to take care of the great majority of youngsters who do not go to college, giving them those skills and consumer knowledges necessary for successful participation in the life of the community. Our new shop course is another attempt in this direction and many of our boys have availed themselves of the opportunity to receive this type of practical education. However, training for college has not been neglected and although our high school is small it is still a Class A high school and still enjoys the certificate privilege of the New England College Entrance Board. A number of our young people are at college and they find it possible to do the work there in a very creditable fashion. Although Sandwich High school is one of the very small high schools in the state, the community may feel proud that its boys and girls can be so well prepared that they may enter college without any further preparation beyond its courses they have taken at the Henry T. Wing School. It is our intention to supplement this training so that our boys and girls will not only receive training in scholarship but that also they will be imbued with attitudes, ideals, appreciations and habits that will make them happy and efficient members of our community. To accomplish this, many extra-curricular activities are sponsored such as sports for boys and girls,

assembly programs, 4-H club, dramatics, orchestra, student councils, chorus and classroom activities. This great variety makes it possible for each child to find something that is of interest to him, but it places upon the school and the home the responsibility for assisting the children to choose wisely in order that they do not attempt to do too much. This particular applies to those children who plan to go to college. Most of their time should be spent in the actual preparation for the college of their choice and they should not participate in too many extra-curricular activities.

Almost every year some student who has not pursued a college preparatory course comes to the principal or to the superintendent stating that he would like to apply for entrance at some college. Every effort is made to find a college that will accept the courses that the student has pursued but since most colleges have certain prescribed entrance requirements it very often happens that the student cannot attend the college of his choice. Such a state of affairs ought not to arise. The best plan for any student who has any idea of going to college is to select a college or alternate college in his freshman year and then the high school principal will prescribe a course of study that will assure his entrance provided he does work of satisfactory grade. It is most unfortunate for a student with definite aptitude to be denied the privilege of a college education because he has pursued the wrong course. The student who has a definite aim usually attains it. The school has provided a guidance program that helps in this matter to some extent but we cannot hope to avoid these instances unless we have the earnest and full co-operation of parents.

High School Reading: It is increasingly becoming evident to school men that they cannot assume that high school children have acquired the ability to read. Everywhere we have evidence not only that pupils in high school have not acquired fluency in reading but also that they have not learned those silent reading skills that make for success in reading content material, whether in school or out. In addition, few of them acquire a real love for reading. This is very unfortunate for perhaps there is no other skill that is so important in life than the ability to read, not only for knowledge that may be acquired but for sheer enjoyment. Perhaps the school in its overemphasis on the classics and close analysis of grammar and construction may be responsible for a distaste for reading. Efforts have been made in recent years to give reading content of more vital interest to young people and to get them to read material that appeals to them. Although the classics are still studied we are now making available to young people current fiction and non-fiction. Children will be allowed to read some books just for their own enjoyment. We hope to inculcate in our high school students a love for reading. If we do this perhaps we will have more intelligent citizens, at least we will have those who may find contentment in those additional hours of leisure that seem to be in prospect.

Personnel: There have been a number of changes in our faculty and with the salary schedule as low as it is in Sandwich we may continue

expect considerable change in personnel. This also applies to the principalship. Mr. Frank S. Games resigned to accept a position as director of research and guidance in the Marblehead junior and senior high school. After considering a number of candidates it seemed wise to promote Mr. Owen B. Kiernan, this young man having proved his abilities as principal of the elementary school. In order to prepare himself better for the position, Mr. Kiernan spent the summer pursuing courses in secondary education at Columbia University. Although he has only been the high school principal for a few months he is already showing that he is able to conduct the school at a high level. Following the promotion of Mr. Kiernan, Mr. Raymond F. Cook was made elementary principal. He is a graduate of Bridgewater Teachers College and has had three years' successful experience before coming to Sandwich. Miss Alice C. Gifford retired from service in June. For the past nine years she has been a valued member of our high school faculty. Due to her resignation and the willingness of Mrs. Mary H. Wing to teach Latin, it was possible to re-arrange assignment of classes so that a course in manual training could be added. Miss Verna F. Swift of Stoughton, a graduate of Boston University and the Katharine Gibbs School, who had been teaching in Northboro, was secured as teacher of English and commercial studies. Mr. George Magrath of Whitinsville, a Dartmouth graduate with successful experience in Sedgwick, Maine, and Essex Junction, Vermont, is the teacher of science and the new course in manual training. Although Miss Isabel Swansey was forced to ask for a leave of absence due to ill health, we are glad to report that she has resumed teaching. In grade 4 Miss Marjorie Bradlee, a 1938 graduate of the Hyannis Teachers College, took the place of Miss Virginia Chase who left to complete work for her degree.

Conclusion: To have a progressive system of public schools there must be an intelligent, thoughtful school committee, a body of interested, supporting parents and citizens, a loyal, co-operative group of teachers, and adequate housing and equipment. We have this set-up in Sandwich and it is deeply appreciated.

Respectfully submitted,

JAMES F. PEEBLES.

Principal's Report

Dear Mr. Peebles:

I herewith submit my first report as principal of the Henry T. Win School.

Democracy: No idea taught in our public schools today is more important than that of democracy. The entire future of America depends upon the correct interpretation of this concept by our youth. Good citizenship has been an ideal in our schools from the beginning of our country, and today, with increased devotion and greater insight and wisdom, our teachers generally consider this idea paramount in school progress. With this in mind one of our most important objectives this year has been the elimination of an undemocratic spirit of indifference toward school, home and community. By means of worthwhile citizenship units, home visitations, and school conferences with parents a definite improvement has been made in this regard. This co-operative program is being continued in order to insure more definitely a true democratic way of life for our children.

Curriculum: A century ago and less most education was secured in the home and in connection with the actual experiences of life. Manufacturing and a complex economic life had not emerged. Social and institutional relations were simple and acquired through experience. But the simple life of fifty years ago is no more and we are faced with the perplexing problem of providing a meaningful curriculum, fitting our students to meet this ever increasing complexity of life. Supplemented this year by the introduction of manual training for the boys, our revised curriculum is attempting to meet these needs. This course under the direction of Mr. George Magrath, trains not only in the fundamental skills involved in woodworking, but also provides our pupils with a useful knowledge of handling tools, house repair work, cabinet making, and practical carpentry. The listed courses of our present curriculum follow:

First Year

English I
Latin I
General Science
General Mathematics
Algebra
Social Science

Second Year

English II
Latin II
French I
Biology
Geometry
World History
General Shop

Third Year

English III
French II
Review Mathematics
Chemistry or Physics
Economics
Typing
Bookkeeping
Mechanical Drawing

Fourth Year

English IV
French III
Physics or Chemistry
Review Mathematics
Economics
Typing
Bookkeeping
Current Events and Public Speaking

A minimum of four courses is required each year, the choice depending on whether the college or general curriculum is elected. In addition to cultural offerings in art and instrumental music, this year we have inaugurated a required course in choral music under the supervision of Miss Pauline Newington.

Guidance: The marked increase in high school enrollment over the past half century, accompanied by a corresponding enlargement of the number of courses offered, has been largely responsible for the need of guidance in the secondary schools. It is obvious that many students have only a limited knowledge of the wide range of elective offerings in the high school curriculum and many are unaware of the vocational application of the subjects they do select, which results frequently in disappointment, requested changes of program, and failure. To counteract this deficiency, conferences have been held with all high school pupils and counsel has been given in regard to choice of subjects, selection of life vocations, and possible institutions of higher learning to enter after graduation.

Activities: During the past year we have carried on an enriched extra-curricular activity program providing for pupil participation in plays, instrumental and choral music groups, 4-H, track, basketball, baseball, and rifle clubs. Although seriously handicapped by a small enrollment our teams have done remarkably well in competition with much larger schools. The girls' basketball team won for the second consecutive year the Cape Cod Championship and the boys' team made a very creditable record in defeating such schools as Barnstable, Bourne, Falmouth, Wareham and Yarmouth. This year, although faced with the remaking of both teams, our new coaches, Miss Esther Thorley and Mr. George Magrath, look forward to moderately successful seasons. Under the guidance of Mr. Robert Winslow our track and rifle teams have also enjoyed successful years. In the junior high school much has been accomplished through 4-H Club work in providing opportunities in sewing and cooking for the girls, and leather work, chair caning and metal craft for the boys. Mrs. Grace Mullaly and Miss Esther Thorley have had charge of this work. Under the direction of Mr. Raymond Cook the elementary pupils have participated in a well-rounded activity program. The presentation of a minstrel show by grades four, five, and six proved to be the highlight of the first semester. Assemblies have been held throughout the first and second terms and have proved both entertaining and educational. On alternate weeks the American history films, "The Chronicles of America," are being shown and to date have contributed greatly in supplementing the social science courses. In connection with this visual education program an attempt is being made to purchase a sound projector which unquestionably will be more advantageous in keeping abreast of progressive educational trends.

In conjunction with the 300th anniversary, plans are being made in all classes to study our town's progress from its incorporation in 1639 to

the present day. Citizens and those outside most closely connected with Sandwich history will be invited to participate in broadening the scope of our classroom projects. Constructive suggestions relating to the celebration of this event will be greatly appreciated and the school stands ready to contribute its share in making the tercentenary a memorable one.

Conclusion: A comprehensive and exhaustive consideration of the problems of our school organization is not possible in the limited space of this report. Any further information, however, which might prove enlightening to the citizens of Sandwich our department will gladly furnish.

In closing may I take this opportunity to express my deepest appreciation to you, for your faith and untiring leadership; to the teachers for their splendid spirit of cooperation, and their innate fineness of character which reflects itself in the lives and attitudes of our pupils; to the school committee for their conscientious direction in maintaining the high level of efficiency of our school; and to the parents and patrons for contributing wholeheartedly toward making our school the finest possible.

Respectfully submitted,

OWEN B. KIERNAN.

School Physician's Report

Dear Mr. Peebles:

Physical examinations were made of all new pupils and vaccinations were done on each. Since my last report toxoid injections were given to those pupils who had the parents' permission for its administration.

The older children were re-examined and it was found that about thirty showed some degree of nutritional defect. An increase in tonsil cases was present and about ten cases showed some faulty heart condition but none of these was serious.

A few cases that required orthopedic treatment were referred to the crippled children's clinic at the Cape Cod Hospital.

The school nurse and the teachers have been most vigilant in watching for evidence of sickness or contagion and in referring the children for examination.

Very truly yours,

ROBERT F. GRANDFIELD, M. D.

Commencement Exercises

CLASS OF 1938

Rakoczy March, Hungarian Melody	Shawme Orchestra
Processional	Mr. William Toolas
Invocation	Reverend John Trout
Selection from "The Merry Widow"	Shawme Orchestra

Selectmen's Report

to the citizens of the Town of Sandwich:

In the year that marks the three hundredth anniversary of the incorporation of the town of Sandwich mention should be made of the one distinctive contribution which the old Sandwich made to the artistic and economic life of the nation. All over the country today reference to Sandwich turns the conversation to the subject of Sandwich Glass.

The Glass manufactory at Sandwich was established in the year 1825 as the private enterprise of Deming Jarves, a pioneer in glass manufacture in Boston. Later, as a corporation, under the name of the Boston & Sandwich Glass Works, it operated until 1888 when it was closed permanently by a strike. At the peak of its prosperity it employed 500 men and women. All the glass made in this factory during the 19th century and now in existence commands a high premium.

During the early days Jarves associated himself with Edmund Munroe, treasurer of the New England Glass Company, and William Stetson, in order to raise the necessary operating funds; but it was not until the spring of 1826 that the business was incorporated as the Boston & Sandwich Glass Works with officers as follows: Samuel Hurst, clerk; Samuel P. P. Fay, president and director; Deming Jarves, agent; Edmund Munroe, treasurer and director; Andrew T. Hall, director; Benjamin Sewall, director. This little group of men, convening at the Exchange Coffee House in Boston on April 19, 1826, though they knew it not, established Sandwich, Cape Cod, for all time, as the natural national location for scientific glass making. Under the act of incorporation and terms of sale they took over all the property of the glass manufactory that had been established by Deming Jarves, including the stock in the store which had been conducted for the convenience of the workmen, and consisting of West Indian, domestic and foreign goods including 10 barrels of flour, 86 lbs. of cheese, 29 yards of cosinette, 114 gals. of rum, and 114 gals. of cider. Jarves had caused to be erected a number of houses for the workmen, later to be sold to them on an installment basis. He had established barns for the Company's teams, a general store, a butcher shop, and even essayed a gas-house to supply the homes with gas.

The following facts were found in an old record kept by Charles Waterman, an official in the business department. He signed his writings "Aqua Homo". The corporation finding its investment a profitable one, enlarged the buildings and the facilities for the manufacture and embellishment of glass. It developed means of mixing its own lead and refining its crude materials, and also devised better conveniences for the transportation of its fuel than the bull-wagons of the day. These improvements were accomplished at an expense of "from three to four hun-

dred thousand dollars", taken out of actual earnings of the Company aside from regular dividends which, with the exception of a few years had been regularly paid. The actual expenditure for labor alone amounted to several million dollars. The greater part of this was expended by the town itself, furnishing means of support to a large number of men, greatly aiding the financial operations of the place. The industry prospered for more than half a century. Sandwich was a trading center, a live and prosperous town. The Corporation, from the limited beginnings of Deming Jarves' personal enterprise, with a small eight-pot furnace, each pot of 800 lbs. capacity, with a weekly melt of 7000 lbs., and a yearly production valued at \$75,000, and giving employment to 70 workers, was expanded in a short time to four large furnaces of 10 pots each, with a weekly melt of more than 100,000 lbs., and an annual production valued at \$600,000, and an increase from 70 to 500 workers. It is estimated that during the half century the plant was operated over \$30,000,000 circulated in Sandwich, and in those days a million dollars was a colossal sum. Even in our own day the Boston & Sandwich Glass Works would be rated as no small enterprise.

Jarves, in his choice of a site, had weighed practical possibilities. Poor as was the passageway by water for the little packet-boat "Acorn" compared with Cape Cod's waterway of today, he saw in it transportation facility. He may have had the availability of sand in mind also, but a navigable tide-river and vast woodlands for fuel were the main reasons for his selection of a location.

Jarves and his associates were wise trade competitors. In times of less demand and low prices the factory was run at full capacity, and when prices rose they had plenty of glass on hand that had been manufactured as cheaply as had that of the competing trade. They employed no salesmen and did no advertising. They manufactured glass at furnace capacity and stored it, having sometimes as many as 20,000 packages of glass on hand. Then, twice a year, in the spring and fall, they shipped it to New York to jobbers. Later, salesrooms were established in Boston. There was always a ready market for Sandwich Glass. One auction sale, April 4, 1856, at the Boston & Sandwich factory, brought \$100,000 for that one day. The largest purchasers were from New York, Montreal and San Francisco.

The Jarves group, to be appreciated, must be viewed against the national background of that day. When Jarves came upon the manufacturing scene the United States was entering on that tremendous "Middle Period"—bank wars, bitterly controversial political issues, panics (the Boston & Sandwich Glass Works survived three); the West opening to the tune of lariat and pack-saddle. Men starved, fought, and scalped—if they saw the Indian first—their way into the wilderness. If Americans wanted to transport goods they had first to build a railroad, and they did. They needed a waterway, so they built the Erie; they needed an ocean cable

they achieved that, also—and all this in the space of fifty strife-filled years. Men of tremendous courage, striving to have and to hold an economic nation—and the manufacturer of that day was no small part of the courageous picture.

If in that day men could do what the Jarves group did, what might not a present day glass manufacturer achieve at Sandwich, in a nation established and with the scene all set for Sandwich Glass making by world-wide advertising of that famous product. Surely the day has come for the *manufacturing* renaissance of Sandwich Glass.

Notable among the Boston & Sandwich Glass Works' production are: the beautiful overlay lamps, featuring Sandwich's golden ruby, sapphire, and emerald. These lamps are still in demand at phenomenal prices; alphin candlesticks—a pair in "vaseline" yellow commands its price; in ornamental glass there were such things as sapphire jugs with flint handles; ruby vases with spiral flint-glass ribbons; paperweights suggesting in form and color the millefiori of the ancient Venetian glass makers; later came the beautiful engraved decanters, goblets, wines, and finger-bowls. Glass of various names was manufactured: snake skin, alabaster, beachblow; vassamarine, opalescent, silvered, threaded, and many more. Later, when pressed glass came in to meet the demand of trade, Jarves and his men would have pressed glass at its best—hence the "lacey glass" development—all forms of tableware and ornamental dishes in this dainty strous pattern glass; and because Deming Jarves was a nationalist he commemorated the events of the Nation in cup-plate glory—the Cadmus, the LaFayette, Bunker Hill, Constitution, Log Cabin, Henry Clay, and countless others, now rejoicing the hearts of lovers of glass.

After 1865 a Glass Cutting department was established. Nehemiah Ackwood was the chief expert in this. Later, when etching became a matured department, William Talbot and Frank Lapham became known artists in this line.

When Deming Jarves severed his connection with the Boston & Sandwich Company in 1858 the Jarves tradition of fine glassmaking carried on to the eighties. In 1872 Theodore Kern was making every known color at its best and was accredited the most expert glassmaker in the United States. Other expert glassmakers were: Philip Hinckley, Robert Matthews; John Lovett—these men made "hand-blown" glass for years. Christopher Muldoon was an expert in wine and champagne glasses; Nicholas Lutz made colored paperweights; William McHugh, Michael and James Grady were experts in threaded ware; Benjamin Haines, William Kern, Joseph Marsh, and Edward Haines were all-round glassmakers; Luther Drake specialized in glass door panels; Thomas Martin made whimsical things such as colored glass pipes, canes, hats. Other highly listed names in Sandwich glassmaking are Hiram Dillaway, Henry Kern, Frank and Henry Lapham, John Nokel, Edward Collins, Thomas

Dean, Peter and Patrick Swansey, Adolph Bonique, Freeman Swift, and Patrick Mahoney.

Henry Spurr was general manager of the plant from 1880 to 1887 and had been with the Company for forty years beginning as a clerk at seventeen. George LaFayette Fessenden and William Kern were superintendents with Mr. Spurr; James D. Lloyd was color-expert and had charge of the books, Charles Waterman officiated in the business department.

The question is often asked: "Why is it, if this old Sandwich Glass is of such unique and superior quality that it is known and prized all through the civilized world, and if the formulas and processes used in its manufacture are still known, that someone does not capitalize the situation and begin again to turn out the identical product that has made the town famous?" The answer is that unquestionably in the near future some capitalist with vision will do just this thing. Ordinarily many thousands of dollars have to be spent in advertising before an article can gain a large market; but in the case of Sandwich Glass this advertising has all been done and without cost. The romance of the situation irrevocably establishes Sandwich as the only location where this development can be profitably made. Who will do it and when? The answer lies in the future, probably the not-distant future. As soon as the manufacturer with the knowledge, initiative, and money appears, the problem will be solved, and Sandwich will regain an important position in the economic world.

In addition, we feel it is proper to include such comments and recommendations as in our opinion seem pertinent, in order that a clearer understanding may be had of town affairs and municipal problems.

Up to recent years, it has been a requirement that the Selectmen should meet each Saturday morning between the hours of nine a. m. and twelve noon, during which time the business of the Town was usually completed until the following Saturday. This is no longer true.

It is necessary now for the Selectmen to be in almost constant attendance to handle the mass of business and municipal correspondence directed to their attention.

Early in the year, tragedy entered our midst in the form of a disastrous forest fire which burned over thousands of acres of woodland taking as toll the lives of three men and injuring many others. With profound respect, we pause to do homage to the memory of—

THOMAS ADAMS

GORDON KING and

IRVING DRABER

who sacrificed their lives as firemen in the performance of their duty.

It became necessary as a consequence of that fire for your Selectmen to fix the responsibility for the disaster and we succeeded in charging the Commonwealth with the burden of making financial reimbursement to the widows of the deceased firemen of Sandwich after several legislative hearings. We are grateful for the splendid cooperation we received in arguing our case, from both State and local authorities. There is a second bill pending in the legislature, which we have introduced, having for its purpose the reimbursement of the Town of Sandwich for the financial loss because of payments to the fire forces who assisted in controlling the blaze. Naturally, this unforeseen catastrophe created a substantial overdraft which we trust will be met by a favorable action of the State Legislature this year.

The State Forest, formerly known as the Shawme Forest in Sandwich, was re-dedicated following the untimely death of Lincoln Crowell and is now known as the Shawme-Crowell Forest.

A reorganization of the Police Department was made in accordance with the provisions of the General Laws.

An urgent effort is still being made to create a more general enthusiasm relative to economic improvement for Sandwich.

The hope of building avenues of employment by sponsoring projects to relieve the welfare burden through the winter months was promulgated. Projects were prepared, approved and returned for operation. On November 10, 1938 however, the Federal Works Progress Administration at Washington declared a moratorium on all certification of W. P. A. labor, leaving us with the projects, but without certified labor for their operation. Hearings were held with the authorities at Boston, and correspondence sent to Washington in an attempt to alleviate this situation. At this writing we hope for an early solution.

The New York, New Haven and Hartford Railroad Company without notice to us, attempted to install electrically controlled traffic devices at the Jarvis street, Liberty street and East Sandwich Railroad crossings; and upon such installation, the crossing tenders now guarding those crossings were to be discharged. We vigorously protested this procedure and fought hard to retain these manual controlled locations as a safety measure at hearings before the Board of Public Utilities at Boston. We are awaiting a decision taken under advisement by the above named body.

Considerable effort has been expended and is still being expended to force the Federal Government to recognize the need for an adequate yacht harbor at the canal. Much investigation has been made and data prepared and submitted. At this meeting the War Department is studying the material submitted by the Selectmen on the point, and we trust our efforts will be rewarded by a satisfactory decision.

After some study, we are unanimous in the opinion that the By-Laws

relating to Over-night Cabins and Trailers adopted at the last Town meeting are in need of re-vamping to more adequately meet the requirements of our Town. In their present form we find them ambiguous and difficult to judiciously enforce because of the form in which they were drawn.

It is with pardonable pride that we point to the much needed improvement now being made at the Town Offices. Sanitary conditions there were unspeakable. We trust that in this our Tercentenary Year you will grant sufficient funds in conjunction with the present projected grant by the W. P. A. for labor, to carry out the entire plan in order that you may share with us in the pleasure that comes from working in a more modern and sanitary environment. Particularly when we consider the opinion of many visitors who may judge us from appearances.

Several months ago, we urged a group of local business persons to meet with us for the purpose of accelerating economic betterment for our Town. This meeting developed several practical ideas, but did not go far enough to produce any definite results. A member of our Board inquired "Why do most summer visitors pass through our Town without stopping only to find locations in towns farther down the Cape"? The answer to that question was unanimous: Enough people do not know or hear about the beauty and the natural resources Sandwich has to offer the summer vacationist. Until they do we can expect no great influx of people in summer. It was also agreed that there are insufficient housing facilities to attract summer or year round residents. In conjunction with the latter point of view, it was suggested that the owners of prospective development areas were offering their holdings at too high a price, thus stifling building activity. It is manifest that we are not obtaining our just share of the Cape summer business. To alleviate such a condition, at least in part, it is necessary for us to extol the virtues of Sandwich to our friends and acquaintances all over the country. Be a booster. Don't knock Sandwich. Only through a concentrated effort on the part of everybody, can we hope to increase sales for our merchants, fulfill our civic obligation, aid our churches, relieve our tax burden and create social and economic balance. We realize as your executive officers there is room for vast improvement. No sacrifice is too great to merit our earnest efforts to bring about better days for the citizens of Sandwich. By our joint efforts, it can be accomplished.

Trusting that the coming years may bring a definite betterment in our economic development, and particularly with respect to the financial and economic status of our citizenry we welcome your advice and assistance. Only by a supreme effort and a continuation of the same type of cooperation we received thus far can these things be realized.

In return for your indulgence we pledge our best efforts that all of us may share in the fruits of a common enterprise, a better place for all of us to live—Sandwich.

We herewith present for your consideration our annual report of receipts and expenditures for the year ending December 31, 1938.

Respectfully submitted,

GEORGE A. MOONEY,
FREDERIC S. POPE,
GEORGE R. MEIGS,

Board of Selectmen.

TERCENTENARY

Sandwich Three Hundred Years Old

To the Citizens of Sandwich:

The Selectmen know that you will wish to have this year's Town Report contain some material bearing on the early history of the Town. Bound copies of these reports are preserved, so it is fitting in this Tercentenary year to portray a few of the important beginnings in Sandwich. Mr. Thomas F. Kelleher, Chairman of the Tercentenary Committee, and Miss Helene L. Montague, Chairman of the Publicity Committee, gladly co-operated, and prepared the following material, which should be of special interest to our younger generation. They ask us to record here the fact that the formal celebration will take place on August 17, 18, and 19, 1939, with appropriate religious exercises in all churches on the preceding Sunday, and to ask all former residents of Sandwich to so plan their vacations that they may come "back home" for those days.

GEORGE A. MOONEY, Chairman
GEORGE R. MEIGS,
FREDERIC S. POPE,

Selectmen.

It is fitting to recall the active part Sandwich and neighboring towns took in the struggle for independence. Hon. Abraham Holmes described as follows the stirring events that took place in the fall of 1774:

"The British Parliament, in its mad career, had assumed a right to mutilate the charter of Massachusetts, which was a solemn contract between the king on the one part and the Province on the other. Parliament was not a party to it, nor was it made under any authority from them, or with any reference to them, and with it they had no more right to interfere than had the Bonzes of Japan; but this authority Parliament assumed, and, by an Act, had taken from the House of Representatives the right to choose the Council—a right granted the Province by its charter; and had authorized the king to appoint the council by mandamus, and directed the sheriffs of the several counties to appoint the jurors instead of their being drawn, as was provided by law, from the jury box, by the selectmen.

After viewing the matter in all its aspects, it was agreed that nothing that might follow could be so bad as tame submission. As the Court of Common Pleas was to be holden in Barnstable on the first Tuesday in September, it was resolved to begin with that court, and prevent its sitting for the transaction of any business whatever.

Accordingly a considerable number of men from Middleboro, more from Rochester, and many from Wareham, repaired to Sandwich on the Monday preceding the time for the opening of the court, and there were joined by a large part of the population of that town. Dr. Nathaniel Freeman of Sandwich was unanimously chosen the conductor-in-chief of the enterprise.

On Tuesday morning the body marched to Barnstable, and were there joined by a considerable portion of the population of that town; making about 1,500 in all. Commissioners were then appointed to ferret out the disaffected among the people, and bring them to a renouncement in writing of their Toryism. The result was all signed, "recantations."

Colonel Otis, the chief justice, then addressed the people, inquiring, "Gentlemen, what is the purpose for which this vast assemblage is collected here?" and was answered by Dr. Freeman: "May it please your honor, oppressed by a view of the dangers with which we are surrounded, and terrified by the horribly black cloud which is suspended over our heads and ready to burst upon us—our safety, all that is dear to us, and the welfare of unborn millions, have directed this movement to prevent the court from being opened or doing any business. We have taken all the consequences into consideration; we have weighed them well, and have formed this resolution, which we shall not rescind."

The chief justice, then, calmly but firmly replied, "This is a legal and constitutional court; it has suffered no mutations; the juries have been drawn from the boxes as the law directs, and why should you interrupt its proceedings? Why do you make a leap before you get to the hedge?"

Dr. Freeman responded, "All this has been considered. We do not appear here out of any disrespect to this honorable court, nor do we apprehend that if you proceed to business, you will do anything that we could censure. But, sir, from all the decisions of this court, of more than forty shillings amount, an appeal lies; an appeal for what? To a court holding office during the king's pleasure; a court over which we have no control or influence; a court paid out of the revenue that is extorted from us by the illegal and unconstitutional edicts of foreign despotism; and there the jury will be appointed by the sheriff. For this reason, we have adopted this method of stopping the avenue through which business may otherwise pass to that tribunal,—well knowing that if they have no business, they can do us no harm."

The chief justice then said, "As is my duty, I now, in his majesty's name, order you immediately to disperse, and give the court the opportunity to perform the business of the county."

Mr. Freeman replied, "We thank your honor for having done your duty. We shall continue to perform ours."

The court then turned and repaired to the house where they had put up.

The next day the assemblage from the towns above, returned to Sandwich where they found that the disaffected had committed some outrages. The liberty pole in Sandwich had been cut down, and other offensive acts perpetrated. The perpetrators were soon arrested, who, after receiving a severe reprimand and paying the just value of the liberty pole, signing recantations, etc., were

liberated. This was the first act of the kind, and, I believe, there was never a Court of Common Pleas held under the king's authority after this time, in the Province; except in the town of Boston, where Governor Gage, with his troops, had it in his power to control.

There may be some who took part in this adventure that still live, besides myself, but I know of none, and it is probable that a large majority of the population of the county of Barnstable never so much as heard of the transaction.

While the people were proceeding in a body, they caused some offenders to sign the following:

Whereas the subscribers did most wickedly, maliciously and injuriously, being instigated by the devil and our own evil hearts, destroy the liberty pole in Sandwich on the evening of September 26th, current, whereby we have justly offended all of the friends of Liberty, Justice and Virtue, and have discovered our enmity to the Rights and Liberties of the People: We do therefore, hereby confess the fact, and are heartily sorry for it; and do promise never to do so any more, nor again oppose the cause of Liberty. And we hereby ask forgiveness of the town of Sandwich and all men—especially of those who erected the pole. As witness our hands this 28th day of September, 1774".

The Settling of Sandwich

By JONATHAN NORTON LEONARD

Three hundred years ago the Town of Sandwich received its charter, so this is a good time to look back and try to see what kind of people they were who settled here, what conditions confronted them, and what sort of life they lived in the earliest years. We do not know all we would like to know, for the records are scanty and drily official, but we know enough to give us a fairly good idea.

The Town was actually settled two years before it was granted its charter. The following appears in the records of Plymouth: "April 3, 1637, it is also agreed that these ten men of Saugus (now Lynn), viz., Edmund Freeman, Henry Feake, Thomas Dexter, Edward Dillingham, William Wood, John Carman, Richard Chadwell, William Almy, Thomas Tupper, and George Knott, shall have the liberty to view a place to sit down, and have sufficient lands for three score families, upon the conditions propounded to them by the governor and Mr. Winslow." The settlement was made that same summer

by these ten men and fifty others whose names have come down to us. They were:

George Allen	Henry Ewer	Mr. Leverich
Thomas Armitage	John Fish	John Miller
Anthony Besse	Jonathan Fish	William Newland
Mr. Blakemore	Nathaniel Fish	Benjamin Nye
George Bliss	John Friend	Mr. Potter
Thomas Boardman	Peter Gaunt	James Skiffe
Robert Bodfish	Andrew Hallett	George Slawson
Richard Bourne	Thomas Hampton	Michael Turner
William Braybrook	William Harlow	John Vincent
John Briggs	William Hedge	Richard Wade
George Buitt	Joseph Holway	Thomas Willis
Thomas Burge	William Hurst	John Wing
Thomas Butler	John Joyce	Mr. Winsor
Tho. Chillingsworth	Richard Kerby	Mr. Wollaston
Edmund Clarke	John King	Anthony Wright
George Cole	Thomas Landers	Nicholas Wright
John Dingley		Peter Wright

Many of these brought their families, so the population that first winter of 1637 must have been something above one hundred.

The Cape was covered with a solid forest then, mostly of tall white pine which extended down to high-water mark. Town Neck, Scorton Neck and Sandy Neck were all heavily wooded. Practically the only open places were the salt marshes and the small scattered clearings of the Indians, most of which were probably nothing but places where the great trees had been girdled and killed, allowing the sunlight to reach the ground.

It was not an unknown or mysterious forest like the one which stretched off toward the west. Even before the arrival of the Pilgrims Cape Cod had been much frequented by adventurers, traders and fishermen of various nationalities. Its shape made it easily accessible to all who travelled the sea, and its Indians were generally friendly. Their corn as a matter of fact was what kept the Pilgrims alive during the first few winters. Foraging on Cape Cod seems to have been one of the major activities of the Plymouth people. We can be sure that they had explored every harbor and creek and Indian village long before 1637.

There were no permanent settlers as far as we know, certainly no official ones. In 1627 the Plymouth people built a trading post on Herring River, probably one or more low, thatched sheds like the other buildings of the period. The "servants" left temporarily in charge had instructions to keep down the overhead by raising corn and pigs, but they made no attempt at permanent settlement.

On the Cape there were no isolated frontiersmen cutting homes from the forest far ahead of the regular settlements. This is because there were no English-speaking frontiersmen in existence at the time. The type had no

developed yet. The settlers of Sandwich were mostly part of the great wave of Puritan immigration which began with the founding of Massachusetts Bay Colony. They came fresh from civilized England and knew nothing about the wilderness or its ways. Many of them were city people. The rest had lived in neat, ancient villages and tilled land which had been under the plough since the days of the Romans.

If we could meet these people we would probably find them much more like ourselves than like the Daniel Boones and Davy Crockets of a much later date. Most of them were literate. Some were highly educated. They were accustomed to comfortable houses, well-stocked stores, police protection and contact with the world. They knew little about hunting, fishing or woodcraft. Some of their descendants became true frontiersmen, learning from the Indians how to get a living in the wilderness far from civilization, but this first generation had no such knowledge. So they probably set out from Plymouth that spring of 1637 with many misgivings, many long long prayers, and no few regrets that they had ever left England.

The least they could do was stick together, make no move alone, and this they did. Their organization, as a church not a town, had been perfected before they set out. The leaders were William Leverich, the Minister, and Edmund Freeman, the promoter of the expedition. It was not a democratic group. The class distinctions of old England were rigidly maintained, with a wide gulf between "free men of the Town" and "others."

There was also a very definite financial arrangement along the lines of a modern stock company. Each man supplied a certain amount of money, goods or services and expected favored treatment in proportion to his investment. At the bottom of the ladder were the "bond servants" who had paid for their passage and outfitting by agreeing to work for nothing for several years.

The expedition certainly arrived by sea, in a number of small clumsy sail-boats called pinnaces or shallops loaded deep with the tools, seeds and supplies which would be needed most urgently during the first few months. They probably landed at Scusset Creek near the present mouth of the Canal. This was the logical place because it was on the well-known trade route which led across the Cape into Buzzards Bay and south to New Amsterdam. Later on they used Town Creek and Scorton Creek, both of which were considered navigable rivers for the boats of that day.

When they arrived, they probably camped for the night as best they could and scattered off the next morning on excited scouting trips, returning to begin the long acrimonious discussion about the division of the land. That was the first burning question . . . where each family should settle, how much land it would get and how good the land.

Strangely enough the land considered most desirable was the salt marsh, now almost worthless. There was a very good reason for this. The settlers intended to live largely off their cattle, as farmers did in England, but the only grass in Sandwich was on the salt marshes. Not only did the forest blanket solidly every bit of upland but no grass grew even in accidental openings. All

our familiar modern grasses are immigrants, generally from Europe. Native upland grasses may have thriven elsewhere in New England, but in Sandwich the only natural pasture was below highwater mark. It was many years before the stump-filled clearings were sodded with imported "English grass."

The coveted marshes were not divided equally but according to a complicated scheme which considered a man's "necessity and ability" on the one hand and his "estate and condition" on the other. No householder got less than one acre of salt "meadow" in a convenient location even if he did not possess material assets, but one man got as much as forty-two acres and another twenty-eight. Upland was parcelled out more lavishly because there was plenty of it. The area between Shawme River (Town Creek) and Moonoonenususset River (Scusset Creek) was set aside as common land. Some, not all, of the inhabitants received the right to pasture their young cattle on it. There was another common at Scorton. The division of the land was not finally settled for years. It was the cause of infinite squabbling, and the question was often aired before the General Court of Plymouth.

The settlers of Sandwich did not fear attack from the Indians so they did not herd together in a stockaded village as the Plymouth people had done. They scattered all the way from Scusset (Sagamore) to Scorton. Most of them built on the upland close to the edge of the marsh, probably choosing a spot near one of the numerous springs which come to the surface in such places. Their first houses were mere shelters of marsh turf roofed with thatch which the more successful replaced a few years later with slightly larger cottages of hewn plank like those in Plymouth. They never built any cabins. This type of construction had not been developed, or at any rate was unknown to the English settlers.

If we could set ourselves back three hundred years and stand near the end of the present plank walk, we would see very few signs of civilization although the town had already been settled two years. The marsh would be divided into irregular sections by fences or markers. On shore the tall pine forest would still dominate the scene. Thinly scattered along its edge would be groups of haystacks with a thatched house which looked like a haystack itself. Around it would be pig-styes, cattle pens and growing corn. The clearings were still small and full of great stumps. The meetinghouse was a thatched building about twenty feet square with shutters for windows. It was not shingled until 1644 or later. The minister lived with his family in a one-room house until 1650 when the town appropriated five pounds for board partitions.

The people themselves were not all high-minded idealists fleeing from religious persecution, as the school-books used to teach. There was undoubtedly a nucleus of men who genuinely wanted to live in a place where their peculiar religious opinions would be shared by the majority, but so rigid were their beliefs and so hair-splitting their theology that it proved almost impossible to find companions who would or could remain orthodox for long. Some of the first settlers were quickly discovered to be "unfit for church society" because they were tainted with heresy or had connections with some obscure

sect of forgotten name. Many others were not especially religious, merely people who wanted to make their fortunes in the new world. There were black sheep too, and rolling stones who drifted on in a year or two.

In general they must have been a rather easy-going, tolerant group for that day and place. They had not been settled two years when Plymouth began lecturing them for laxness in deporting the theologically undesirable. Their tolerance apparently became notorious, for the violently persecuted Quakers headed for Sandwich and were given safe refuge. Even love found an unapproved way (as early as 1642) and was not punished too severely. On the whole it is probable that most of us today could drop back to the Sandwich of 1639, live in one of the thatched huts, and get along with the people without much trouble about our customs or religious beliefs. Even three hundred years ago Sandwich had room for a great deal of human variety.

Town Auditors' Report

We, the undersigned Auditors of the Town of Sandwich have examined the accounts of the Treasurer of the Town, Frank L. Howland and the accounts of the Trustees of the Weston Memorial Fund, and find them correct and properly vouched.

ALANSON W. PARKES,
JOHN FOXCROFT CARLETON.

Town Clerk's Report

BIRTHS RECORDED DURING THE YEAR ENDING DECEMBER 31, 1938

- Feb. 5 Beverly Marie Heald, daughter to Fred Gardner Heald and Gladys Elizabeth (Dentz).
- Mar. 4 Charles Milton Chase, Jr., son to Charles Milton Chase and Frances May (Thomas).
- Mar. 22 Eileen Marie Purdy, daughter to Douglas L. Purdy and Elizabeth (Linahan).
- Mar. 24 Virginia Anne Bazzinotti, daughter to Carl Edmund Bazzinotti and Alvira Rose (Quattromini).
- April 10 Mabel Frances Lake, daughter to Robert Charles Lake and Nettie (Smith).
- May 9 Roy James Cahoon, son to Roy J. Cahoon and Hazel M. (Purdy).
- May 29 Judith Marie Elvander, daughter to Edward Elvander and Marjorie (Decker).
- June 21 Jimmy Stenroos, son to Wiljo John Stenroos and Jennie Lillian (Elvander).
- July 11 Paul Edward Quirk, son to George Edward Quirk and Sarah Malvina (Parks).
- July 29 Richard Alan Crocker, son of Alvan Hall Crocker and Elsie May (Macomber).
- Sept. 14 Sally Hendrickson, daughter to John Hendrickson and Mary (Morrow).
- Nov. 10 David Henry Beauchemin, son to Arthur George Beauchemin and Alice Gertrude (Gibbs).

- Nov. 19 Jean Marie Schuster, daughter to John Schuster and Emily (Denson).
- Dec. 21 Jean Marie Tyback, daughter to John Tyback and Ruth Marie (Ellis).
- Dec. 31 Diane Theresa Hilliard, daughter to Walter Ellsworth Hilliard and Leontina Esther (Forni).

Delayed Returns

- Feb. 12 Francis Buckley, son to Michael A. Buckley and Margaret 1895 (O'Leary).
- Jan. 31 Elmer Kristian Johnson, son to Kristian Johnson and Anna 1906 (Lenna).

MARRIAGES RECORDED DURING THE YEAR ENDING
DECEMBER 31, 1938

- Jan. 1 Konstantin Deiman of Sandwich and Marjorie Baker of So. Hamilton, Mass.
- Jan. 15 Arthur G. Beauchemin of New Bedford, Mass. and Alice G. Gibbs of Sandwich, Mass.
- Feb. 10 Charles Paul Reggiani of Plymouth, Mass. and Elenor Conadi (Sorenti) of (Sagamore) Bourne, Mass.
- Feb. 13 Robert Stanley Mitchell of Sandwich, Mass. and Marjorie Louise Cahoon of Providence, Rhode Island.
- Feb. 26 Charles Gilbert Whitmore of Sandwich, Mass. and Hilda Emily Medeiros of (Marstons Mills) Mass. Barnstable, Mass.
- April 19 Alexander John Francis Macquade of (Osterville) Barnstable and Rita Ann Gannon of Sandwich, Mass.
- April 30 Alfred H. Mayer of Yonkers, N. Y. and Barbara M. Wholley of West Haven, Conn.
- May 28 James A. Bazzinotti of Sandwich, Mass. and Cecille Gwodz of (Hyannis) Barnstable, Mass.
- June 27 George Edmund Currier of Sandwich, Mass. and Katherine Eleanor Green of Newton Highlands, Mass.
- July 10 William H. Barker of Sandwich, Mass. and Elizabeth W. Clark of Medford, Mass.
- Aug. 13 Daniel A. Campbell of New York, N. Y. and Rachel Ellis, New York, N. Y.
- Sept. 3 Niilo R. Ahonen of Sandwich and Ella L. LaPlante of (Hyannis) Barnstable, Mass.
- Sept. 24 Norman S. Thomas of Boston, Mass. and Eleanor K. Shaw of Sandwich, Mass.

Sept. 24	Lenn M. Davis of (Forestdale) Sandwich, Mass. Elaine Loy of Camas, Washington.
Sept. 24	Charles Jones Green of Boston and Edith Belches Pratt of Boston.
Oct. 2	Howard John Carlson of Hartford, Conn. and Margaret Mary Russell of Sandwich, Mass.
Oct. 8	Niilo Johannes Toolas of Sandwich, Mass. and Emily Doris Crocker of Barnstable (Osterville) Mass.
Oct. 22	George M. Melzard of Sandwich, Mass. and Emma S. Shaw of Sandwich, Mass.
Oct. 27	Roy Pigott of Sandwich, Mass. and Elizabeth Rankin of Barnstable (Osterville) Mass.
Nov. 26	John A. Erickson Jr. of Sandwich, Mass. and Doris A. Sullivan of Sandwich, Mass.

Delayed Return

June 4 1920	Henry Winthrop Webber of Beverly and Mary Elizabeth Robertson of Framingham.

Report of Board of Public Welfare

To the Citizens of Sandwich:

We call your attention to the financial reports included in the Selectmen's Report covering Public Welfare, Old Age Assistance, Aid for Dependent Children and Soldiers' Relief. Expenditures for Public Welfare are within the appropriation, and the surplus in the Federal Old Age Assistance account more than offsets the deficit in the local account. Unfortunately payments received from State of Massachusetts cannot be shown as a direct relief credit, so the actual cost to the Town does not stand out clearly.

E. R. Van Buskirk, Surveyor of Highways, has co-operated with the Board of Public Welfare, to the end that men might receive wages instead of relief.

Our voters should be interested in comparative figures, showing Relief trends:

Total Expenditures for Welfare

1929....\$3,979.64	1934....\$ 8,613.69
1930....\$4,059.63	1935....\$10,990.32
1931....\$7,229.19	1936....\$14,483.99
1932....\$9,989.58	1937....\$23,190.93
1933....\$8,704.63	1938....\$28,967.51 (71¼ times 1929)

Appropriations and Expenditures 1937-1938

Public Welfare

	1937	1938
Appropriation	\$4,500.00	\$5,500.00
Expenditures	6,200.98	5,403.30
Balance	1,700.98 (Deficit)	96.70

Old Age Assistance—Town

Aid for Dependent Children—Federal, State and Town

	1937	1938
Expenditures	\$983.57	\$2,563.00

On December 31, 1938, 62 individuals were receiving Old Age Assistance in Sandwich, and 7 mothers and 13 children were receiving Aid for Dependent Children. In addition, during the year 1938, 48 households, including 169 persons, received benefits from the Welfare Fund, which was raised locally. One family received a small amount of Soldiers' Relief. Commodities were also distributed, not only to many of the 254 residents mentioned above, but also to many additional families, enabling them in some cases to carry on without applying for direct relief. It is conservative to state that well over one sixth of our population received relief in some form, and if W. P. A. wage payments were construed as relief the proportion would be much higher.

Roughly, the amount that had to be provided for relief through local taxation in 1938 amounted to about \$3.80 per \$1,000 of valuation in the Town, which would have been over \$10.00 per \$1,000 if there had been no assistance from State and Nation.

A recent comparative survey shows that while in 1900 only 3.5% of our Massachusetts population received any form of public assistance, the 1936 figure was 23%, almost one person out of four. The man who conducted the survey sees "little hope of a return to the comparatively small relief problem of 1900, even though depression becomes nothing but a bad memory".

Some believe that Sandwich is accepting too complacently the new order of things as revealed in the relief figures cited above. Historic New England could boast of the initiative, industry and thrift of her people, and the old Sandwich had a high rating. Admitting that the going today is much more difficult, a defeatist attitude is to be deplored, and constructive plans must be formulated and carried into effect which will tend to reduce the relief load and make us again a self-supporting and independent community.

We must work for the establishment of small industries in our town, must canvass the industrial possibilities around our end of the Canal, must get our share of summer residents, and last but not least must give our youth an education which will qualify them for subsistence farming and profitable use of our land which is now largely going to waste. No one will get rich farming on Cape Cod, but a young man with a cellar filled with products of the soil, the result of his labor, can forget prevailing prices of these commodities, as he has to be interested only in their

food value to him and his family, can work at times for wages when there is an opportunity, following the Henry Ford plan, can scorn relief, and can help restore his town to its former position of vantage. But this cannot be done unless we modify our system of education to meet the local needs, giving our young people added respect for manual labor and the kind of knowledge which will enable them to make a living without leaving Cape Cod.

Our high school is so small that the State questions the feasibility of maintaining an agricultural course in it, of the type Barnstable and Falmouth have, but it could be established, with the State paying the large part of the cost, provided an enrollment of 12 or 15 pupils could be maintained continuously. Of course this would be an addition to, not a substitute for, preparation for college. There are ways of providing relief from Relief.

We are convinced that most able-bodied Sandwich dependents would far rather work than accept aid. Unfortunately, here and everywhere the public spotlight is thrown on the exceptions. Idleness and want are attributable more to lack of available work than to lack of interest. Therefore restoration of opportunity is the great need.

W. P. A. money continues to be indispensable. Without it the Welfare Board would be faced with a far more serious situation. If this money could be dispensed more liberally during the winter months, and the summer allotment cut accordingly, the results would be even more satisfactory. The Cape Cod Selectmen have told the W. P. A. Administrator that the presence of a large summer population eases the burden in that season and makes our summer need less than it is in the cities, while the reverse is true in the winter, but as yet no change of procedure has been conceded. Instead, the refusal to certify our men, under an economy curtailment order in November, has produced a complete reversal of what we think the seasonal arrangement should be.

Respectfully submitted,

GEORGE R. MEIGS, Chairman
THOMAS F. KELLEHER

Sandwich has received during 1938, or will receive later from the State and other cities and towns, reimbursement against General Welfare expenditures to the amount of \$2,093.68.

For the period of one year and six months ending December 31, 1938, the Town has received or will receive later, reimbursement on account of Aid to Dependent Children to the amount of \$981.35.

During 1938, against a period of one year and eight months, the Town received or will receive reimbursement from the State and other towns against Old Age Assistance expenditures of \$11,846.09.

These sums do not become available for use by the Public Welfare Board, but go into the general treasury of the Town.

Selectmen's Report

To Our Citizens:

Another milestone has been reached since the publication of last year's report celebrating the three hundredth anniversary of the incorporation of Sandwich as a town.

In that report, the Selectmen sought to set out those matters of civic interest with which you should be familiar, and relating to which your cooperation and advice were requested.

We now submit our report for the year ending December 31, 1939 and if we take a measure of pride in any accomplishment during the past year, it is only with the understanding that your splendid support and advice given unselfishly, made it possible. In the pages directly following this report will be found detailed statements covering expenditures of the departments.

Tercentenary Celebration

The memories of the celebration of last August are still vividly recalled to mind. The Committee in charge deserves the highest praise. This event brought visitors from all parts of the Cape and from many Massachusetts towns. It was estimated that over six thousand persons witnessed the boat carnival and fire works display on Shawme Lake. No better form of civic advertisement could have been conceived. The results are still manifesting themselves in the form of requests for information about our Town.

Town Offices

We hope that the citizens of Sandwich will inspect the new offices, and see for themselves what the \$3,500.00 appropriated by the Town, with the larger Federal contribution added, has produced. They will find that the entire first floor of the old building has been thoroughly renovated and modernized; that modern lavatories have been installed, that structurally the building, which at an earlier date had been condemned, is now safe; that the quarters are now heated with an oil-burner hot-water system; that the Town now has a room to be used solely for voting, that fine offices have been allotted to the Selectmen, Town Clerk, Treasurer and Tax Collector and to the Assessors, and the old inadequate vault has been replaced with one nearly twice as large. All of the decorations of the main office are tied in with the fact that 1939 was our three hundredth anniversary.

We extend our sincere thanks for the practically unanimous response to our appeal for funds to make this most needed improvement. We would be

delinquent in our duty if we failed to extend to the Foreman of construction under the W.P.A. project our deep appreciation for his work and the many courtesies extended by him outside of the requirements of his position. To those who contributed their time and efforts as well as certain mechanical devices which they lent free in order that we might keep down expenses, we are deeply grateful. To those who gave of their artistic talents without compensation, we are not forgetful.

The Town Office is a monument to that most necessary quality of progress cooperation. You share with us in the reality born of an ideal.

Yacht Basin

Army Engineers met May 10, 1939 with the Selectmen and the citizens of Sandwich to hear a petition filed with them having for its purpose the increase of the size of the Yacht Basin.

After consideration, the War Department decided the Basin was of sufficient size to meet the present requirements, but did not definitely close the door to a subsequent argument if a valid one should arise for future submission. Perhaps this coming year may develop adequate reasons for asking another hearing.

Spring Hill Beach Erosion

Residents of the Spring Hill Beach section of our town called on the Selectmen and urged immediate relief from the growing danger of erosion of sand in front of their cottages. About fifteen persons gathered with the Selectmen at the cottage of one of the petitioners where an examination of the premises was made. We found evidence of substantial loss of shore front property for a long distance in front of these cottages and in some instances there was definite need of protective measures at once to prevent the complete loss of valuable assessable income to the town.

Later a hearing was held at the Court House at Barnstable in conjunction with the Public Works Department where it was suggested by Commissioner Beale that the State would assume half the cost of the erection of a jetty or jetties, the balance of the cost of which should be divided equally between the County and the Town. On November 11, 1939 twenty of the real estate owners and petitioners attended a hearing held in the Town Offices, most of them making the trip from Boston, to show their interest. They claimed that they pay taxes, support local churches and stores, and receive little in return, and destroyed, their houses under present conditions will not be rebuilt. They stated they knew of others who are ready to build who will not dare to pro-

ceed unless assured of protection. It was suggested that necessary improvements could be stretched over a period of several years, by doing a proportionate part at a time. An article will be placed in the next Town Warrant seeking a solution of this important problem.

Town Records Project

About eighteen months ago, after much research, a project was approved and started, having for its purpose the classification and tabulation of Vital Statistics and Town Records from the earliest days to the present time. We felt that this would be a most valuable contribution to future generations and would systematize and index the most valuable historical data of Sandwich for ready reference.

It would serve as a time saver for Town Officers, and furnish another forward step in conjunction with the newly renovated Town Hall and Vault. Shortly after it began, the Federal authorities closed it down. A new project was drawn and submitted for approval several months ago and recently the second project got under way. We trust it will continue to completion.

Finance Committee

No group in town government serves a more useful purpose than the Finance Committee.

To them is left the duty of exercising the judgment and discretion so vital to a well balanced community in the consideration of departmental requirements.

This group should be drawn from citizens in various walks of life in order to insure a well rounded perspective, and should be renewed from time to time to afford a more general familiarity with Town business.

With that in mind, the Selectmen feel a new board should be appointed for 1940 thus affording for others who may not be acquainted with the manifold duties of department heads or Municipal Corporation procedure an opportunity to serve their town in a most important office.

Economic Conditions

Ever alert to the possibilities that may produce a basis of income for our citizens, the Selectmen have held many conferences with representatives of business, members of the Agricultural Extension Service and the Department of Education, Division of Vocational Education, in an effort to acquire by an exchange of ideas some basis upon which, if even on a small scale, our economic

problems might be helped, if not entirely solved. Realizing as we do that fifty years of economic decadence cannot usually be overcome in one year, we approach these discussions openly and in the light of our present requirements, hoping that out of them will come, some day soon, a feasible solution. When that solution comes, all will share in the common benefits. We do not subscribe to the theory that changes are not needed. If it were possible to see into the future and anticipate events to come, it is doubtful if any of us would adopt such a complacent attitude. Ever changing is human progress. We go ahead or drop behind. Economically there is no standing still. There is advancement or retrogression and no middle road is known. The history of America is proof enough of that fact. As an integral part of the greatest nation on earth, we owe ourselves here in Sandwich our full proportionate measure of the good things in life. Courage, vision and cooperation made the United States what it is today. Courage, vision and cooperation can give Sandwich its place in the new order of progress.

Conclusion

If it can be considered a part of this report to comment in a few concluding sentences on general conditions in the world at large, and draw from these events one dominant characteristic, it is man's inhumanity to man. Selfish interests should not be included in the plans of men in places of public trust. Monetary considerations should not be the motivating object of their service. If it is, the community suffers; for a community can be no better than the men it elects to office.

No better example of this can be found than a perusal of the Boston Press of recent months.

A man who serves best is paid not in coin but in the estimation of his fellow men. A community however small can make a valuable contribution to civil government by the exercise of the principles of Christianity so lacking in this war-torn world. By the preservation of home life and the encouragement of home development here, we make a great contribution to peace and solidarity.

Should we not adhere to the examples set by those who believing in an Omnipotent God, conducted their lives accordingly and left behind them that heritage that time cannot erase—faith in God and love of neighbor?

“As long as there are homes to

Which men turn at close of day,

So long as there are homes where

Children are, where women stay,

If faith and love and loyalty
 Abide, across those sills,
 A stricken nation can recover from its ills."

Report of Board of Public Welfare

To the Citizens of Sandwich:

As predicted a year ago to the Finance Committee, the \$5,500 appropriation has proved inadequate and an overdraft of \$2,512.27 will have to be provided for at the March meeting in 1940. To sickness and death is attributable most of the increase over 1938 expenditures covering doctors' fees, hospitalization, board and burial. The cost of these items alone in 1939 ran to nearly \$3,500, illustrating how difficult it is to estimate the relief load in advance. Attention is called to the detailed list of expenses on another page of this report.

As we enter 1940 about forty men are working for W.P.A. and twenty-two who have applied have not yet been put to work. Twenty-six men in Sandwich are now receiving Old Age Assistance. This means that with those who are receiving general relief included, about one hundred of our men in Sandwich are forced to call on Government for help because private industry is not employing them. Estimating the number of men in town at 450 this means that 22% of them are either unemployed or dependent on Government for income. This is a sad commentary on our industrial situation in Sandwich, which would under present conditions be about the same if the prosperity of 1928 and 1929 were to return. Of course the percentage of men unemployed by private industry would be even higher if men who are idle but have adequate means were included.

You are asked to analyze the figures in the tabulated statement on another page covering all kinds of aid, Town, State and United States, and also Surplus Commodities and Works Progress Administration. The total is large and we may well question how long Democracy can proceed on such a basis, which is not characteristic of Sandwich alone. What can be done about it?

If Congress continues to whittle down the general W.P.A. appropriation Sandwich and other municipalities will have to find some other means of helping the families who now depend on it for a living, or else they will have to develop the means themselves. Some of our voters believe that all except the aged and the sick could make their own way if they had to, but they fail to point out specifically just how this could be done. Generalizations do not help much. It is easy to long for the return of a self-supporting Sandwich, but how can this be accomplished?

The number receiving Old Age Assistance has apparently reached its peak, so the cost in 1940 should be about the same as it was in 1939. This is also true with Aid for Dependent Children. The Federal Government has still further liberalized the law affecting its contribution to the State for the benefit of these two classes.

Respectfully submitted,

GEORGE R. MEIGS

THOMAS F. KELLEHER

FREDERIC S. POPE

1939

- Jan. 1 Ronald Edgar Shurtleff, son to Harrison Alton Shurtleff and Marion Maude (Gifford).
- Jan. 19 Robert Burns Winslow, Jr., son to Robert Burns Winslow and Bertha Louise (Greenlaw).
- Jan. 26 Walter James Bazzinotti, son to James A. Bazzinotti and Cecille Catherine (Gwodz).
- Mar. 1 Carol Frances Green, daughter to William Beacham Green and Beatrice Marion (Swain).
- Mar. 4 Irving Brewster Freeman, son to Ralph I. Freeman and Ella B. (Cornish).
- May 2 Arlene Marie Melix, daughter to Leon Frank Melix and Helen (Stets).
- June 2 Gail Frances Pierce, daughter to William Stanley Pierce and Lucy Irene (Thomas).
- June 23 Martha Pipatti, daughter to Onni A. Pipatti and Adeline B. (Crowell).
- June 29 Jane Wells French, daughter to Winthrop Weare French and Helen (Kinney).
- July 10 Helene Rosalyn Masaschi, daughter to Louis A. Masaschi and Pauline (Alvezi).
- July 24 Donna Lee Cahoon, daughter to Clarence Edwin Cahoon and Mildred D. (Emery).
- Aug. 13 Judith Roncarati, daughter to George Francis Roncarati and Katherine Ann (Riley).
- Aug. 14 Robert Craig Elvander, son to Edward Elvander and Marjorie (Decker).
- Aug. 20 Diane Seavey Buckley, daughter to John Thomas Buckley and Eulah Harriette (Farnsworth).
- Aug. 30 Elaine Hilda Whitmore, daughter to Charles Gilbert Whitmore and Hilda Emily (Medeiros).
- Sept. 2 Earl Ronald Chase, son to Charles Milton Chase and Frances May (Thomas).

- Sept. 18 Virginia Arden Morrow, daughter to Wallace Seymour Morrow, Jr. and Mary Frances (Haines).
- Nov. 11 James Gordon Lewis, son to Eugene Houston Lewis and Margaret (Clark).
- Dec. 4 Robert Edward Gage, son to Llewellyn Milton Gage and Josephine Amelia (Hoxie).

Delayed Returns

- April 17 Clarence Herbert Blackwell, son to Wallace Herbert Blackwell and
1874 Isabel E. (Fisher).
- July 30 Helen Tinkham, daughter to Charles J. and Idella M.
1887

MARRIAGES RECORDED DURING THE YEAR ENDING
DECEMBER 31, 1939

- Jan. 28 John T. Buckley of Sandwich and Eulah H. Farnsworth of Sandwich, Mass.
- Jan. 28 Ernest W. Smith, Jr. of Mattapoiset, Mass. and Frances I. Crocker of Sandwich, Mass.
- Jan. 28 Asa Shore Wing, Jr. of Sandwich, Mass. and Rosa Elizabeth Syriala of West Barnstable, Mass.
- Feb. 5 Emery C. Ripley of Sandwich, Mass. and Chrissie F. Sears of Sandwich, Mass.
- Feb. 18 Fortunato Alfred Benotti of Kingston, Mass. and Maria Vancini of Bourne, Mass.
- Mar. 18 Walter Sylvia of East Falmouth, Mass. and Mary Emily Reed of Sandwich, Mass.
- April 15 John Elmer O'Toole of Sandwich and Louise Charlotte Govone of Sandwich, Mass.
- April 22 John S. Medeiros of Santuit, Barnstable, Mass. and Elizabeth Ann Rosa, Buzzards Bay, Bourne, Mass.
- May 26 Francis E. Cottrell of Taunton, Mass. and Mary G. Murray of Taunton, Mass.
- May 27 Joseph D. A. Gayne of Sandwich, Mass. and Laura Eva Trudeau of Bridgewater, Mass.
- May 27 Washington Irving Eldridge, Jr. of Brewster, Mass. and Pauline Fisher Peters of Sandwich, Mass.

- June 17 John A. Eak, Jr. of Sandwich, Mass. and Dorris M. Steele of Sandwich, Mass.
- July 2 Robert L. Sharpless of Yellow Springs, Ohio, and Marie L. Crowell of Yellow Springs, Ohio.
- July 10 Eugene E. Caron of Sandwich, Mass. and Elizabeth A. Austin of Sandwich, Mass.
- Aug. 14 Patrick Diggins of Worcester and Kathryn O'Rourke of Worcester.
- Aug. 29 George Dewey McMillan of Belmont and Margaret Ann King of Belmont.
- Sept. 2 Arthur W. Collins of Arlington, N. J., and Mary C. Wehrlen of Bloomfield, N. J.
- Sept. 6 Gardner Glidden Bassett of Bridgewater, Mass. and Helen Lorraine Goddard of Wellesley, Mass.
- Sept. 30 Fernand Alcide Fournier of Sandwich, Mass. and Elizabeth G. Rymszewics of New Bedford, Mass.
- Oct. 5 Francis W. Anderson of Sandwich, Mass. and Emily E. Sharkey of Sandwich, Mass.
- Oct. 10 Joaquin Henriques of Sandwich, Mass. and Angelina Pacheco (Souza) of Sandwich, Mass.
- Oct. 11 George Hugh Mooney of Sandwich, Mass. and Helen Josephine Lenihan of Sandwich, Mass.
- Dec. 7 John Foxcroft Carleton of Sandwich, Mass. and Virginia Greenwood Weeks of Barnstable, Mass.

Sandwich Community Center

The first year of the activities of the Sandwich Community Center is over, and like any new venture, has been an experiment from the beginning. But like a good many experiments, it has proven its worth and value to the community, and should become an established part of the town's program.

The staff that were in charge of the Center when the project opened, carried on various kinds of activities, namely, sewing, games, athletics, dramatics, hikes, woodcraft, etc., in addition to putting the inside of the building into usable condition. Much credit is due them for the splendid work that was done.

It became necessary to close the Center for a period in the early fall, due to lack of supervision, but it was opened again on December 5, and since that time has been offering many attractions to both the young people and adults. Classes in metalcraft, leathercraft, aeroplane modelling, tap-dancing, sewing, dramatics, and games have been conducted, and many of the townspeople have have availed themselves of the opportunities offered.

Due to the limited amount of money that the committee has had to work with, some activities have had to be omitted, and it is hoped that the town will see the advantages offered at the Center and increase the appropriation for 1940.

We could not close this report without paying tribute to the late Rev. John M. Trout, who was so deeply interested and concerned in the welfare of the Community Center. His inspiration, advice, and enthusiasm was a challenge to us all, and his absence has been deeply felt.

We should also like to express our sincere appreciation to the Rev. Father McNulty, in his generosity for the Community Center building, to the individuals, merchants, local organizations, and any others who have contributed in various ways, that the first year of the Sandwich Community Center might be as successful as it has been.

May we have your support for another year?

Signed,

DOROTHY P. CROWELL

Sandwich has received during 1939 or will receive later from the State and other cities and towns reimbursement against General Welfare expenditures to the amount of \$2,001.70.

For the period of one year ending December 31, 1939, the Town has received or will receive later from the State reimbursement on account of Aid to Dependent Children to the amount of \$1,611.95.

During 1939 against a period of two years, the Town received or will receive later reimbursement from the State and other cities and towns against Old Age Assistance expenditures of \$13,177.18.

These sums do not become available for use by the Public Welfare Board, but go into the general treasury of the Town, with consequent reduction of tax rate.

Librarian's Report

The 49th annual report of the Public Library is herewith submitted.

The Library has had a busy year in each of its various phases of service. In the circulation of books and magazines; in much reference work with both the pupils, and other patrons, Genealogy being a frequent guest; in the borrowing of books through the Inter-Library Loan System for many students and readers; through the summer months, an interesting amount of information is dispensed to enquiring strangers; through the school year the work with the children is not a small, but most satisfying part of the work. The library is opened for benefit of the "Bus-pupils" each Wednesday at 1:45 P. M. All this, and much besides, goes into the making of an enjoyable and profitable year.

Ninety-nine new cards, either transient or permanent, were issued during 1939. Many of these were to summer visitors, who expressed appreciation for the pleasure they had derived from the privileges allowed them.

The number of books cataloged the past year was 276. The works of fiction numbered 181, and the non-fiction 95. The Library purchased 216 of these books, the other 60 were given. Thornton Burgess presented 37 of them. Others were given by Rev. S. M. Beale, Mr. Samuel Foxcroft, Miss Harriet M. Taylor, Josephine Millekin, Gordon Bither and various publishers. Over fifty books have been rebound and offer an attractive collection of popular books for those who have not already read them. Sixteen volumes of National Geographic Magazines, of recent years, have been bound.

Books in Italian have been supplied for readers in that language. The Library would gladly secure books in any language that might be desired by anyone.

The magazines to be found at the Library represent a wide range in reading. For the benefit of the public a list of the magazines is given here: Harpers, Hygeia, Time, Life, Readers' Digest, Nation, National Geographic, Hobbies, Bird-Lore, Nature, Pan-American Union Bulletin, Ladies' Home Journal, Woman's Home Companion, Saturday Evening Post, Parents, Harpers Bazaar, Home Craft, Scientific American, Boys' Life, American Boy, Popular Mechanics, Popular Science, Open Road, Child Life, Playmate and Wee Wisdom.

These additional ones, The American, Atlantic, Dumb Animals, Kiwanis, London Illustrated News, Life, Specialty Salesman, Teach, American Legion Magazine, and the National News of American Legion Auxiliary were donated by Mrs. H. A. Dunbar, Mrs. H. W. Whitney, Mrs. E. T. Wright, Mr. Alfred Hoey, the American Legion Auxiliary and several publishers, to all of whom appreciation is expressed.

The circulation for the past year nearly reached the 20,000 mark, the exact number being 19,941. Books of fiction number 13,486, and the non-fiction 3,927, which averaged more than one book in each five taken (21.7%). Magazine circulation reached a new high, 2,528, and nearly seven out of each ten were non-fiction magazines (68.9%).

A goodly number of patrons take out magazines regularly, and we recommend others take advantage of this easy way of securing magazine reading.

A new supplement to the State Certificate Reading List has given a larger choice of books for the Grade Children.

A standard book rack gives an opportunity for over 100 extra books to be on display, and a list of the more recent additions hangs for convenience on the rack.

The Lecture Room has accommodated many committees and organizations with a meeting place, and the new light at the entrance in the hallway is enjoyed by those who attend.

The evergreen on the lawn, decorated by the Woman's Club, becomes, with its increased growth, more conspicuous each year. It gave pleasure to many during the holiday season.

It is fitting that gratitude should be expressed to the Division of Public Libraries, at the State House, for their constant assistance through the year.

The cooperation and support of the Board of Trustees, and also the loyalty of our patrons, both young and old, have contributed largely in making possible the success of the year just closed.

Respectfully submitted,

ELIZABETH L. BURBANK,

Librarian.

Sandwich, Mass.,

Jan. 9, 1940.

Approved:

CHARLES S. LLOYD, Chairman of Board.

Town Auditors' Report

The undersigned Auditors of the Town of Sandwich have examined the accounts of the Treasurer and Collector, Frank L. Howland, and the accounts of the Trustees of the Weston Memorial Fund, and find them correct and properly vouched.

ALANSON W. PARKES
JOHN FOXCROFT CARLETON
LOUIS J. LLOYD

Nurse's Report for the Year 1939

Nineteen babies were born to Sandwich parents during the year. This gives us a total of 98 children under school age. With few exceptions, these little ones are being intelligently cared for. Fourteen of these are protected against diphtheria and the others will have an opportunity to have the toxoid early this year. Four have had tonsils removed. Nine have already been to the dentist. In the group of sixteen who entered school this year for the first time, fourteen are protected against diphtheria. Thirteen had been to the dentist for one or more years. A pre-school clinic was held and all who came were vaccinated against smallpox. This group under school age had 189 visits.

The school physician in his annual physical examinations noted 52 pupils with enlarged tonsils. Many of these are not surgical but some are old neglected cases which should have had attention long ago. Thirteen did have tonsilectomies during the year and others would have been cared for only there were no beds available at the Cape Cod Hospital during the last of the summer vacation.

The dental clinic still remains one of the most worthwhile activities offered the school group. The dentist's salary is paid by the Board of Health and the children contribute twenty-five cents for each two sittings towards the materials used. Many families use the clinic who are able to care for the routine expenses such as rent, fuel, food and clothing but would find it impossible to pay for dentistry for the whole family and the younger ones would be the neglected ones. We should be able to care for these from three years of age through the sixth grade, better still, the seventh grade when all deciduous teeth would be out and permanent teeth in place. The family should and will carry on after that. We find many children use the first money they earn for dentistry. Had their teeth not been cared for during this early period, they would be beyond repair or the work too extensive to have undertaken. It is important that children have dental examinations at an early age and regular-

ly thereafter. Some children need work done every six months and all children should have their teeth carefully examined every year. This is our regret: we do not get all our patients young enough to do preventative work nor can they be seen at regular intervals. The average is every two years. Two children asked to have their work done last year for the first time at the ages of thirteen and fourteen. The younger had nine sittings and lost a permanent tooth. The older one had at least one cavity in every tooth and some were beyond repair. We could not undertake this work. Children who have come to the clinic at an early age and regularly, enjoy the experience as they know nothing of the discomfort of having deep cavities drilled or permanent teeth extracted that has built up the dread of dentistry in older folk. At present we have clinics only five months of the ten in the school year. Forty-seven children had their work completed at the clinic, seventy-two by private dentists making a total of 119.

Twenty-three children were found with defective vision. Nine of these have glasses that probably need changing. Twenty-four have been cared for during the year.

The first and second grades are having a rest period which shortens their long noon-hour play time which should prove beneficial. Twenty-five pupils spent part of the summer vacations in camps. These were 4-H Club, Camp Fire, Girl and Boy Scout Camps where they had health supervision and routine healthful living.

Twelve children are being supervised and x-rayed in the Chadwick Clinic. Six of these are old contact cases. (Five of them have come to us within two years.) The other six we hope will be discharged during their school life as being in no danger of developing tuberculosis as two have been this year.

Mumps was the only communicable disease prevalent during the year. Cases occurred from January until the close of school in June. 165 visits were made to the school building and 174 to the homes of school children.

Morbidity cases requiring nursing care remained about the same: 375 to patients in their homes, 17 prenatal visits were made and 463 social service or others. Sixty-two calls were made after hours and Sundays.

The nurse made 21 trips to Hyannis with patients and five to Pocasset. She attended two meetings of the Cape Cod Public Health Nurses' Club and the Simmons College School of Public Health Nursing Alumni Association's annual meeting.

I wish in closing this report to give the credit for the major accomplishments of the year to the teachers who are carrying on a daily health program in their individual classes, to the school dentist for his patient and untiring oral hygiene instructions and to the school physician for his wise council in all matters pertaining to the health of all children. The leaders of the clubs and groups carrying out health instructions have played no small part in the educational work done.

Respectfully submitted,

EVA L. WESTOVER

Report of Committee on Conservation

The Committee on Conservation respectfully submit their report on the activities in connection with the Town appropriation of \$100.00 granted for fish and game. While this is a comparatively small sum, we believe the voters should know how it was spent. In so doing we take the liberty to explain the background on which we are working and try to present the picture of our activities and what we hope to achieve.

Through the earnest endeavors of the sportsmen of Barnstable county an enabling act was passed by the Legislature in the early part of 1937 permitting the towns of this county to raise and appropriate a sum of money not exceeding \$500.00 for the benefit of fish and game.

Most of the towns took advantage of this act and voted sums ranging from \$150.00 to \$500.00, which were expended in different ways for the good of fish and game according to the wishes of the clubs. The Shawme club as well as others, realized that large areas of open land, once under intense cultivation, were slowly reverting to wild growth of bushes and undesirable plant growth. These conditions had been brought about by the changed conditions of agriculture, the lack of interest in family gardens and other causes. Thus it is seen that some of the vital feeding areas of our quails, pheasants and the numerous small winter birds gradually vanished so that the weed seed, the grain fields and such like mostly disappeared.

To overcome these losses as far as possible and encourage the game birds as well as seed eating birds of all kinds, we decided to try and do our bit to bring about better feeding conditions and with the limited funds at hand and the wonderful cooperation of club members a program was adopted and carried out. Land owners were contacted, plans outlined and permission freely granted to plow, fertilize and seed areas agreed upon by the committee with the owner. No strings were attached or binding agreement.

Thirteen areas were plowed, fertilized and seeded, mostly with buckwheat with some other grains experimentally. These feed patches ranged from an eighth acre to a full acre in favorable localities, with a few smaller areas, located from the Barnstable line nearly to the Canal, mostly within 1½ mile of the coast. From observation by the members, all feed patches were utilized by game birds and numerous seed eating birds. And in several places the deer ate more than their share of both the plant growth and seed. The seeding produced very satisfactory results.

Two tractors were donated by club members; the only requirements being that the drivers' labor should be paid for at the rate of 40 cents per hour and the gas and oil at 20 cents per hour. Club members followed the tractors spreading fertilizer, seed and other necessary work free of charge.

Statistics show that under big business, recreation and sports are top notchers, and that more money is spent annually for hunting and fishing than any other branch of sport. More and more the people of this country are becoming fish and game minded, which emphasizes the fact that everything possible must be done to assist and preserve this sport.

Our club is trying to do just this thing; we believe in growing two game birds or fish where one grew before. We uphold the teachings of conservation which calls for game management in every way, and leaving more than enough breeding stock to supply an ever increasing supply for future generations. We feel that it is a public trust and a great asset to any town, and the good work has just begun. We ask for no public building, canopy or costly laid out grounds; we seek only the fields and woods with the sky over head, the ground under foot, the streams and ponds, and a little more money to carry on. Expended for seed and fertilizer, \$67.87; for gas, oil and driver, \$32.02. Balance 11 cents. Appropriation \$100.00.

HARRY A. TORREY, Chairman,

Committee on Conservation.

Report of Inspector of Wires

Sandwich, Mass., December 30, 1939

The Honorable Board of Selectmen,
Sandwich, Mass.

Gentlemen :

The following report of inspection of wiring for the year 1939 is respectfully submitted.

Number of buildings inspected	40
Number of calls	54
Miles traveled	190

There have been few causes for complaint and the general character of the electrical work has been excellent.

There has been a noticeable neglect on the part of some electricians to notify the inspector before starting work, and in several cases the entire matter has been left to the property owner. This is not as it should be. The electrician should notify the inspector before starting and immediately upon completion of a job.

I am again suggesting to property owners the necessity for having installations that have been in use for ten years or more thoroughly checked by a competent electrician.

For many years the Underwriters Code has specified No. 14 wire for the ordinary house circuit. The reduction in price has encouraged the use of lamps of greater candle power, thus increasing the loads on these No. 14 circuits to near full capacity. The increased use of electrical appliances has also added to the loads. It is my belief that the use of No. 12 or even No. 10 wire, thus decreasing the line resistance, would give better results than those now obtained. Every ohm of resistance in the line is reflected on the meter. The following table shows the drop in resistance per thousand feet of the next two larger sizes of wire:

No. 14 (In common use)	2.521 ohms
No. 12	1.586 ohms
No. 10	.997 ohms

May I suggest that electricians bring this to the attention of property owners when figuring on work.

Very respectfully,

WILLIAM A. WINSOR,

Inspector of Wiring.

ANNUAL REPORT
OF THE
SCHOOL COMMITTEE
AND
SUPERINTENDENT OF SCHOOLS

Year Ending December 31, 1939

IN MEMORIAM

James H. Tangney

WHEREAS: Almighty God in his infinite wisdom has called James H. Tangney to his home above, we mourn the loss of a devoted teacher and citizen, who exemplified to the fullest degree those qualities which have made our Democracy the hope and inspiration of all peoples who are striving for the better and broader life.

James H. Tangney came to the school system in Sandwich in January, 1908, at a time when conditions were most unfavorable. His steady purpose, inflexible integrity and faith in youth overcame all obstacles and the School Street school once more went forward with reinspired morale.

Mr. Tangney resigned from the school system in June, 1932, at retirement age. With retirement Mr. Tangney did not lose his interest in the schools and his presence at school functions, educational as well as social, was always an inspiration.

The schools of Sandwich deeply regret the loss of a man who gave so many years of devoted service to the youth of the Town.

Report of The Superintendent of Schools

To the School Committee and Citizens of the Town of Sandwich:

The spirit of the school is of great significance in its relation to its efficiency. There is value to the child in the results achieved in the formal subjects taught, for the knowledge of the three R's and all the rest must, of course, be imparted, but the by-product of the school is fully as important as its formal attainment. The spirit of the school, or, in other words, that which comes from the relation of teacher and pupil, of pupil to pupil, of the school and the community, affects more vitally not only present day living but the after-life of the children more than the required subjects of the curriculum. Learning to live together through experience is as important a lesson as can be found between the covers of any book. Absolutely ideal human relations seem almost impossible, but when an atmosphere of confidence, good will and high purpose characterize, in the main, the various relations of school life, the spirit of the school is good and pupils are absorbing from it preparation for life of a most significant and helpful kind. The Sandwich school is conspicuous for this fine feeling. Because of it the problem of formal discipline has been reduced to a minimum. Interest, orderliness and industry prevail. Teachers and pupils work together, each co-operating for the general good. They are frequently together not only in the classroom but on the playground and in the social life of the school. Courtesy, courage, self-sacrifice, clean-speaking and fair play are encouraged so that an effective school spirit is prevalent that makes high attainment possible.

Although Sandwich High School is one of the small high schools of the state, it would be difficult to find a high school of similar size that has sent so many of its graduates to college, and whose graduates have attained such high honors. This is all the more remarkable when one considers the frequent change in the personnel of the high school faculty. Fortunately we have one excellent teacher who has been a member of the faculty for a long time. Her preparation has contributed to a large degree to the success of these students in college. Sandwich High School has a Class A rating from the Department of Education which means that in the matter of equipment, size of classes, courses of study, qualifications of teachers and other factors, the high standards set up by the state are met. It also enjoys the certificate privilege of the New England College Entrance Certificate Board, which means that, at the colleges of Amherst, Bates, Bowdoin, Clark, Colby, Massachusetts Agricul-

tural, Middlebury, Tufts, and Williams and at the universities of Boston, Brown and Wesleyan, graduates of Sandwich High School who do work of certificate grade are admitted without examination. Harvard, Massachusetts Institute of Technology, Dartmouth, Simmons, Holyoke, Smith, Antioch, Syracuse and Northeastern do not belong to this organization and have their own plans of admission. Sandwich High School graduates can satisfactorily meet their conditions and are admitted without examination. Still other colleges have other plans of entrance and Sandwich High School graduates are able to satisfy their requirements. It is pleasing to note that during the past few years Sandwich High School graduates have been in attendance at nearly all of the colleges mentioned above.

When we think of colleges, we are apt to think of scholarships, and although the School Committee do not decide who shall receive the various scholarships, they expect the superintendent to keep the high school pupils fully informed in regard to the opportunities presented to them through the thoughtful generosity of the donors. The superintendent's report of 1937, pages 102-103, contains copies of the wills under which the various scholarships in Sandwich are set up and discusses the method of choosing the recipient. Since then a very valuable scholarship has become available through the generosity of the great benefactor of the schools of Sandwich, Clementina S. Wing. Under the terms of her will is established at Harvard the Henry T. Wing Memorial Scholarship Fund, as follows:

"I give and bequeath the sum of Ten thousand dollars (\$10,000) of such principal to the PRESIDENT AND FELLOWS OF HARVARD COLLEGE, at Cambridge, Massachusetts, where my husband graduated in the Class of 1864, and I direct that said sum shall be kept intact and be known as "The Henry T. Wing Memorial Scholarship Fund," and that the income thereof be used for the purpose of a scholarship or scholarships for worthy undergraduate students in Harvard College who may be in need of financial assistance, preference being given to such students coming from the Town of Sandwich, Massachusetts, or from other communities in the County of Barnstable, Massachusetts."

This scholarship is a very valuable one for it amounts to about \$400 per year. The selection of the recipient of this scholarship is by the college authorities. We hope to have candidates apply for it in June.

There also becomes available this year, under the terms of the will of Sarah E. Chamberlain, the Chamberlain Scholarship:

"Eighth. I give to the National Bank of Wareham the sum of Two

Thousand Five Hundred (\$2500.) dollars to be held in trust for the following purposes:

1. To hold, manage, invest, reinvest, convert and reconvert the same.
2. To pay over the net income thereof for a scholarship for some deserving young person who is a resident of the Town of Sandwich, to assist such person in a higher education in some college or school of similar character. It is my intention that this payment shall be made annually to one person, but if in any year there is not in the opinion of the committee such a deserving resident of Sandwich, the same may be accumulated for a period of not more than five years and used for one or more suitable persons. It is my will that a selection of the persons to receive this scholarship shall be made annually on or about June 15th by the majority vote of a committee consisting of the persons who from time to time shall be the Superintendent of Schools of the town of Sandwich, the Principal of the High School and the Chairman of the School Committee, and if any of these offices cease to exist, it is my will that the officer who takes over the duties of such office shall hereby become a member of this committee. But no one person shall have more than one vote although he may be holding more than one such office. And my said Trustee shall pay over to the persons who shall be selected by said committee from time to time the net amount of said income annually, or if the same has accumulated such amounts to such persons as said committee may direct. And it is my will that such selections and directions shall be in writing and signed by a majority of said committee and that payments made to persons in conformity with such written authority shall fully discharge my said trustee although the persons to whom payment is made may not be of full age. It is my wish that this bequest in conjunction with any bequest made by my sister shall be known as the Chamberlain Scholarship."

Scholarships are of great assistance to young people in securing a college education but they should not be the determining factor in the selection of a college. However, if there is any possibility of your child going to college, it would be wise to contact the principal so that among other items early inquiry might be made in regard to the availability of scholarships and other financial aids at the chosen college.

The present day high school has truly become the school of all the people, and today because of school attendance laws and economic conditions practically all children from fourteen to eighteen years of age attend high school. This has presented many problems, for, whereas, in the past a school curriculum could be set up based primarily on academic content, the new curriculum must also take into consideration those children who have other abilities, and

provide an education suitable to them. Our high school has added courses in the social studies field, in general mathematics and in general science in order to give an understanding of current American life and in order to prepare all pupils for intelligent participation in the life of the community. A shop program for boys has been inaugurated. Thus far the work has been rather confined to woodworking and to a large degree each youngster has made about the same projects as his fellow students. This year advancement has been made and a greater variety of projects are being constructed, each according to the taste of the individual student as to the article, kind of wood, and method of construction. Some work has been done with simple projects in electricity and metal working, and before the year is over there will be some training on the repairing of gasoline engines. Ours is a general shop course and is definitely non-vocational, for the vocational type of education requires equipment, instructors, and courses of study that can best be provided at a definite trade school such as the one now being maintained at New Bedford. Our course merely develops interest and some skills and knowledge of the use of tools. Those who find this work particularly attractive do become better prepared in a vocation where these skills are applied, but that is incidental. Our purpose is to give those who are mechanically minded the same opportunity for securing a high school education as is provided for those who are book-minded. When conditions are more normal, a course in domestic science should also be provided, training girls to be better home managers, having considerable consumer knowledge, the ability to budget and to buy efficiently, and the ability to make and run a home intelligently.

One of the significant trends of the present period of education is the development of a more scientific means of diagnosis and measurement in many of the school subjects. Schools of education, state and city departments of education and research students have carefully constructed achievement tests which have then been given to thousands of children. The results have been carefully scored and standard norms established. These experimental standard achievement tests have then been revised and published at reasonable prices so that they have become available to many school departments. It has been our practice at Sandwich to measure our accomplishment by using so-called batteries of these standardized tests, checking the progress of our children in the fields of spelling, reading, English, arithmetic, history, geography and health. Results of the tests show that Sandwich children do well in all subjects with the exception of health. The tests in health show that in accordance with what test-makers consider to be desirable knowledge in health, we should place more emphasis on and give added instruction in the more technical knowledge in this field. Careful analysis of the tests in arithmetic indi-

cated that, although many children knew what methods to use in the solution of problems, they made mistakes in fundamental processes so that results obtained were not accurate. Since number in life situations requires accuracy it seemed wise for our teachers to make a careful study of the errors. Therefore, teachers of arithmetic in Grades 5, 6, 7 and 8 throughout the district have been meeting with the superintendent in a series of conferences in an attempt to understand the whole matter and to bring about effective remedial teaching. Although children in these grades have previously been taught the fundamental processes of addition, subtraction, multiplication and division, and although they have devoted much school time to these subjects, the teachers found that some of them have real disabilities and that there were few pupils who were absolutely accurate in all fundamental processes in a reasonable length of time. Special practice exercises were constructed using the basic number facts and these drills were given to each pupil, the teacher making careful diagnosis of the errors made by each pupil. Further drill procedures were then devised and administered with much individual help so that there has been brought about marked improvement. In one grade results have been so much improved that the average for the class has been brought up to a standard of over 99%. In that grade practically every child has an accurate answer in every example. The teachers' meetings in this field for the balance of the year will take up the subjects of common and decimal fractions, denominate numbers, percentage in all its applications, interest, taxes and other applied mathematics.

In 1937 we discussed the aims and objectives of primary and middle grade reading and last year arithmetic and spelling in the elementary school. Continuing this series, we will try to outline very briefly the teaching of penmanship in the elementary school. Although the typewriter has done much to displace handwriting and in spite of the fact that there are a number of places where boys and girls of elementary age are taught the use of the typewriter, we believe that effective living does demand the ability to write with a fair degree of legibility and fluency. In the past there has been considerable disagreement as to which writing system was best, but the present-day controversy in this field concerns itself for the most part with whether the school should teach manuscript or cursive writing, many believing that the teaching of manuscript writing, a form of printing, in the first grade facilitates the transfer from reading to writing and writing to reading. A number of schools teach manuscript writing in the primary grades and cursive in the later grades, but after careful consideration of the advantages and disadvantages it seems wise to concentrate on cursive writing as being much more fluent and in many cases more legible. Any form of penmanship is a difficult skill, re-

quiring the use of fine muscles and a high degree of co-ordination. Recent methods prefer to start the teaching of writing with simple words rather than with an individual letter, the teacher being very careful to allow no writing without supervision so that from the very beginning correct movements and formations may be assured. As we advance from grade to grade there is an increase in the amount of writing required so that in all grades of the elementary school writing is almost a daily subject of instruction. Present-day teachers are greatly aided by the fact that there have been careful studies made as to the degree of legibility and fluency required for meeting those life situations requiring the use of handwriting. Very usable scales have been evolved so that not only teachers but the children themselves can rate their product with a high degree of accuracy. Improvement in handwriting becomes a problem of individual instruction with teachers soliciting the interest of the children in their own improvement, giving them correct letter forms and showing them ways in which their writing can be improved. Teachers and pupils use the scales to measure results, it being a comparatively simple matter for the child to compare his writing with the scale and to note whether or not his writing is up to the standards set for his grade. Teachers supplement this work with time-tests so that both legibility and speed may be measured. In common with most schools today we find that our boys and girls are able to write with a fair degree of legibility and speed by the time they reach the seventh and eighth grades, but as they progress through high school there is considerable regression. High school teachers do make some effort to bring about improvement but we cannot hope to do much until we can find a way to provide more definite remedial treatment.

There have been five changes in the faculty during the past year. This represents a very large percentage of teacher change, something that is likely to continue. However, it seems wise for Sandwich to secure able, young, rather inexperienced teachers, keeping them as long as possible, **rather than to attempt** to hold them by salary advances since the financial condition of the town does not seem to warrant a higher salary schedule. Of course this is not an ideal situation and presents many problems, but through frequent contact and close supervision of the superintendent and principal every effort is made to prevent any change in personnel reacting to the disadvantage of the pupils. Miss Esther Thorley resigned to accept a position in Melrose and her position has been taken by Miss Ada Roberti, a graduate of Bridgewater Teachers College in 1938, who has had a year of cadet teaching in the town of Bourne. Mr. R. Burns Winslow resigned to go to Winchester and Mr. Vincent R. Schmidt, an outstanding graduate of Massachusetts Agricultural College, has taken his place. Mr. Raymond F. Cook went to Belmont, and Mr. Everett

McDonald, formerly a teacher in Amesbury, was appointed. He was transferred to the high school as teacher of mathematics and social studies following the resignation of Mr. George Magrath, who has gone to East Hartford. We now have as a substitute teacher in grade six, Mr. Robert S. DeAdder, a graduate of Hyannis Teachers College, class of 1939. Miss Elizabeth Austin resigned to be married, and in her place we have Miss Alvema Consolini, a degree graduate of Hyannis Teachers College, with several years of teaching experience in Mashpee.

From an inspection of the Henry T. Wing School one would hardly realize that the building has been in use for eleven years. As stated in the past, this has largely come about through the skilled service of the custodian. The past year has seen the first sizeable sum spent on repairs, replacement and upkeep. During this year the sum of \$773.91, a figure that is approximately one-half of 1% of the value of the building, has been spent for this purpose. This is comparable to a man owning a \$4,000 house and paying \$20 per year to keep the inside and outside in repair and to replace and repair the furnishings. Among the items cared for was the repainting of the six toilet rooms, shower room, stage and touching up other bare spots in various rooms of the building. Two porches were constructed at the east entrances of the building thus making it easier to keep the corridors warm and contributing toward reducing the cost of heating. The large draperies in the auditorium were interlined with dark flannel thus making them light-proof so that the auditorium may be darkened for the use of the sound-on-film motion picture machine which the students have purchased. This machine is proving very valuable and it happens that the auditorium is so fine acoustically that the reproduction of sound films is exceptionally clear. For a number of years we have had trouble with the heat radiating units in the fan room in the basement of the building. It appeared that we would have to have a new installation, but these units have been repaired and installed by a new method, so that we now seem assured of their effective use for some time to come.

In accordance with the vote of the annual town meeting a new bus route for elementary school pupils was started. This route carries the children in the village section of the town to and from school, the cost of this extra route being \$1.00 per day. It is our opinion that the expenditure of \$180 per year for this purpose worked out very well. Transportation of school children in Sandwich takes a considerable proportion of the money provided for schools, approximately 10%. The average per pupil cost for the state in net average membership for transportation is \$2.66. In Sandwich it is \$13.24, thus adding nearly \$11 to the per pupil cost for support of schools in Sandwich. However, the cost per pupil transported is relatively low, for whereas in the state the

average cost per pupil transported is 18 cents per day, in Sandwich it is 10½ cents per day. At first glance the comment that we could reduce the cost of schools by requiring more children to walk seems sound. Actually this is not the case for the state laws are such and the distances children live from school so great that we could not do with less than two school buses. Since the cost for extensions to the main routes is so small, it seems very wise to have the Sagamore extension to the East Sandwich route and the village extension to the Forestdale route. To get the children to and from school, the school committee establishes transportation routes, prepares specifications and asks for bids on the various routes. The lowest responsible bidder is then given a contract for a term of three years, with a renewal clause inserted that makes it possible for the bidder to spread his depreciation over a term of six years rather than three years, thus making lower bids possible.

In conclusion, may I thank the School Committee for the careful consideration given to every phase of the school program and for the challenge they have presented to the superintendent, principal and teachers for a superior type of service, thus making possible a program of education of merit.

Respectfully submitted,

JAMES F. PEEBLES

Report of Principal

Dear Mr. Peebles:

I herewith submit my second annual report as principal of the Henry T. Wing School.

Today in a world of confused political, social, and economic practices, the school becomes highlighted as the outstanding stabilizing force in society. The purpose of this report is to give an account of our stewardship in accepting this responsibility, and to indicate in some way the educational progress we have made throughout the year 1939. To keep the report from becoming too long, it has been necessary to differentiate and select the content. It has been possible therefore to give only a brief treatment to some of our activities.

Curriculum

Over a period of years significant changes take place in the emphasis given any field of study, and during recent years practically every subject-matter field has been accorded focal attention. This changing emphasis has both broadened and strengthened our curriculum and its effect has been keenly felt in the students' selection of subjects. During periods of economic stress there is a stronger inclination on the part of students to be extremely practical in their selection of subjects and there has been a noticeable shift from the formal college curriculum to the general curriculum.

As stated in the annual report for 1938 our general curriculum was supplemented by the introduction of a shop course to provide practical training in elementary carpentry. This year under the direction of Mr. Vincent Schmidt this course has been broadened so as to include training in elementary electricity and automotive mechanics. In September general shop was elected by nineteen boys and although present facilities limit instruction to twelve, the program has been arranged so that any boy desiring to take shop work may do so at some time during his four years.

Another course enlarged to fit the needs of the general curriculum has been public speaking. This course held in conjunction with United States History is required for all seniors and today has proved exceptionally valuable. Although conscious efforts are being made throughout the entire school for speech improvement, the inclusion of public speaking in the program of studies as a separate subject guarantees merited special attention. Purposely,

the theoretical and highly technical aspects of speech have been omitted and emphasis has been placed on the importance of practical speaking. The class took as its major project the organization and presentation of the graduation program, and its reception was an exemplification of the students' sincerity of purpose.

The college curriculum has also received minor revision and now includes an elective course in trigonometry and solid geometry for juniors and seniors planning on attending technical schools after graduation.

To understand better the present curriculum a distribution of subjects studied is presented below.

SUBJECTS	FRESHMEN		SOPHOMORES		JUNIORS		SENIORS		TOTALS
	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	
English	18	12	10	11	8	8	6	8	81
Latin	4	5	1	3					13
French			6	9	2	6	2	3	28
General Math.	14	6					1		21
Algebra	4	6							10
Geometry			6	2				1	9
*Review Math.									
*Trig. & Solid Geom.					4		2		6
General Science	17	12			1				30
Biology			6	10					16
*Physics									
*Chemistry					4	4	3	7	18
Social Science	7	7		1			2		17
World History	1		7	10	6	1			25
U. S. Government	1		2	3			2	2	10
Economics			2		4	5		1	12
U. S. History							6	8	14
Public Speaking (& Current Events)							6	8	14
*Bookkeeping									
*Shorthand					1	5		3	9
Typing					3	7		1	11
Jr. Bus. Training			2	9	3				14
General Shop	8		1		1		2		12

Vocal Music	18	12	10	11	8	8	6	8	81
Instr. Music		7	4	4		3	1	4	23

*Alternate year subjects.

The fact that our school retains a Class A rating from the State Department of Education, belongs to the New England College Certification Board, and that our graduates maintain high standards in the institutions of higher learning they are now attending, substantiates our belief that the present curriculum is adequate. Future consideration should be given, however, to the possible inclusion of a domestic science program for girls.

Activities

Our scholastic program has been supplemented by a meaningful activity program in which whole-hearted participation exists among both the pupils and the faculty. Athletically we have been moderately successful and our teams have been commended frequently for their splendid spirit of sportsmanship. In basketball and baseball our boys made creditable records against our much larger rivals. The able coaching of Mr. George Magrath was in a large measure responsible for this success. Under the direction of Miss Esther Thorley the girls' teams made remarkable progress and much was done toward rebuilding the athletic ranks depleted by graduation. In track and cross-country our records show how ably Mr. Vincent Schmidt has filled the vacancy left by Coach Robert Winslow. Our girls' and boys' rifle teams have also enjoyed fine seasons under the coach change mentioned above. This present year, in an effort to broaden the physical education program and to prepare our high school teams better, Miss Ada Roberti and Mr. Everett McDonald have extended the entire athletic program to the intermediate grades.

This semester also marks the continuation of a well-rounded 4-H Club program, with the junior high school teachers acting in the capacity of club advisers.

Progress has been enjoyed in both the instrumental and vocal music group, the latter having expanded to include a girls' glee club and a mixed a cappella group. A well attended musicale, with all grades participating, was given in the spring of the year, the proceeds going toward sending a group of our students to the New England Festival of Music in Boston. Our school also acted as host to the United School Symphony Orchestra and many of our own students took part in the concert program later to be recorded over the Columbia Broadcasting System.

The Senior play, directed by Miss Thorley assisted by Miss Verna Swift, proved to be an excellent performance and was witnessed by a large and appreciative audience. A junior dramatic society in charge of Mrs. Grace Mulaly has also proved a credit to our school and has furnished the students of that age with valuable dramatic training.

In addition to our extra-curricular activity program and its frequent contacts with the patrons of our school, we observe each November, in cooperation with the Department of Education, an American Education Week. During this week we attempt to interpret our school to the public and to explain our aims, our objectives, our needs, and our accomplishments. It is hoped that this practice may grow in proportions to represent a constant bond of understanding between the school and the community.

Visual Education

The real spirit of the school becomes evident when the student body is called upon to lend support to a large common undertaking. This year such an undertaking was met in the student purchase of a Filmosound motion picture projector and a long-felt need was answered.

The inestimable educational value derived from a visual education program was realized by the entire student body and under the competent leadership of student council representatives a projector was purchased marking a permanent gift to future classes at the Henry T. Wing School.

In our assembly organization the new machine is being used as both a teaching device providing the necessary "seeing experience" and as a means of recreational appreciation. The recording unit also makes possible the amplification of music for both classes in music appreciation and social dancing.

Tercentenary

To appreciate better our town's rich heritage, on its 300th birthday, comprehensive activities were realized in grades one through twelve. Studies of the town's founders, early hardships, relations with the Indians, famous citizens, churches, participation in national history, and present-day assets proved exceptionally worthwhile. Student research was supplemented by talks given by citizens cognizant of our broad history, and by visitations to present-day famous sites within the town. Aware of the appropriateness of the occasion the senior class based its commencement exercises on the Tercentenary, using as its theme "Sandwich—Its Past, Present, and Future." The Art Department constructed murals depicting famous events in town history and under the direction of Mrs. Florence G. Snow a giant history book was constructed portraying our town in the years 1639, 1939, and 2239. It is our sincere hope that these activities contributed in a small way toward making the citizens, both young and old, more fully appreciative of our town's outstanding worth.

In closing may I mention our heartfelt loss over the passing of one of the school's most loyal friends—James Tangney. The memory of his faith in us constitutes a lasting inspiration.

To you, the committee, our faculty, students, and friends may I express my deepest appreciation, and promise to be worthy of still further trust.

Respectfully submitted,

OWEN B. KIERNAN

Report of School Physician

Dear Mr. Peebles :

The annual examination of the student body of the Sandwich school has been completed and among the conditions found were the following: fifteen children had faulty posture; and fifty-two cases of enlarged or diseased tonsils were found. In many of these cases arrangements have been made for removal of the tonsils. The Chadwick clinic is again following up a number of cases of suspicious lung lesions. Examinations of the eyes showed twenty-three cases of impaired vision. In many of these cases the need of eye-glasses is apparent. Mumps was rather prevalent during the past year but all cases responded uneventfully. Scabies and pediculosis have continued to give some trouble but the teachers reported all cases coming under their observation and aided in limiting the spread of these conditions.

Respectfully submitted,

ROBERT F. GRANDFIELD, M.D.

Commencement Exercises

CLASS OF 1939

On The Mall—March—Goldman	Shawme Orchestra
